Legislative grant Cadets Corps.....	50 00
Fees.....	60 00
County proportion this year.....	3440 00
Town.....	1110 00
	\$ 8010 00

Ordered filed.

The amount asked for by the Board of Education this year is \$710,00 in excess of last year, partially due to the increase in salaries.

Councillor Steacy entered. Chief of Police Graham asked the council to grant him an increase of \$100 per annum on his present salary.

Laid on the table until later in the evening.

W. Vine and others petitioned the council for an electric light at Vine's Corners in Salem.

On motion of Councillors Osborne and Denison the petition of W. Vine and others was referred to the Fire Water and Light Committee to investigate cost of placing light asked for and report at next session.

Ed. Wilson and others petitioned for an electric light to be placed on the corner of Donald and Thomas streets.

On motion of Couns. Osborne and Denison the petition was referred to the Fire Water and Light Committee to report.

The Finance Committee asked for further time to report in reference to cement walk in front of Merchants' Bank property. Also in the matter of the refund asked for by N. Fellows on account of East street sewer. The

Size 40—1	9.00	2 piece suit	6.00

## J. L. BOYES,

of said sewer, and then the council could take action.

Moved by Coun. Simpson, seconded by Coun. Steacy, that the council advertise for tenders for the construction of all the granolithic walk the town proposes to build this season. Lost.

Reeve Symington brought to the attention of the council the unsafe condition of the covered bridge and that it should be repaired at once.

Moved by Coun. Alexander, seconded by Coun. Steacy, that notices be posted at each end of the covered bridge warning the public that the said bridge is unsafe for the passage of any heavy vehicle, also that the Street Committee have proper supports placed under the south end of bridge. Carried.

On motion of Reeve Symington and Coun. Osborne the Chief of Police was ordered to have notices placed on the road south of the swing bridge, forbidding the dumping of any more rubbish in that locality.

On motion of Reeve Symington, seconded by Coun. Denison, the Gibbard Furniture Co. were given permission to erect an overhead bridge from their finishing room to their packing room, the said Company to be liable for any accidents arising therefrom.

Moved by Coun. Kimmerly, seconded by Coun. Simpson, that contractor John Lowry be privileged to place all surplus stone and other material on street where sewer has been built, at his own expense, said work to be done under the supervision of the Street Committee. Carried.

On motion of Councillors Kimmerly and Simpson, the petition of W. Vanastine and others for a cement walk was referred to the Street Committee to ascertain the cost of laying same, and report.

The matter of an increase in salary for the Chief of Police was referred to

**PRINCIPAL DYER, M.A., D.D.**

**VOTERS' LIST, 1908**

Municipality of Richmond, County of Lennox and Addington.

Notice is hereby given that I have transmitted or delivered to the persons mentioned in section eight of the Ontario Voters' List Act the copies required by said section to be so transmitted or delivered of the List, made pursuant to said Act, of all persons appearing by the last revised assessment roll of the said municipality to be entitled to vote in the said municipality at elections for members of the Legislative Assembly, and at Municipal elections, and that the said list was first posted up in my office at Richmond on the 25th day of July, 1908, and remains there for inspection. Electors are called upon to examine the said list and if any omissions or any other errors are found therein to take immediate proceeding to have the said errors corrected according to law.

**ABRAM WINTERS,**  
Clerk of the Township of Richmond.

Dated 28th July, 1908, at Richmond.

**Strength of Rings.**

Some elaborate calculations, backed by experiments, have recently been made in England to determine the breaking strength of rings. It appears that a ring of ductile metal, like malleable iron, will be pulled out into the form of a long link before it breaks and that the ultimate strength of the ring is virtually independent of the diameter. Fracture finally occurs as the result of almost pure tension, and the resistance to breaking is a little less than twice that of a rod of the same cross section subjected to a straight pull. As the ring increases in diameter there appears to be a slight approach toward equality, with double the strength of a bar. Thus a three inch ring made of three-quarter inch iron broke at 19.1-2 tons, a four inch ring at 19.9 tons and a six inch ring at 20 tons, the strength of a bar of the same metal being 10.1-2 tons.

**How to Get More Milk.**

Make your cows comfortable by spraying them with Red Cross "Flyoil." Its equally good for horses and is guaranteed to do the work perfectly. Sold in Napanee only at Wallace's Drug Store. \$8.100 a can or 75c a gallon when you bring your own can.

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Cresolene tablets, ten cents per box. All druggists.

Denison the petition was referred to the Fire Water and Light Committee to report.

The Finance Committee asked for further time to report in reference to cement walk in front of Merchants' Bank property. Also in the matter of the refund asked for by N. Fellows on account of East street sewer. The committee's interpretation of the petition for the construction of said East street sewer was that ratepayers were only to pay one-third of the cost of construction, and thereupon recommended that the refund be granted, and that the treasurer make necessary correction, pay back all other overpaid portion, and collect balance due. Report adopted.

The Street Committee reported as follows: 1—Notices from Gas Co., and D. H. Preston re damage to property caused by building west street sewer—contractor is responsible; 2—M. S. Madole and Geo Cliffe for removal of poles. Clerk notify Miss Shirley to have same removed; 3—Petition of C. Denison and others for cement walk—recommend it be built; 4—Petition of W. Vanalstine and others for cement walk—recommend no action on account of height of walk asked for; 5—Would recommend the payment of 80 per cent of M. S. Madole's account for the tile used in west street sewer.

Report adopted.

A by-law for striking the rate for the year 1908 was passed. The rate was fixed at 27 mills on the dollar, 8 mills for school purposes and 19 mills for general purposes. The estimated expenditure is as follows:

Debentures.....	\$ 1371 61
Interest on Debentures.....	5740 74
County rate 1907-1908.....	6100 00
Collegiate Institute.....	4140 00

	\$41,830 69

The rates of 19 mills for general purposes is only for the remaining five months of 1908, while the rate of 8 mills is practically for a whole year.

A by-law was passed increasing the town clerk's salary from \$300 per annum to \$450 per annum.

S. G. Hawley addressed the council in reference to the unsanitary condition of the drain on the east side of West street, from Dundas street south to the Reindeer dock. The drain is a shallow one, covered with flat stones and a couple of inches of earth over it, and as there are several closets emptying into it the stench which comes from it is almost unbearable at times. No definite action was taken towards remedying the evil, but Mr. Hawley was given to understand that the residents along that street should petition the council for a sewer, the ratepayers on each side of the street agreeing to pay one third of the cost

Committee. Carried.

On motion of Councillors Kimmerly and Simpson, the petition of W. Vanalstine and others for a cement walk was referred to the Street Committee to ascertain the cost of laying same, and report.

The matter of an increase in salary for the Chief of Police was referred to the Police Committee to report at next session.

The following accounts were ordered paid:

Electric Light Co.....	\$ 106 33
G. Storms.....	5 00
Wm. Spinks.....	95
Boyle & Son.....	6 19
Boyle & Son.....	5 45
J. Rodgers.....	4 50
Ira Jaynes.....	5 00

An account of Carscallen Bros., \$15.00, was referred to the Poor and Sanitary Committee to report.

Council adjourned.

# THE EXPRESS.

ANADA—FRIDAY, AUGUST 7th, 1908

## NEWS NOTES.

The tug Rescue, built in the Rath-  
bun yards ten years ago, has been sold  
to Capt. J. R. McLean, of Sault Ste.  
Marie for \$1000.

It will soon be five years since Co-  
balt was discovered, and this year it is  
expected the output will be worth  
eight million dollars, which is not bad  
for an infant industry.

Hefferon, the South African runner,  
who finished third in the Marathon,  
but was awarded second place, has  
come out with the statement that he  
can beat Longboat, the Canadian, at  
any distance from fifty yards to twenty-  
five miles.

A daring theft took place at the  
Dominion House, Belleville Tuesday.  
While Miss J. Higgins was at dinner  
someone unlocked her room door and  
became the possessor of a valuable  
pearl watch, two rings and her purse  
containing some twenty dollars.

Harold Newton and Willie Marlow,  
young men of Belleville, have been ar-  
rested at Niagara Falls and confessed  
to breaking into Haines Shoe Store  
Thursday of last week and stealing  
money. They are of respectable fami-  
lies and will be brought back for trial.

Herbert White, Sillsville, has been  
appointed deputy game and fisheries  
warden for the Hay Bay district by  
the Ontario Government. In the super-  
intendent of Fisheries's letter it is said  
the appointment has been made with  
a view to putting a stop to the illegal  
fishing and shooting that have been  
taking place around there.

A sad accident occurred at Brock-  
ville on Tuesday morning when Carl  
Lee, a young man, 18 years of age,  
died as a result of a fatal mistake made  
by a trained nurse. He had been ill,  
threatened with typhoid. Tuesday  
morning at 10 o'clock the nurse in giv-  
ing him medicine by mistake adminis-  
tered carbolic acid. He died in three  
minutes.

The post office department reports  
that the sale of the special issue of  
stamps in commemoration of the Que-  
bec ter-centenary has reached a total  
of twenty nine millions, aggregating  
\$580,000. There has been a big demand  
for the stamps from collectors all over  
the world. The issue of the various  
denominations will be exhausted in a  
few days and no more will be printed.

Some people occasionally wonder  
why certain notices of births, marriage,  
or deaths are not found in the paper.  
Simply because they are not sent in.  
Newspapers are expected to  
pick up all the news they can, but it is  
hardly to be supposed that reporters  
will invade or hunt around people's  
private houses or sleeping apartments  
for such items. It would not be good  
manners.

The award in connection with the  
Kingston city building's fire has been  
made known. The city will receive  
\$13,680. The award is given by J. W.  
Power for the city and William New-  
lands for the underwriters. The total  
damage done to the building and ef-  
fects was \$11,480, but as the clock and  
bell are insured for \$800 less than the  
\$1,800 damage, the former amount is  
deducted from the total amount of  
damage.

The stationery printed in this office  
is giving the best satisfaction. Last  
week we printed one thousand stat-  
ements for a man, and by then and he

Pure Extract of Vanilla (made from  
the bean). The kind that has the  
right flavor, at the Medical Hall  
Fred L. Hooper.

**BELL ROCK**

We have had fine weather for hay-  
ing and the grain crops are ripening  
up fast: the farmers are as busy as  
bees in clover.

We have more than our usual num-  
ber of summer visitors this season.

R. L. Brooks and family, Buffalo,  
N. Y., spent last week with his mother  
at his old home here.

Neil Yorke and his sister, Miss  
Maggie, spent Sunday the guests of  
Miss Gertie Beatty, Piccadilly.

Mrs. Graham and Mrs. Lockwood,  
Buffalo, N. Y., were calling on friends  
here on Sunday.

Visitors: Mr. and Mrs. C. Bachman  
and son, Charles, of Philadelphia, at  
G. M. Sanborn's; Mr. and Mrs. J. Con-  
nor, Buffalo, N. Y., at Mrs. Martin's;  
Miss Sadie and Miss Cicely Kennedy,  
Newburgh, at J. Timmons'; Mr. Fitz-  
patrick and son, Donald, and F. L.  
Amey, Selby, at D. L. Amey's.

Quarterly service was held in the  
Methodist church here last Sunday by  
the Rev. Mr. Pearce, Kingston.

**LAPUM.**

William Brown, who has been in  
Kingston general hospital for five  
weeks, with typhoid fever, came home  
on Friday.

Albert Lucas died Friday. The  
funeral was held at his residence Sun-  
day morning at ten o'clock.

B. Rose and Master Clifford Huff are  
on the sick list.

Clarence Lapum is spending the  
holidays under the parental roof.

Mr. and Mrs. William Lapum gave a  
six o'clock dinner to a few intimate  
friends on Wednesday.

Miss Nellie Clyde and Miss Leita  
Simkins are spending a few days in  
this vicinity.

Mrs. William Love is spending a  
few days with Mrs. Michael Love,

\$1 per Year in advance: \$1.50 if not so paid.

## NEW LUMBER YARD

cellent well, good garden, situated in Chatham  
township on the West and desirable to rent. Apply  
to M. C. HOGART, Agent.

**VOTERS' LIST, 1908**  
Municipality of Denbigh, Abinger  
and Ashby, County of Lennox and  
Addington.

Notice is hereby given that I have trans-  
mitted or delivered to the persons enu-  
merated in section eight of the Ontario  
Voters' List Act the copies required by  
said section to be so transmitted or deliv-  
ered of the List, made pursuant to said Act  
of all persons appearing by the last revised  
assessment roll of the said municipality to  
be entitled to vote in the said municipality  
at elections for members of the Legislative  
Assembly, and at Municipal elections, and  
that the said list was first posted up in my  
office at Denbigh on the 7th day of August,  
1908, and remains there for inspection.  
Electors are called upon to examine the  
said list and if any omissions or any other  
errors are found therein to take immediate  
proceeding to have the said errors corrected  
according to law.

PAUL STEIN,  
Clerk of the Township.  
Dated 1st August, 1908.

## DOXSEE & CO. SPECIAL SALE OF SUMMER GOODS

We quite a few items to give an idea  
what can be bought for little money.

**WHITE BLOUSES**—Your choice in the  
window for \$1.00 each.

**BLACK SATEN AND MOIRE IN-  
DERSKIRTS**—Special price to  
clear.

**BLACK AND WHITE SILK GLOVES**—  
In these also we are clearing out the  
stock at surprising figures. See  
them.

**LADIES' SILK WAISTS**—At any price  
to clear them out. Take notice room for  
the new ones.

## The Leading Millinery House.

**D. R. BENSON**  
Graduate of Ontario Veterinary College,  
has opened a first class second door south of  
Express Printing Office where he may be  
consulted on all diseases of Domestic  
Animals. Also latest veterinary medicines.  
Residence: West Street, near  
Madden's grocery.

## FOR SALE. Silver Hull Buckwheat

Price 50¢ per bushel.  
Free from foul seeds.  
Elios CHALMERS Dorland P. O.  
25¢ p.

**WANTED.**  
500 Ladies' Skirts

\$1,800 damage the former amount is deducted from the total amount of damage.

The stationery printed in this office is giving the best satisfaction. Last week we printed one thousand statements for a man, and by their aid he collected a small fortune. Two months ago a man bought of us some note-paper and envelopes to use when writing to his sweetheart, and now he is married. Another young man forged a name on a cheque printed at this office and is in the penitentiary. Another young man stole some of our paper to make cigarettes with, he is lead. A young lady bought some of our paper to curl hair on, and now she has a beau. (We only have a few packages of this kind in stock.) By using our stationery a person can collect old accounts, tell fortunes, make a change the color of the hair, have his teeth extracted without pain, and find out the name of the future husband or wife, be successful in business, triumph over enemies, be elected to office. Give us a call.

Regned Gasoline for stoves and engines at the right price. The Medical Hall—Fred L. Hooper.

**NAPANEE CHEESE BOARD.**

7357 white and 430 colored cheese were offered for sale at the meeting on Friday July 31st. All cheese sold at 12 1-10c. The following factories boarded:

	White	Colored
6 Moscow	105	
7 Empey	40	
8 Bell Rock	75	
9 Phippen No 1	75	
10 Phippen No 2	50	
11 Phippen No 3	80	
13 Forest Mills	110	
14 Union	80	
15 Odessa	150	30
16 Selby	140	
23 Newburgh	95	
25 Deseronto	100	
26 Marlbank	65	

**A Word About Corns.**

Don't suffer a minute with corns—go straight to Wallace's Red Cross Drug Store and get some of that corn killer, it don't cost much.

**TAMWORTH.**

C. G. Coxall and wife left on Monday last for Manitoba, to visit their daughter, Mrs. Wesley Shire.

Mrs. D. B. Floyd and two children, in company with her brother, A. D. Simmonds, left on Monday to visit her home in Chester, P. A.

C. A. Jones and wife, of Toronto Junction, visited Miss Maggie Jones last week.

Milton Hughes has put in a cracker for cracking grain of all kinds.

Miss Maggie Jones has gone to Toronto to visit friends.

The leap year party held in the town hall last Friday night, was a grand success.

Miss Maggie Stinson and Mr. Rutledge. Grand View Manitoba, were married on Tuesday last at the home of the bride. The happy couple left on the evening train for their home in Grand View, Man. While at the depot they received the congratulations of many friends along with showers of rice and old boots.

**A KIDNEY SPECIALIST.**

South American Kidney Cure is compounded to cure Kidney diseases, and nothing else—it relieves in six hours.

South American Kidney Cure touches the weak spot firmly, but gently; gives the best results in the shortest time; cleanses the kidneys which in return cleanse and purify the blood, for blood can become impure only by passing through weak and ailing kidneys. Let us live up to the light of the 20th century. Employ the means, and enjoy robust and vigorous health.

Sold by T. B. Wallace

six o'clock dinner to a few intimate friends on Wednesday.

Miss Nellie Clyde and Miss Leita Simpkins are spending a few days in this vicinity.

Mrs. William Love is spending a few days with Mrs. Michael Love, Camden East

Willard Huff has returned from visiting friends in Watertown.

Mrs. J. A. Bell, of Wilkie, Saskatchewan, has gone to visit Mr. and Mrs. W. C. Snider, Maple avenue, after spending the past two weeks here with her uncle and aunt, Mr. and Mrs. E. Rose.

Mrs. B. Rose and Mrs. J. A. Bell were guests of Mrs. J. E. Boulter.

**YARKER.**

The lawn social held on George Lacey's lawn was well attended and everything went off fine.

William Silver and Alma Locke were married at Woodnuckat. Both are residents of this place.

Yarker baseball team won the silver cup from Napanee, at the employees' excursion, Tweed.

Farmers will commence harvesting grain next week.

Quarterly services were held in Moscow Methodist church last Sunday.

The wife of James Carr, Petworth, had the misfortune to fall on a cement step at her home, and broke one of the small bones near the ankle.

Albert Lucas, a recent resident of Yarker, died last Friday.

The Methodist church here will be shingled with galvanized iron shingles.

Visitors; Mrs. (Dr.) Lockhart and daughter, Marjorie, and Miss Pearl McLean, of Harrowsmith, at John McLean's; Hazel Asselstine, Verona, at George Lucas'; M. Cambridge, Napanee, at his mother's; Edgar Cummings, Gananoque, at Walter Cummings'; Violet Merrill, Cobourg, at J. Wright's; Mrs. John Lockwood, Buffalo, and Mrs. M. A. Graham, Buffalo, at Mrs. Breaux's; Earl Cummings is home from Gananoque.

The township crusher has been retired for this year.

The running fever has struck Yarker, and our boys take for their run to Colebrook and return, starting and running the east side of the river, and returning on the west side.

Mrs. Ira Saulsbury has gone to Gretna, Ont.

Mrs. S. Winter is in Watertown, N. Y.

R. Clark, section foreman on B. of Q. Railway, here, has moved to Napanee, to fill the position of J. Lloyd, who recently moved to Oshawa.

Gladys Snider, fishing in Fourth Lake, brought home a pike weighing eighteen pounds. In one and a half hour's fishing they secured fourteen. Fourth Lake is twenty miles from Yarker.

William Matyer, Bridgewater, will be foreman of the B. of Q. railway here.

James Warner is having his residence painted white.

Mrs. Andrew Hill is having the residence owned by her, now occupied by R. Woodhouse, newly painted and put in good shape.

Miss O'Hara Camden East, has been engaged for Yarker school, as teacher.

Itch, Mange, Prairie Scratches, Barber's Itch, and every form of contagious Itch on human or animal cured in 30 minutes by Wolford's Sanitary Lotion. It never fails. Sold by—T. B. Wallace

A tremendous storm swept over Tottenham Tuesday. The hailstones were piled up on the streets a foot high in some places, buildings were moved and unroofed, and crops cut down and entirely destroyed.

**Lax-ets 5 C Sweet to Eat**  
A Candy Spiced Laxative

errors are found therein to take immediate proceeding to have the said errors corrected according to law.

PAUL STEIN,  
Clerk of the Township.

Dated 3rd August, 1908.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received at this office until 4.30 P.M. on Monday, August 24, 1908, for the supply of coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained on application at this office.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order  
R. C. DESROCHERS,  
Asst. Secretary.

Department of Public Works,  
Ottawa, July 15, 1908.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Parry Sound, Aug. 2.—Edward Walker of Shannonsville, Ont., a cook on the tug Vahnapiata, was drowned at French River on Thursday night. He had dropped off the vessel, which was lying at the dock. He was unable to swim, and was alone at the time. The body was recovered the following day. Walker was unmarried and 29 years of age.

**OPPORTUNITY.**

**KINGSTON BUSINESS COLLEGE Limited.**

KINGSTON, CANADA,  
25th Year.

Canada's Leading Business School. Practical, Progressive, Permanent. Book-keeping, Shorthand, Typewriting, Telegraphy, Civil Service.

Special rates to the first twenty-five registering before Sept. 1st. Write or call for particulars.

**H. F. METCALFE, J. E. CUNNINGHAM,**  
President. Secretary.

**THE NORTHERN CROWN BANK**  
HEAD OFFICE, WINNIPEG.

Yarker Branch, **E. R. CHECKLEY, Mgr.**

# HOW SHALL I ARRANGE MY

*Pinning the "Rat."*

## Advice to Correspondents

### Hair Stain

B. B.—To give the hair a brownish tint use the following recipe: Green walnut shells, nine ounces; alum, half ounce; pure oil, four ounces.

Heat together in a water bath until the water has been completely evaporated. Then express, filter and perfume.

### Excessive Perspiration

ANXIOUS—You will find this recipe for powder just as beneficial as a liquid preparation: Phenic acid, three fluid drams; alcohol, five and a half fluid drams; starch, six and a quarter ounces; florentine orris, five and a half ounces; essence of violet, thirty-two minims.

Dissolve the acid in the alcohol; add the violet essence, then the starch and orris root. This powder can be used to advantage on perspiring hands, and it is an agreeable glove powder.

### To Reduce the Flesh

READER—To overcome obesity you must keep the mind engaged and the body well exercised. Do not yield to laziness, and do not eat quantities of things you are particularly fond of, especially if they are sweet. Control your appetite as much as possible.

I would not advise you to take internal medicine to reduce your weight. If you obey the above rules the result will be as satisfactory as you could desire.

### Superfluous Hair

*The Puff at the Back.*

has been liked by all who have used it. Add the lotion to the water when bathing: Rectified spirits of wine, two ounces; spirits of ammonia, two drams; oil of lavender, one-half dram. Mix liquids together. Bottle and shake.

### For Moist Hands

R. Y. S.—A remedy for moist hands is to rub them several times a day with the following mixture: Tincture belladonna, one-half ounce; cologne water, three ounces. Mix. Use the liquid whenever you choose during the day, and always after first washing the hands in hot water and drying them thoroughly and quickly. Rub the lotion well into the skin.

Keep the mixture out of the way of ignorant persons and children.

### Enlarged Pores

RAT—It will take quite a time to cure enlarged pores. The first thing to do is to use a face brush, water and good soap. The use of these will

keep the pores free from becoming clogged and in time they will contract.

One often considers that some startling style is suddenly launched, but, in reality, it is the result of a tendency, or it is the final acceptance of a fashion which has been, perhaps, offered more than once without results.

Even in the case of the "sheath gown, which startled even Paris," there really was no reason why Paris should have been startled; the Directoire is but the evolution of the Empire and the Empire of the classic Greek, and the Empire and the Greek have been with us for a year or more.

In like manner the hat has been undergoing a change—not suddenly, but little by little.

It was not so long ago that brims

were close and short at the back; the short-back sailor is within remembrance. Then a year ago the brim widened at the back and narrowed at the front, and it was a sore temptation to turn our former season's chapeaux hind-side-before.

For the wide front hat the hair was pompadoured, and as the brim changed the hair had to keep pace. When the hat presented the "wrong-side front" appearance, the hair became slightly pompadoured in the back, but there was the barrette with its tulle—brown tulle to match the hair—to fill in interstices.

This season the short front, long back and—what is more—drooping back have become accentuated, and so of necessity we "rat" our back hair and pin our puffs low. The rat has really slipped around to the back, leaving the front hair quite soft.

It has become fashionable to part the hair, and the center parting is so typically classic that, when it becomes the woman, it is the most charming mode in which to comb her tresses. But it does not suit the contour of every woman's head, in which case a side parting may be made. This is often startlingly becoming. In either case the hair is flat in front, being puffed out at the sides. The rat starts at the sides and is pinned across the back; then the waved hair is gathered in and coiled or puffed quite low.

A hair dresser will tell you that a

*Simply Parted.*

keep the pores free from becoming clogged and in time they will contract. Shampoo your hair with the mixture for which I give you recipe: To one-half cake of pure white castile soap add one pint of hot rainwater. Set

on the stove and heat until the soap is perfectly dissolved. To this add an egg which has been thoroughly whipped with an egg beater, stirring it into the mixture with the beater to prevent curdling. Add one-third tea-

I would not advise you to take internal medicine to reduce your weight. If you obey the above rules the result will be as satisfactory as you could desire.

### Superfluous Hair

**A READER**—The following recipe makes an excellent depilatory: Sulphide of soda, 100 grains; caustic, 200 grains. Mix thoroughly and keep dry in well-corked bottle until wanted for use. Take enough to make a paste, and add warm water to it until the proper consistency is secured. Spread over the hairy surface and allow to remain for from one to five minutes, according to the nature of the growth and the susceptibility of the skin, then scrape off with a blunt knife or paper knife, for example. It should be removed, as in every case with a depilatory, when the burning sensation is produced. The long cuticles, with the hair, should be avoided, and immediately after the hair has been removed the depilatory surface should be gently washed with warm water and a soft cloth. A hand oil applied to prevent irritation.

### Green Soap Treatment for Blackheads

**A READER**—The following is the recipe you desire. Take one ounce of soap, two ounces, distilled water, and add two ounces. Let the mixture stand for a few moments, then wash off with hot water.

If the green soap enters the skin, as it sometimes will, use it every other day. Apply a cold cream.

Green soap may be purchased at any drug store. It is not a summer or winter soap, but it is of all seasons and of all climates.

### Lotion of 1/2 for Fleas

**RAY**—The following is the recipe

**DR. TALL, S. C.**  
The following is the recipe for the

The following is the recipe for the

## WHAT RELIGION MEANS

Morality, Because "It Pays" Is Immorality  
It Is Refined, Civilized Selfishness.

"By their fruits ye shall know them."—Matt. vii, 16.

Fruit bearing is a vital process. We are learning to-day to express religion in terms of life, to measure it not by its power to repress but its power to develop and express the best in man.

The test of any creed is not the antiquity of its authorities, but the vitality of its ideals, its power over the hearts and lives of men to make a new heaven and a new earth wherein dwells righteousness.

This is the reason the old creeds pass away, because each new day sees a higher vision, catches larger glimpses of what man must be. Religion becomes democratic, it is the voice of the people crying out for the highest good. The spiritual in this world is the soul of humanity seeking after truth and fullness of life.

In our day religion passes from philosophy to practice. Once when religion was regarded as a package

### Enlarged Pores

**RAY**—It will take quite a time to cure enlarged pores. The first thing to do is to use a face brush, water and good soap. The use of these will

on the stove and heat until the soap is perfectly dissolved. To this add an egg which has been thoroughly whipped with an egg beater, stirring it into the mixture with the beater to prevent curdling. Add one-third tea-

## PRACTICAL STYLE

Such on the Sandal Order. The Buckled

**A**CCESORIES to the bathing costume are very important factors in the comfort of the summer vacation, and not a detail should be overlooked, even the shoes. In this country the custom of wearing bathing shoes is growing rapidly, till now they are no longer the exception.

The ideal shoes make the feet look small, and in some degree give the effect of an instep, though the latter is a difficult feat when the shoes are heelless.

Another requirement is that bathing shoes shall be easily put on and quickly

taken off, even though they be wet.

Buckles have, therefore, in a measure, taken the place of laces, though one pair of bathing shoes shows that canvas oxfords, with cork or rubber soles, are in no way neglected.

It sometimes happens, however, that laces become untied in the water, and the shoes float away—an impossible contingency if five straps hold the shoes on. Really, these tall affairs are becoming more and more convenient. Of course, they, like all the rest, are of white canvas.

Shoes with sandal effect are cut with a center strap, which meets the ankle strap over the instep. These, to some

choir; it means bringing to prevail in human relations, in society, every principle, ideal, and hope that we cherish religiously; it means helping men to the perfections we may dream of their deity, possessing, causing our dull earth to bloom with the glory of a long ago Eden and making the streets of our city to ring with the songs of children and shine with the glory of the new Jerusalem.

Religion is becoming intensely practical, it means brooms, bricks, votes, primaries; it means honesty, square dealing; it means plain, clear, simple justice instead of maudlin charity; it means a fair wage instead of robbery condoned or palliated by the sop to Cerberus, the library or the hospital; it means that a man cannot express his religion in singing psalms on Sunday, then pack it away in cotton in the pious pigeonhole late on Sunday evening embalming it for a week so that he may, conscience free, go on his selfish way.

Modern religion will not lift up its voice in pious phrases while it grinds down the face of the poor, pays to shopgirls a wage that forces them to vice and to men such a pitance as prohibits their rising even in ambition above dull content with being parts of

### THE MONEY MACHINE.

In simplest terms possible, it means that a man will express his religion through his thorough going morality.

We greatly need to moralize our religion, to make it stand for the working out of right and right relations in every detail of life, for teaching us to live together, for bringing us all to social service and social efficiency.

Not less do we need to spiritualize our morality. We need that men shall be good not because they have been told it pays, not because fashion prescribes certain forms of conduct, not because ancient laws mark out the paths of mortal rectitude, but because high ideals point out these paths with their clear shining, because one seeks goodness for the good of all.

Morality with the spiritual ideal, the morality that somehow compels a man to lose in the great battle, if but the cause he loves may win, the passion that makes us give up our individual rights and likes for the right, the eternal right of all; this is what morality means when it is lightened with religion, with devotion to an ideal.

Then morality becomes simply the expression of religion, religion simply the inspiration of morality; both are seeking truth in life, the true life for all mankind.

HENRY F. COPE.

"Dat boy," said the negro sadly, as he prepared to administer to little Ephraim Rastus his eighth spanking in the last three days, "is a mighty bad boy. He's de white sheep of de family."

"three-quarter" hair arrangement is the present vogue and that the Psyche knot is the thing. In reality the Psyche knot has superseded the "strings" of small puffs which, though in perfect conformity to the dictate of fashion, could never be honestly termed artistic. Three large puffs are frequently arranged to resemble a Psyche knot; this is a fair way to handle puffs.

Many have been the predictions that the wave is going out of fashion. This is a summer cry, for, when "far from the madding crowd" of hair-dressers, how, in the name of expediency, shall my lady secure her "ondulation marcel"?

Many are the contrivances for the home curling of the hair—curling without irons. Ribbons and kids and hairpins and leads are all called into requisition. This would indicate that the curl is still desirable. Then, too, sea breezes wage war against artificial waves, and this is frequently a discouragement against curling efforts. When, however, in autumn we hie us back to town, I do not fancy that the hair-dresser will close her doors because of the passing of the wave.

The small, tight, precise "marcel," arranged in wig-like style, has happily passed and the popular wave is large and loose and soft and akin to nature's endowment—when nature is kind.

spoonful of borax and one teaspoonful of alcohol to preserve the shampoo. When ready to shampoo the hair rub well into the scalp and rinse in several clear waters, using a bath spray if you have one.

### For a Red Nose

ASHAMED—Try the following formula for your trouble. It is excellent if the cause is external only. If, however, it is produced by indigestion, as is often the case, an internal remedy will be needed.

Powdered calamine, one dram; zinc oxide, thirty grains; glycerine, one-half dram; cherry laurel water, four ounces. This lotion should be well shaken before it is mopped on the

nose. It may be used both morning and evening.

Here is a recipe which will make a very good corn cure: Salicylic acid, one dram; collodion, one-half ounce. Paint over the corn once a day, and scrape away the superfluous growth at the end of three or four days.

### To Reduce Hips and Waist Measures

READER—The very best exercise for reducing hips and waist is walking. Be careful not to overdo it at first if you are not accustomed to long walks. Start out by walking one mile and increase gradually till five miles can be covered without the least fatigue. Indoor gymnastics, too, are helpful when one is debarred from open-air exercises.

Deep breathing will help to reduce the waist measure and enlarge the bust. The stretching exercises, too, are splendid as waist depleters: Raise the arms high above the head; then, holding knees straight, try to touch the floor with the finger tips. Stand erect, place hands on hips, bend from waist as far as possible to the right; then to the left.

Hip-circling can be done with good results in the way of decreasing the size if the principle of resistance is employed, taking standing position, hands on hips, bending the knees and keeping the chest and shoulders immovable. Contract all the muscles used in this exercise and resist.

## THE SUNDAY SCHOOL

INTERNATIONAL LESSON,  
AUG. 2.

Lesson VI. David and Goliath.  
Golden Text, Psa. 11. 1.

Verse 38. Read verses 1-39 for an account of Goliath and his challenge, David's visit to the Israelite camp, his proposal to Saul to meet the Philistine champion, and Saul's final consent.

His apparel—Rather, "his armor." Although Saul in verse 39 commends David to Jehovah's help for success, he plans to make it more certain by equipping the youth with his armor. This, while not to be compared in massive weight and size with that of the giant, would make the combat more equal.

Helmet of brass—Or bronze. The helmet was commonly made of hide or leather, one of metal being given special mention.

Coat of mail—Strictly, the main garment which covered the upper part of the body. The term is used though to denote armor in general.

39. Assayed—Tried. The inference is that he was unsuccessful the reason being that he had not tested it. If, as one narrative indicates, he is still a shepherd lad unfamiliar with the equipment of war, it is no wonder that he finds the heavy, strange armor more of a burden than a help; and even if, as Saul's armor-bearer, he has already become accustomed to these things, this outfit is not his own and, therefore, is of little use to him.

40. His staff—He has proved this. The shepherd's invariable weapon and instrument; he used it to lean upon in climbing and as a club for defense. It is possible that in David's case the sling was in some way fastened to this staff.

Chose him—"Selected," out of the brook. Probably the mountain stream which ran down beside the camp of Israel rather than the brook which ran through the center of the valley and separated the two camps.

Wallet—A skin bag slung by two straps over the shoulder made to contain provisions, food, etc. Almost as indispensable to the shepherd as his staff. David put it to the practical use of carrying his ammunition.

His sling—This completed his equipment. It probably consisted of a long thong doubled and held in one hand by both ends. The centre was widened and cup-shaped so as to hold the stone which was hurled by swinging the sling and then suddenly releasing one end. David is well used to all these, and now is ready to join the battle.

41. The man that bare the shield went before—To protect him against any possible treachery. It was one of the duties of the armor-bearer to guard the person of his master.

42. Looked about—A graphic touch. As if the Philistine had to take special pains before he could even see David, so insignificant was he in comparison.

He disdained him—His contempt for David was caused not only by his ill-matched size of body, but by the fact that he was a youth and of a fair countenance; his boyish beauty was an insult to this trained warrior.

A dog—A general term of contempt, but quite fitting here, as the

Pretty Contour.

is often the case, an internal remedy will be needed.

Powdered calamine, one dram; zinc oxide, thirty grains; glycerine, one-half dram; cherry laurel water, four ounces. This lotion should be well shaken before it is mopped on the

Be careful not to overdo it at first if you are not accustomed to long walks. Start out by walking one mile and increase gradually till five miles can be covered without the least fatigue. Indoor gymnastics, too, are helpful when one is debarred from open-air exercises.

played, taking standing position, hands on hips, bending the knees and keeping the chest and shoulders immovable. Contract all the muscles used in this exercise and resist.

### Sultana Cream Make-Up

ANXIOUS—This recipe makes up into a very nice rouge: Sweet almond oil, four ounces; white wax, melted, 20 grains; spermaceti, 20 grains; benzoin (finely powdered), 100 grains; rice powder, 20 grains; pure carmine, fifteen grains. Melt the white wax and spermaceti together in a water bath, with gentle heat, and then add the oil of sweet almonds. Inclose the finely powdered benzoin in a cheesecloth bag and immerse in the foregoing mixture. This should be kept warm for almost twelve hours, when the carmine will be mostly dissolved. Then add the rice powder and beat until firm. It is extremely important that the carmine be very finely powdered before adding.

### Tooth Powder

IRENE—The following is the recipe for an excellent tooth powder which may easily be prepared: Precipitated chalk, four ounces; powderedorris root, eight ounces; powdered camphor, one ounce.

Triturate the camphor in a mortar, moistening it with a very little alcohol. Add other ingredients. Mix thoroughly, and sift through a fine bolting cloth.

butter, one that is not rancid or made from over-ripe cream."

### THE CARE OF GROWING STOCK

At this time of the year, growing fowls require the most careful attention. Many poultry keepers are in the habit of letting the chickens take care of themselves after the first few weeks, but until they are three or four months old, it is essential that every care should be taken. A little neglect may ruin a very promising youngster. The aim of the poultry-keeper should be to keep the chickens steadily growing from the time they leave the shell to maturity, and this can only be accomplished by the strictest attention to every one of the many details on which successful chicken rearing depends. See that the coops are well ventilated, and that they are regularly and thoroughly cleared. Avoid overcrowding at any cost, as more cases of retarded growth and actual loss can be traced to this cause than to any other.

It is a mistake to feed growing fowls solely on "dry" chick feed; much better results can be obtained by giving soft and "dry" food alternately. Vegetable food is essential, and chickens cannot be reared to the best advantage unless they have a grass run. Where, however, it is impossible for a grass run to be provided, vegetables must be given; but care must be taken that they are perfectly fresh, and renewed daily. If decayed vegetables are left about in the run, they will do much more harm than good. A great mistake, which many poultry-keepers make, is to keep their chickens in too close confinement. If strong, big birds are desired, it is essential that the chickens, after the first week or so, should be given a free range or an extensive grass run. Exercise is the finest thing in the world for growing fowls, and the birds that take the most exercise make the biggest and most vigorous adults.

"One fault I find with much of the creamery butter, as well as the farmer's butter, is that the cream is allowed to get too old. Our farmers

the fact that he was a youth and of a fair countenance; his boyish beauty was an insult to this trained warrior.

A dog—A general term of contempt, but quite fitting here, as the staff David carried had undoubtedly been often used to chastise his shepherd dogs when disobedient.

43. Cursed David by his gods—He used the names of his patron gods in imprecation but did not gain thereby in the combat.

44-47. Notice the utter lack of all boasting on David's part. All sorts of cries and noises were used by armies to terrify their enemies, and in single encounter it was customary to recite one's own brave deeds and to hurl taunts at the opponent with the same purpose. Instead of following the example of his enemy David with solemn confidence announces Jehovah's victory. Cheyne, as quoted in the New Century Bible, First Samuel, page 128, says: "Nowhere else outside of the New Testament does the message of encouragement to the humble and exhortation to the weak in faith receive so affecting, so inspiring an expression."

45. Jehovah of hosts—The loftiest of all the titles given Jehovah in the Old Testament. Here it evidently has its early significance of the God of the armies of Israel, but it came later to include the thought of Jehovah as ruler of all the heavenly hosts as well (Isa. 6, 3).

Whom thou hast defied—An insult to Israel was a defiance of Jehovah.

47. The battle is Jehovah's — As opposed to the sword and spear and javelin of his enemy (compare Psa. 44, 6-8).

48. Ran toward the army — His eagerness was not lessened by the fact that he was crossing over to disadvantageous ground.

49. Forehead—Perhaps the "temple" as the front of the forehead should have been protected by the helmet which he wore.

Fell upon his face—Stunned by the impact of the stone. David rushes up to him and slays him with his own sword.

### CANINE SUPERINTENDENT.

On Allan Line Docks at Liverpool, "Jack" Starts Day's Work.

A retriever known as Jack has taken upon himself the duties of canine superintendent of the Allan Line at The Canada dock, Liverpool. As soon as one of the company's steamers arrives he is the first up the plank, making tracks for the galley, where the cook awaits him with a bone.

At 7 o'clock every morning he ushers the dock laborers to their work, barking at the head of the procession. He accompanies them out to dinner, and leads them in again for the afternoon. Jack at 1 o'clock then may go a mile away to board an Allan steamer in the graving dock, but he never makes the mistake of going on a wrong vessel.

Sunday is Jack's visiting day. How he found out various Allan officials' homes in Everton or Walton, miles away, nobody knows, but he barks at the doors regularly and is taken in to dinner at one house and to tea at another. At 11 o'clock at night he returns to the dock, where he barks until the watchman opens the gate for him.

# ES of BATHING SHOES

Strap Is Secure: Oxford Ties of White Canvas.

extent, give the appearance of an inset by sharply outlining the little there is in evidence.

Shoes with a single strap are very pretty and very practical, for they dry readily and are easy to fasten in place.

Sometimes bathing shoes have soles made of coiled rope, and they are remarkably satisfactory, for they hold the shape and the shells cannot cut the rope as they cut rubber and cork.

The bathing suit is a very good design; the sleeves are cut straight around, tucked and sewed into the armholes under a deep plait, which extends over the shoulder line. The pretty V-

shape neck is bound with a stitched band of taffeta. The skirt has four tucks across the front, which extend only half way to the knee line.

Stockings for bathing should be of good quality, and when shoes are worn it is quite possible and worth while to wear silk ones. Of course, without shoes cheap stockings must answer, for the sand at once would make holes in fine ones.

Silk stockings and bathing caps complete the perfect bathing costume, and nowadays good thought is spent upon the accessories to make them altogether desirable.

## ON THE FARM

### ON WHAT DOES BUTTER QUALITY DEPEND.

Prof. Van. Norman in the last report of the Farmer's Normal Institute for Pennsylvania has something to say as to what the quality of butter depends on, that is worth considering by Canadian butter makers. Referring to the faults in the butter of his State, he says there is an unnecessary amount of manure gets into the milk due to lack of cleanliness in the stables. If cows are kept clean the butter will be just as acceptable to the trade and will fare better at the National Dairy Shows. To quote: "The trouble is that we lack the uniformity which comes from comparing our own make with others. When I sit down in my little room and make butter, and see no better except what I make myself, I have no means of judging wherein I fail or excel. My judgment is one-sided. That is the trouble with most of our butter-makers."

"What I want in a judge is a man who is brought into contact with different kinds of butter regularly. He needs the variety and practice to keep his judgment accurate.

hold their cream at home for one or two days before they deliver it to the creamery, and the butter made from it has an old flavor, as the butter-maker calls it, and it is a flavor we do not want. The cream can be kept two days and kept in good condition if kept quite cold, but it is not wise to do this, as a rule. The same thing holds true on the farm, where only a limited amount of butter is made, and it takes two, three, four or even five days to collect enough cream for a churning. The facilities for holding that cream and keeping it in good condition, are not as favorable as we should have them. Therefore the cream is not kept cold, and is subjected to the odors of the cellar and of the cooking, of the washing, and of that boiled cabbage dinner that we sometimes have, and the result is unfortunate in the butter.

"The first principle in our butter-making is to have a clean, raw product and control the changes during the ripening of the cream so as to get the desired results. The market has changed in the last few years, and to-day it wants a milder-flavored butter than formerly. When we say "milder," we mean one in which fermentation during ripening of the cream has not gone so far. First, the cream becomes slightly sour, then it becomes ripe, then over-ripe. The difference is in the degree of fermentation, and the market to-day wants a mild-flavored

## FORT CHURCHILL HARBOR

### THE PLACE THAT WILL BE THE RAILWAY TERMINAL.

#### Remains of Historic Structure — Harbor Facilities—Agricultural Prospects.

There is no little interest just now in the port of Fort Churchill, on Hudson Bay, which is to be the terminus of the Hudson Bay Railway. A recent blue book, containing the report of Mr. W. Thibaudeau, C.E., who surveyed the port for the Dominion Government, gives some interesting facts.

#### THE HARBOR.

From this report, it appears that the harbor is a magnificent one. Mr. Thibaudeau makes the important statement that there would be no difficulty in keeping it open the year round with the aid of ice-breakers. The entrance to the harbor is about 2,000 feet wide, with a minimum depth of water of ten fathoms. Vessels drawing thirty-six feet of water could enter the harbor and anchor within 200 yards of the west shore to a point 250 feet south of Fort Prince of Wales. The bay outside the harbor also affords good anchorage; there is ample depth of water.

Mr. Thibaudeau goes on to say that a vessel drawing twenty-four feet of water can come within 150 yards south of Battery Beacon. There is also good anchorage south of the point alluded to 150 yards south of Battery Beacon for 2,000 feet in length by 800 feet in width for vessels drawing twenty-four feet of water. Opposite Battery Beacon for a distance of 2,500 feet across the harbor there is a minimum depth of twenty-four feet of water.

#### AN ANCIENT FORT.

Fort Churchill is probably the oldest place west of the Great Lakes. It was in 1688 the then newly-organized Hudson's Bay Company founded a post at this magnificent harbor. In 1721 the post was rebuilt. On the west side of the entrance to the harbor is Fort Prince of Wales, a substantial old fortress, which was commenced in 1733 and not completed until thirteen years later. It is no toy fortress, either. The length of each side is 312 feet, three of the sides being of dressed and dimension stone inside and out. The walls are 34 feet thick, and 16 feet high. In the stormy days of the eighteenth century it was mounted with a battery of forty cannon. During the exciting days of the final conflict between the French and the English the fort was captured and partially destroyed by the French Admiral La Perouse in 1782.

Churchill consists of two peninsulas, one on the west being about ten miles by three miles wide at the southern end, and on the east side, about five miles by two miles wide at the southern end. The western peninsula on its western side, has two ridges, each from 90 to 125 feet in height; the northern one extending  $3\frac{1}{2}$  miles southerly from Fort Prince of Wales, and the southerly one commencing at a point  $4\frac{1}{2}$  miles south of Fort Prince of Wales, and extending southerly a distance of 11 miles.

These ridges consist of (felspathic-quartzite) sandstone of a green grey

## OLD-TIME SAIL DRILL.

### Dangerous Exercises on the Fighting Ships of Long Ago.

One of the dangers and one of the hardest tasks of the man-of-war's man vanished out of his life when, with the supplanting of the frigate by the steam cruiser, the old-time sail-drill became a thing of the past. Fleets, in the old days, were continually exercised in making and shortening sail, shifting spars, and all similar manoeuvres aloft, says Capt. J. W. Gambier of the British navy in his "Links in My Life." As the greatest rivalry existed among the crews as to which ship should carry out on evolution first, accidents were frequent. Hardly a drill day passed without men being seriously injured.

Once, during a drill in Kiel harbor, where the rivalry in the fleet was increased by the eagerness of foreign ships to compete with the English, an unfortunate French midshipman went head first from the mizzen cross-trees of the French flag-ship to the deck.

That numbers of accidents should take place in sail-drill was not astonishing when one remembers that spars measuring perhaps seventy or eighty feet long and weighing two or three tons were whisked about with bewildering speed with nothing but men's hands and brains to guide them; hundreds of men crammed into a space of a few hundred square feet, where nothing but the most marvelous organization and discipline could avert death on deck or aloft.

To the landsman, who understood nothing of the difficulty involved in rapidly shifting these great masts and yards, or in reeling and furling thousands of square feet of stiff canvas—perhaps wet or half-frozen—the rapidity with which it was done was perhaps the chief wonder.

Ropes, running like lightning through blocks that were instantly too hot from friction to be touched, had to be checked to within a few inches, requiring the utmost coolness and presence of mind; while the officer in command had to superintend what to the uninitiated looked like a tangled mass of cordage, but which was in reality no more in confusion than the threads in a loom.

In an instant this officer might see something going wrong; to delay a single second meant a terrible catastrophe. Every one, aloft and aloft, was relying on his judgment. "Belay!" "Ease away!"

The order came in an instant. The boatswain's mates repeated it in a particular call which this life-and-death necessity soon taught every one to understand; the shrill whistles rising above the din of tramping feet and running ropes, or the thunderous crash of the great sails in the wind. Death had been averted—or not. If not, you looked up and saw some unfortunate man turning head over heels in the air. Your heart stood still. Would he catch hold of something, even if only to break his fall? Or would he come battering on the deck? It was a mere toss-up. If he was killed outright it generally stopped the drill for the day. If he was only seriously injured, the drill went on, for this was part of the lesson that must be learned, that in peace, as in war, one must take his chances.

## UNWELCOME NEIGHBORS.

Traveller's Experience With the Razor-Grinder Beetle.

## KING EDWARD'S ORDERS

### ABOUT THE ROYAL JEWELS, VALUABLE AND RARE.

#### Most Important of All, Which Number Nearly One Hundred, is That of the Garter.

When King Edward is in State attire, as for a drawing-room or a levee, his breast glitters under its burden of "orders," many of which are simply masses of precious stones. The total value of all the decorations belonging to his Majesty is not known, but it must amount to hundreds of thousands of pounds.

The badges of the various orders of chivalry were originally of gold, with the designs executed in enamel. In the case of a monarch who was the head of an order, his badge or star was jewelled. Later, this fashion spread to less important members. Now there are many peers and others who own valuable jewelled orders.

The most important of all King Edward's orders, which number in all nearly one hundred, is, of course, that of the Garter. The badges of this order are

#### A STAR AND A GARTER.

The latter, which is worn on the left leg just below the knee, was formerly made of pale-blue silk, but now velvet of a draker hue is used. On this is inscribed the motto, "Honi soit qui mal y pense"—Evil be to him who evil thinks. The star has eight points, that worn by the King being magnificently jewelled.

The Order of the Thistle also supplies his Majesty with a beautiful ornament. The points of the "glory" or pendant, which hangs from the collar, are close-set with jewels, while the figure of St. Andrew, which appears in the centre, is finely done in enamel.

The Star of the Order of St. Patrick belonging to the King is set with diamonds, in the centre being a cross of rubies, on which is imposed a trefoil of emeralds.

Other British orders are those of the Bath, the Star of India, St. Michael and St. George, and the Indian Empire. The badge of the second of these is an onyx cameo of Queen Victoria, set in an ornamental oval, containing the motto of the Order—"Heaven's Light our Guide"—surmounted by a star

#### COMPOSED OF DIAMONDS.

The Star of the Order of St. Michael and St. George—the "George," as it is called—is seven-rayed, and, in the case of his Majesty's, is a solid mass of diamonds. This "George" was formerly the property of the Duke of Cambridge. It is, therefore, of great family interest, as well as exceedingly valuable.

Amid all these glittering stars and crosses that of the Order of St. John of Jerusalem appears insignificant. It takes the form of a small Maltese cross in white enamel, hung from a black ribbon.

Among foreign orders the ancient Order of the Golden Fleece takes a prominent place, but its jewel pales before that of the Russian Order of St. Andrew. The King's badge of the latter order is exquisitely enamelled, in the centre being the figure of St. Andrew. The rest of the badge, which is of

## A CAUSE OF CRIME.

### Mr. Phligminthroe's View of the Effect of Cold Plates on Mankind.

"I suppose," said Mr. Phligminthroe, "that when everything has been counted up and reduced to the final analysis it will be discovered that the one single, most prolific cause of crime is cold plates."

"I wouldn't be understood as saying that cold plates are a direct incitement to murder, though it is not impossible that might be so; but as an insidious, undermining cause, as an influence tending perhaps indirectly, but still with no less certainty, to the committing of crime I have no doubt you would find cold plates leaving all the rest."

"How often do we hear it said of the fate of nations that it is trembling in the balance, ready to be moved this way or that by the slightest touch? And if this can be true of nations how much more may it be true of individuals, who may be swayed, their fortunes for the time settled, or their whole conduct of life determined by the slightest circumstance?"

"Coming back now to cold plates. You take a man who has worked hard and been hurried all day and who comes home at night tired and worried and whom a square meal would brace up mightily and cause him to take a new view of life and to set his face in the right direction, and you give this man a good dinner with hot plates and don't you see that you head him up right and confirm in him his good impulses? You nail him, so to speak, you start him off right, and you keep him going right; and there's a man saved."

"And now you take that same man and give him his dinner on cold plates; and that may be the last straw that breaks the camel's back, and he may get peevish over it, and not enjoy his after dinner smoke, and get so wrought up that he doesn't sleep well that night and wakes up the next morning and goes to business already tired out and not fit to do anything, so that he loses his temper and is cross and irritable, and misses every play he makes and goes from bad to worse and winds up maybe by killing somebody before the day is over. All this is absolutely attributable to cold plates."

"So of major crimes such as murder and that sort of thing; but when it comes to little things, such as plain sulkiness and kicking over chairs at home, and being cross to the children and making your wife unhappy and causing gloom to settle on the household generally, why, these cold plates have crimes to answer for innumerable."

"Talk oaks from little acorns grow, mill-dams break and spread their devastating waters from leaks that at first you couldn't put your little finger through, and I have no doubt that many disturbing, distressing, harrowing things have been primarily due to so small a thing as cold plates, which indeed, as I have said, I believe to be the one most prolific cause of crime."

"And taking this view, what a responsibility rests upon those whose duty it is to see that the plates are hot! For the good of humanity, if not for our own comfort, well being and happiness, give us hot plates!"

## THE TOMSTONE CUTTER.

Plying Mallet and Chisel He Phil-

Prince of Wales, and the southern one commencing at a point 4½ miles south of Fort Prince of Wales, and extending southerly a distance of 11 miles.

These ridges consist of (felspathic-quartzite) sandstone of a green grey color, well adapted for building purposes. Fort Prince of Wales is built of this stone, and its durability may be gauged by the fact that it has not suffered, although built in 1733.

"On the southerly end of the northerly ridge there is a deposit of white quartzite, similar in formation to Marble Island; this stone takes a fine finish, and is well adapted for ornamental building purposes; an area of about ten acres is exposed.

#### WATER SUPPLY.

"About three miles southerly of Battery Beach, and two-thirds of a mile from the river, are three or four fresh water lakes at an elevation of fifteen feet above the water. The bottoms of these lakes consist of limestone; they cover an area of about one square mile, and would furnish a good water supply.

"Between the lakes and the river a good one exists, for large railway shops and yards. The flats are formed of clay and rocky till.

"Although there is no merchantable timber in the vicinity of Churchill, there is abundance of fine building stone and limestone to be found everywhere, and there is also ample supply of timber for fuel purposes for many years along both banks of the Churchill River and around Button Bay.

#### FISHING AND AGRICULTURE.

"In September, October and part of November large shoals of white whales (I counted thirty-five in one shoal) could be seen going up river at every tide. Salmon trout and whitefish are taken in the river and harbor all the year, but are more abundant in the spring.

"At Churchill potatoes, turnips and other vegetables have been successfully raised at the Hudson Bay fort. For many years cattle and horses have been successfully kept and bred at the Hudson Bay post. Excellent pasture and hay meadows are found on both sides of the river above the harbor for a known distance of thirty-five miles.

"At the head of Button Bay there is an area of 2,000 acres upon which good hay may be cut, which has been pronounced by Professor Macoun as affording excellent forage. Wild black and red currants and gooseberries are found in great quantities, and are the equal, if not the superior, in flavor, of garden produce. Barrels of black currants can be picked around Fort Prince of Wales; cranberries exist in great abundance everywhere. Other berries which are indigenous to the climate abound."

About one-third of the country from Fort Churchill to the Pas, the present terminus of the Canadian Northern Railway, is marsh. The higher lands are covered with spruce and tamarac, suitable only for fuel and pulpwood. No minerals were seen by Thibaudann, but McLaggan, in the district he explored, reports gold, silver, iron and lime stone. Water power is to be found in abundance on all the rivers, and there is unlimited power in the Churchill, only about seventy miles from the fort.

in war, one must take his chances.

#### UNWELCOME NEIGHBORS.

##### Traveller's Experience With the Razor-Grinder Beetle.

There are some creatures with which it is not pleasant to come in close contact, although they be harmless in themselves. This was the experience of Mr. Fred Ober, as he describes it in his "Camp in the Caribees." One night the tents of his party were pitched in a wood near the coast, and a bed of fresh leaves was made up for him. He goes on to say:

Later I was awakened by a rustling among the leaves as of objects crawling over them. I put out my hand and drew it back in terror. It had come in contact with the biggest bug in the world. Its back seemed as hard as iron and its mandibles were as long as my finger. I could hear it burrowing through the leaves and feel it crawling over me, and unable to endure it, I sprang up, and with a cry rushed to the open air. The perspiration rolled off me and my hands twitched nervously.

My native boys lighted a torch and examined the leaves. When they drew out three beetles almost as large as my hand, and I regarded them with terror, they burst into fits of laughter.

"Ah, monsieur very fear; he afraid of razor-grinder."

"What's that you call it?"

"Persons say 'razor-grinder.'"

"Does he grind razors?"

"Ah, no! but he make noise like he make to grind. Hark zat noise!"

Through the forest sounded a sharp whizzing, the like of which is made by the perambulating razor and knife-grinder.

The beetle is provided with two long mandibles above his mouth. With these, as with a thumb and finger, he seizes hold of a small branch of a tree, and with his wings he whirls himself around, slowly at first, but increasing so rapidly that it produces a continuous whirr. He keeps this up until the limb is severed.

My largest specimen of this beetle measures six and a quarter inches. Such beetles are named Hercules, and they bear their title modestly, for they do not presume upon their size and strength to annoy man nor their insect neighbors. They are strict vegetarians, and lead a happy and innocent life on the treetops or on the ground.

#### ARE YOU A SLEEP WORKER?

"Well, I'll sleep on it." How often we use this phrase in connection with some matter which requires much consideration. But it is more than a mere phrase. Often enough sleep has solved a problem after hours of work have failed. A student in a Dutch college worked out, in his sleep, a difficult piece of mathematical work, over which the professor himself had stumbled. What is more, while still asleep, he wrote down the process and the answer. Another mathematician—a Frenchman—during sleep settled a point which had puzzled him for days. When he awoke he remembered the solution, which proved correct. Dante, the Italian poet, is said to have dreamed of the plot and characters of his great work, "The Divine Comedy." The story goes on to say that this phenomenon occurred when Dante was only nine years old.

takes a prominent place, but its jewel pales before that of the Russian Order of St. Andrew. The King's badge of the latter order is exquisitely enamelled, in the centre being the figure of St. Andrew. The rest of the badge, which is of a fair size, is set with large diamonds, worth thousands of pounds, while a double-headed eagle surmounts all.

#### THE CHIEF PORTUGUESE ORDER.

that of Christ, has for its badge a long cross enamelled in red, surcharged with a white cross, and surrounded by fine pearls, making a very graceful ornament. The Black Eagle of Prussia, a most exclusive order, is, so far as the first class is concerned, reserved almost entirely for those of Royal birth.

The badge owned by the King of the leading order of Austria-Hungary is a very valuable jewel, but in point of age, it gives place to the Marianen Cross, which is one of the oldest religious orders.

One very interesting order is that of the Chrysanthemum, of Japan. The badge of this is executed in enamel, and represents one large yellow flower, set among green leaves, and surrounded by four smaller blooms.

Among other countries which have contributed to the King's store of orders are France (which has conferred on his Majesty the Legion of Honor), Denmark, Siam, Turkey, Belgium, Baden, Norway, Sweden, Italy, Greece, and Brazil. —London Answers.

#### WEDDING 10,101 COUPLES.

Costly and magnificent as are the modern marriages of the wealthy and noble, for greatness they fall far short of one which occurred over 2,000 years ago. At this gigantic ceremony 20,202 people were united. When Alexander the Great conquered King Darius, he decided to espouse the defeated monarch's daughter. At the same time, he decreed that one hundred of his chief officers should wed one hundred women from noble Persian families, and ten thousand of his Greek soldiers must take as many Asiatic women as their wives. The ceremony, which took place in a huge pavilion, was very simple. Alexander gave his hand to the princess and kissed her, and all the other bridegrooms did the same to their selected mates. After the actual wedding followed a five-days' festival, which has never since been excelled in grandeur and magnificence.

#### SALT IS A NECESSITY.

"Salt is a most necessary article of food," says a well-known scientist. "All races of mankind, either civilized or in a savage state, have the same regard for salt. In parts of Central Africa the natives regard salt as a luxury, and will willingly do much to obtain it. So much do they like the taste of salt that the ashes of the burnt veldt grass are used to season their meat. These ashes contain saltpetre, which imparts the coveted flavor to food. Animals, too, are fond of salt. In a wild state they will readily go to a spring, the water of which has been salted. Sportsmen know this, and use it as a bait. Salt exists in all parts of the body. So omnipresent is it, that even the tears taste of it—hence the 'salt tears' of the poet."

not for our own comfort, well being and happiness, give us hot plates!"

#### THE TOMBSTONE CUTTER.

##### Plying Mallet and Chisel He Philosophizes on a Familiar Inscription.

"Do you know," said the tombstone cutter as he chipped away at the last letter of the last word of the familiar inscription, "At Rest," that he was carving in the granite, "do you know that when I first began carving these words on tombstones a good many years ago, when I was younger and the world seemed full of hopefulness, it used to sometimes seem to me as if people had 'em put on, as you might say, on general principles, because they seemed nice and appropriate there, while really the deceased might not have had such a terrible hard time in life, and would much rather be not at rest but up and around among folks?"

"That's the way these words used to strike me when I was younger, but now, after considerable experience of life, I look at them differently. Now I realize that they may truly mean what they say, and be not merely an appropriate form; that the one over whose grave they are seen may in truth be glad to lie there under the stone, at last at rest."

"Because, you see—as we are likely to discover when we grow older—this life is not a road strewn with roses for all of us; and besides those who have been worn out in life's struggles or in its simple work we find those who have been disappointed, or misunderstood, or unappreciated, or those who have been broken by some great sorrow."

"So, while in many cases, indeed, that 'At Rest' carved on the tombstone may be but a form, or have been prompted simply by love or affection, and yet, in many cases, placed there most lovingly, it tells a true story, and always, now, from my present point of view, I look at it not lightly, but with a sympathetic heart. Many a gentle soul, never shunning, may be glad to lay down life's burdens."

"But, happily, as to most of us life adjusts its burdens to our aging shoulders and deadens us to mental ills, with increasing years we grow cold, not only in our blood but in our power of apprehension of life's troubles, or it may be that, blessed still with the possession of all our faculties, we are now endowed with a kind philosophy that makes us at once less exacting of others and more considerate, and gives to us a full measure of enjoyment. In short, nature may be very kind to us, keeping us to the very end through years that may seem to us never declining but ever happy and hopeful."

"As, for all my years, and despite my calling, the world seems to me this morning."

#### WORD TO CARELESS GIRL.

The girl who doesn't take care of her clothes is no wife for the poor man; she needs some one who can give her an unlimited dress allowance and a maid to look after her, says a writer. There is another point. If it is too much trouble to take care of her clothes before it will be too much trouble to take care of her housekeeping stores after marriage, with the result that a large part of them are wasted.

## LANDS WHICH DISAPPEAR

### VAST AREAS COVERED BY OCEAN ONCE DRY LAND.

Fortunately the Mightiest Changes Are Very Slowly Brought About.

The recent discovery that a group of little islands some hundreds of miles south of New Zealand were once part of a great continental mass extending in all probability to Antarctica and South America, which finally sank beneath the ocean leaving only these remnants, calls attention to the fact that there are vast areas now covered by the sea which were once dry land. The process of disappearance was very slow. It involved no cataclysm or sudden catastrophe overwhelming all animal and vegetable life, but the work went on century after century till great surfaces were a part of the sea floor.

Events often occur that recall such vicissitudes. Not long after Chile's beautiful port of Valparaiso was destroyed by earthquake on August 16 1906, the news came that the island of Mas a Tierra, on which Alexander Selkirk was cast away for five years, his unhappy fate suggesting to Defoe the story of Robinson Crusoe, had sunk beneath the waves. The story was incorrect, but it called again to mind the facts that are believed to prove that the Juan Fernandez group, to which this island belongs, was formerly

#### A PART OF SOUTH AMERICA.

Land once rose above the wide waste of waters that now separates the islands from the mainland. Among the many proofs of this may be mentioned here only the two varieties of humming birds peculiar to Chile that have been seen on the islands ever since they were first visited.

It is not very uncommon for volcanic islands after they have been thrust above the surface to disappear again. The island Krakatoa was literally blown into the air by a world shaking explosion in August, 1883, and the great wave that resulted, over 100 feet high, swept over the northern coast of Java, drowning 36,000 people.

Falcon Island came into view above the Pacific nearly twenty years ago, sank again in about ten years and once more has come into view. A part of Bogaslov on the Alaskan coast disappeared after a few years and other land has recently risen in the same neighborhood.

Far out in the Pacific in 1904, near the Bonin Islands, a new bit of land rose above the sea and the Japanese raised their flag over it and gave it the name of Nushima to their acquisition. It has slipped from their grasp, however, for the following year it melted away to nine feet above sea level and the last vestige of it has now disappeared.

Ferdinandea, which rose above the Mediterranean in 1831, had a similar history, with the addition of

#### A HUMOROUS ELEMENT.

The whole world talked about it, and all the more because England and the King of the Two Sicilies disputed over its possession.

It came majestically into view on

## CANADA.

### How It Is Viewed From Over The Neighbor's Fence.

(From The Cleveland Leader.)  
The most vitally and widely interesting feature of the celebration at Quebec is not the three centuries of that city's life—a slow and quiet existence for the most part, despite famous thrilling incidents long ago. It is not the historical significance of the story of British and French rivalry and warfare and final union (with some marked limitations) in Canada. It isn't race, and it isn't royalty visiting America in an official capacity. It is Canada.

The Dominion was long a story and a promise—sometimes seeming hardly more than a hope. Now it is a fact—large, virile, expanding, thought-compelling. It is a great empire within a greater, a virtual republic under a monarch's flag, a realm of immense open spaces and unmeasured natural resources, only beginning to find itself as a power in the world of industry and commerce and a factor in the progress of mankind.

Canada is still underrated, scarcely understood. It is always belittled rather than exaggerated by outsiders. Its future is read darkly through the narrow lens of an inadequate past.

The fertile land which is not too far north or too high above the sea to have fairly good climate may constitute a comparatively small part of British America, but it is sufficient for a great population and the creation of great wealth. A thin slice of Canada is bigger than many a famous empire. Add the timber, the minerals, the water power, the fisheries, the waterways and the ports of the Dominion, and it stands out among the newer lands of the earth as richly endowed, vast and of tremendous possibilities.

Every event which centres attention upon Canada turns a searchlight upon crude forces, vast spaces, huge stores of natural wealth—all that makes a young land worth the study of those who concern themselves with the larger movements of human progress. For Canada is essentially young, notwithstanding the three centuries Quebec is celebrating. That city is an ancient gateway to a new empire, a picturesque old fortress guarding a river which drains much untested and unused wilderness.

Make no mistake about Canada. A great nation is growing, faster and faster, across the northern boundary of the United States.

#### WELLINGTON'S ORDERS.

##### Iron Duke Wrote Orders on Asses' Skins, which were Returned.

It has been stated that the Duke of Wellington wrote his orders on horseback. On this point Priscilla, Lady Burghesh, questioned him and received the following explanation:

"He said it was his constant practice in action, and peculiarly latterly, to write down the orders he sent by his aides de camp. Having found that the verbal orders were either incorrectly delivered or not comprehended, he adopted the practice of carrying in his pocket loose sheets of asses' skin of the size of a large card (such as the invitations from court are printed on) and a pencil, and when he had an order to send he wrote it with his pencil on one

## IN THE DEATH VALLEY

### THE WORST PLACE IN THE WHOLE WIDE WORLD.

It Is the Bed of a Vanished Lake, Now a Desert of Sand, Salt, and Alkali.

Only thirty-five miles long, and about eight miles wide; yet nobody can pass through it and retain both life and reason. Such is Death Valley, on the borders of California and Nevada. It is undoubtedly the deadliest place in the whole wide world.

I have looked down upon this valley several times from the mountain heights which enclose it—the Telescope Range on the west, and the Funeral Range on the east. But I was never foolish enough to court certain death, as so many others have done, by searching the valley for the rich deposits of gold and silver it is reputed to contain.

I visited the works of a borax company on the Californian edge of the valley—not actually in the desert itself—and even there the heat was unendurable.

"A man cannot go for an hour without water here," one of the officials told me, "or he becomes a raving maniac. One of our men died from the heat whilst lying down inside his adobe-house on the company's property. Another was actually riding, with a canteen of water in his hand, on top of a load of borax, when he fell over and expired."

#### FOR GREED OF GOLD.

Death Valley itself is the bed of a vanished lake, now a desert of sand, salt, and alkali. There are several streams and pools of water in it, but they are all impregnated with alkali, and therefore poisonous. Glittering fields of salt alternate with miles of white sand, which is drawn in places into high mounds by the whirling hot winds that sweep through the gorge. The surface of the salt earth in places is very brittle, and a few inches beneath it there is a slimy, salt mud, of unmeasured depth, from which rescue is impossible.

There were forty emigrants in the first wagon-train that tried to pass through Death Valley in 1860. Two men got through, and both were insane. Many other bands of emigrants going to California perished, and the place was avoided, until gold was found there, and then party after party of reckless men were lured to death. Over fifty Mexicans succumbed in one batch.

Death Valley has been the scene of some of the worst tragedies of torture in human history. A lieutenant of the United States Army, on an exploring trip with two soldiers, forced his guide at the point of the rifle to take him into the valley on foot. Within two hours one of the soldiers staggered back into the camp of the main body, demented, and hardly able to walk. The others had become insane and wandered away to die.

#### SEARCHING FOR WATER.

A few years ago, a Frenchman, named Isidore Daunet, reached a ranch where I was then staying. He had come through the valley with a party of six. The rest had perished.

## YEAR'S FOOD, \$4,000,000

### SURPRISING FIGURES FROM AN ATLANTIC LINE.

Beer by the Half Million Gallons and Potatoes by the 10,000 Tons.

It must be the gyroscope attachment on the modern transatlantic liner, or else the ball bearings on which they run, which has reduced the proverbial amount of sea-sickness among the passengers. If it shall turn out that they do not have a gyroscope attachment and navigation has nothing to do with ball bearings, readers are respectfully requested to supply their own explanation. That an explanation is due comes to one's understanding after only a little examination of the food figures relating to 1907, picturesquely set forth by the chief steward of one of the big lines.

Seasick passengers, no matter how many of them are carried, could not comfortably consume food of which the wholesale cost was more than \$4,000,000. This is seen at once when it is noted that the total expense for coal on the same line was but \$7,000,000, and of course none of the boilers was seasick and their consuming capacity is notoriously greater than any passenger, no matter how good an appetite he has.

#### BEVERAGES CONSUMED.

Before noting some of the figures of food it is pleasing to observe some of those relating to beverages. Now, as to champagne, which is said to be an excellent cure and for that matter a preventive of sea-sickness, passengers last year pulled the plugs out of only a few more than 51,000 bottles of champagne. When it comes to claret the figures jump so respectably that it is seen that a man may raise a thirst somewhere west of the Suez as well as east. Of that cheerful and ruddy beverage the first class passengers consumed 129,209 bottles. That sounds pretty good, but the consumption by the third class passengers makes it appear a mere tippie by comparison, for those in the steerage joyfully drank not less than 121,297 gallons of claret, presumably of the variety known as petit bleu, about which there is a song which the Paris students sing when inspired with it.

There is something rather appalling to read that of the various grades of brandy the passengers consumed 20,641 bottles and 73,384 gallons. But these are after all trifling nips when we come to look at the figures relating to beer, for of that beverage more than half a million gallons were drunk, and it is not reported that the quarter-masters had any unusual police duty to perform at that.

#### FOND OF DELICACIES.

The recent instalment of the la carte system in the restaurants of the modern liners accounts for an amazing growth in the consumption of delicacies, such as were seldom found on even the best ships when the business of feeding passengers was exclusively d'hote. Restaurant diners on the liners whose figures are being considered consumed many, many thousand partridges, snipe, quails, pheasants, grouse,

## A HUMOROUS ELEMENT.

The whole world talked about it, and all the more because England and the King of the Two Sicilies disputed over its possession.

It came majestically into view on July 8 and about the middle of August it was imposing to look upon as its broad expanse towered 200 feet above the sea. But its life was short. Diplomatic exchanges as to the ownership of Ferdinanda, couched in firm though polite language, were still in progress when the waves closed above the island in December.

A coral island is sometimes torn to pieces by a great storm, showing that islands disappear in more ways than one. This happened to the atoll in the Marshall group in 1905, when it happened to be in the path of a terrible hurricane.

Waves about forty feet high swept over the hapless speck of land, carrying every particle of verdure and every form of life into the sea, and not a human being was saved. The upper part of the coral was broken off and swept away, and a few days later nothing but the placid waters of the ocean were seen where the atoll had stood.

But such events are a part of our modern history and have little resemblance to the mighty movements that have buried wide lands beneath the sea. North of Europe is the shallow Barents Sea, whose bottom geologists now have no doubt was once above the water, so that Nova Zembla, Spitzbergen and Franz Josef Land were

## A PART OF EUROPE.

Iceland, southern Greenland and a few other islands are all that is left above water of the great land bridge that once joined Europe and America, though we find in the submarine ridge that extends all the way from Iceland to Scotland a part of the foundation of that land.

It has been for some time conclusively proved that a land mass once connected Madagascar with southern India and Ceylon, allowing the passage from Asia to Africa of land animals whose appearance in the West was once regarded as inexplicable.

So the rock crust of the earth has its calamities and its revolutions like the human race that lives on it. Fortunately the mightiest and most far reaching of these disturbances are not cataclysmal and the changes are very slowly brought about.

## DON'T BE AFRAID OF--

Thinking before you act.  
Doing a friend a good turn.  
Doing more than is required of you.

Admitting when you are in the wrong.

Doing your best; even that is not too good.

Telling the truth; it is part of your honor.

Thinking out new ways; originally is valuable.

Risks; great successes are built up on great risks.

Failure; keep on, though you fail a dozen times.

Beginning at the bottom; it's the safest way to climb.

Overtaking your strength; work kills very few people.

Work; it is healthy physical and mental exercise.

Resting if run down; a strong mind requires a strong body.

incorrectly delivered, not comprehended, he adopted the practice of carrying in his pocket loose sheets of asses' skin of the size of a large card (such as the invitations from court are printed on) and a pencil, and when he had an order to send he wrote it with his pencil on one side of those sheets in his hand, the aides de camp standing at his horse's head the while.

As an evidence of the Duke's frugal mind it may be added that after the action was over the asses' skins were returned to him to be cleaned and used over again.

Let us conclude with an interesting note concerning the young Queen Victoria. "Yesterday, coming out of town, we met the Queen driving in an open carriage; and I saw her so well; in a white chip bonnet, very pretty and neat, smiling and looking pleased and happy. She was quite a pretty girl, with a peculiar sweet and intelligent countenance."

## STRANGE INDIA PALM.

**Superstitious Natives Think There Is a God Beneath the Tree.**

Is it that a plant is possessed of some infernal spirit? Baraset subdivision, three miles distant from Duttapukur, on the central district of the E. B. S. Railways, is now being transformed into a weird, and at the same time a touching scene, says the India Daily News.

Since a fortnight a date palm, measuring about twenty-five feet, is being found to stand erect in the day time, but with the decline of the scorching rays of the sun prevalent nowadays, the same palm almost bends to the ground, so much so that its huge mass of leaves touches the ground imperceptibly.

This news spread like wildfire throughout the locality, and the superstitious people are flocking every day to witness the scene. What is most astonishing is that the earth on which it grew is neither loose, nor is it cracked, by the daily and nightly coming down and raising of the palm.

Most of the eyewitnesses, of which the writer is excluded, are offering pujas to the palm, thinking that there is a god underneath the tree.

## KING LEOPOLD'S PLUCK.

Leopold II., King of the Belgians, is one of the oldest European Royalties. Abstemiousness in eating and drinking, and exercise, are the principal factors in his Majesty's good health. He lives more simply than do the majority of his richer subjects. The King, whose hobbies are motoring and gardening, is not lacking in pluck, as the following incident shows. He was out in his motor-car one day, going at a rate of some forty miles an hour, when suddenly, on rounding a corner, the Royal motorist perceived a woman, wheeling a perambulator, and leading a child by the hand, standing in the middle of the road, dazed and unable to move from fright. The car could neither be stopped in time nor turned aside, owing to the high banks on both sides of the narrow road. "Reverse, and run into the ditch!" came the Royal command; and the chauffeur did so. The result was that the car turned a complete somersault and landed in the ditch. Then the aged monarch picked himself painfully up, and courteously reassured the frightened woman.

ed away to die.

## SEARCHING FOR WATER.

A few years ago, a Frenchman, named Isidore Daunet, reached a ranch where I was then staying. He had come through the valley with a party of six. The rest had perished. Wild with thirst, they had cut the throats of their pack-animals, and drunk the spouting blood. Daunet had suffered terribly, and was quite insane. Two days after reaching the ranch he put a bullet through his brain.

The body of a prospector named O'Brien was found near the end of the valley, with the fingers of both hands actually worn down to the bone by ineffectual efforts to dig for pure water in the salt earth.

If a man is not quickly killed by heat and thirst, or by falling into the quicksands, he goes mad, and raves of green fields and bubbling streams.

In parts of the valley there are innumerable pinnacles of salt earth, as sharp as a needle, and as dangerous as bayonet-points. Many a man has been lamed by them, and fallen down to die in delirium. Even the gloomy imagination of Dante could not have conjured up one half of the horrors of this real Valley of Death.

## COST OF ELEPHANT'S BATH.

**Takes Week to Carry out in Detail—Costs \$300.**

The elephant's bath takes a week to carry out in every detail, it requires the services of three men, and it costs \$300. This treatment is necessary for a circus elephant, and if the animal is a valuable one, the proprietor of the circus does not consider the money wasted.

The first process consists in going over the great body with the best soap procurable; 150 pounds of soap are used, and the elephant's ears are especially carefully attended to. When the soaping and drying are completed the elephant is well sandpapered, and after that rubbed all over with the purest Indian oil until the mouse gray skin is supple and glistening. This last finishing touch is the most expensive part of the whole bath, as \$150 has to be spent on the oil alone in the process of each bath.

## WHAT IS FATIGUE?

When we use any large group of muscles, as those, say, of the legs, for running and jumping, we very quickly get "out of breath." This is really a species of fatigue. It arises from the fact that the muscle thus used throws into the blood passing through it a large quantity of carbonic-acid gas, which is poisonous to the body and must be hurried out through the lungs. The greater the amount of this gas thrown into the blood, the more rapid and urgent are the movements of the lungs, and the sooner we get "out of breath." If the exercise is less violent and more continuous, we may not get out of breath, but the muscles will ultimately become tired, so that movement is difficult, and sometimes even impossible. This is due to the presence of certain poisonous substances produced by the exercise, which have the effect of paralyzing the muscles. If we rest for a time, the sensation of fatigue will pass off, the poisons having been washed out by the blood. Then the exercise may be continued.

of delicacies, such as were seldom found on even the best ships when the business of feeding passengers was exclusively d'hote. Restaurant diners on the liners whose figures are being considered consumed many, many thousand partridges, snipe, quails, pheasants, grouse, canvasback ducks. They demanded literally many hundreds of thousands of live lobsters and crawfish, of fresh littlenecks, bluepoints and softshell crabs. They consumed such a quantity of green turtle soup that the chefs had to use up 13,407 pounds of fresh turtle in its making.

Coming round to the more substantial articles of diet it is found that of fresh beef there were used 8,311,927 pounds, and of pork and veal and mutton about three-quarters of a million pounds of each. Potatoes to go with these weighed in excess of 10,000 tons, a very fair cargo in itself.

The passengers seem to begin the day with hearty appetites, as well as going to lunch and dinner in the same blessed condition. They consumed of eggs

## SIX AND A HALF MILLION.

and of calves' liver and bacon an appropriate quantity to supplement the eggs, and with their morning toast 216,503 tins of marmalade and other such sweets.

As if these figures were not proof enough that Lloyd's should make a very low rate of insurance against seasickness these days it is noted that besides what smoking material passengers took on board with them, 2,327,225 cigars and packages of cigarettes were had from the smoking room steward. It is interesting to note in conclusion that while the consumption of beer, wine and spirituous liquor indicates pretty generous living, figuring on the basis of all the passengers carried for the year each passenger consumed after only five-sixths of a gallon of such cheering beverages, while the average consumption of mineral water was a full gallon. These figures do not include 76,223 bottles of sterilized milk, which were dealt out to the children on board.

## REMEMBER THAT—

A good plodder is better than a cheap genius.

So many people speak twice before they think.

The error of a moment may be the sorrow of a lifetime.

We cannot all have good fortune, but we can all deserve it.

Courtesy is a minor virtue, but the lack of it is a major vice.

We live and learn until we are forty; then we live and unlearn.

One way to stop a man speaking to you is to lend him something.

Any sort of advice is good, as long as you don't attempt to follow it.

When a painter is wedded to his art, he must be true to his colors.

It is sometimes wise to yield to a lesser evil, to avoid a greater one.

It takes very little pushing to get some men on the downward path.

One lash to a good horse, and one word to a wise man, are sufficient.

## ONE EXCEPTION.

"I think," said the merchant, "I'll have to fire your friend Polk. I never saw any one quite so lazy."

"Slow in everything, is he?"

"No, not everything. He gets tired quick enough."

# My Hair is Scraggly

Do you like it? Then why be contented with it? Have to be? Oh, no! Just put on Ayer's Hair Vigor and have long, thick hair; soft, even hair. But first of all, stop your hair from coming out. Save what you have. Ayer's Hair Vigor will not disappoint you. It feeds the hair-bulbs; makes weak hair strong.

The best kind of a testimonial—

tain day he would deliver a criticism on the financial policy of the Government. Mr. Foster had been conspicuously vindictive in his attacks, and nothing was too contemptible for him to say with regard to his political opponents, when something happened.

Suddenly there came a lull, the attacks ceased. The Government passed a pension bill for ex-cabinet ministers (assisted by Mr. Foster); this bill benefitted Mr. Foster to the extent of \$3,500 a year. This is all that happened. Mr. Foster became a pensioner of the Government, he received \$3,500 a year for doing nothing a sample of extravagance which he could not find it to his mind to condemn.

Foster, the "man."

His declamation against extravagance never materialized. The attack on the Finance Minister was never made. This was Foster the "man."

Upon reflection the Government considered that pensions to ex-cabinet ministers was an unnecessary extravagance and decided to repeal the act. Whereupon Mr. Foster lost his easy \$3,500 (which he received in addition to his \$2,500 indemnity) which he had been enjoying in monthly payments, and for which he performed no services whatever, an extravagance which he would have condoned and enjoyed for the remainder of his natural life, had not the Government decided to curtail expenditure.

Foster the Politician.

No sooner was this bill repealed, an action which Mr. Foster resisted, than his denunciations recommenced, and he declaimed the loudest against waste of public funds. This was Foster the politician.

Foster the Speculator.

About this time a Royal Commission was appointed to examine into the methods of investing insurance trust funds, and to the surprise of many, one of the chief delinquents, one of the gravest offenders against the law was Mr. Foster, the man, the politician, who now appeared in the role of Foster the speculator.

Here we have the sub-leader of the Conservative party, the would-be Finance Minister, the chief critic of the Government, the man who assails individual reputation, who presumes to ask the people of Canada to give him control of public expenditures.

First, Foster the man who refrained from delivering a threatened philippic against the financial department of the Government after he had been given a pension of \$3,500 a year.

Foster, the politician, who returned to the attack after the Government took away his pension.

Foster, the speculator, the man who denounced graft and rake-off, and who was pronounced guilty by a Royal Commission of taking illegal commissions and vulgar rake off when dealing with trust funds of the Foresters.

Views of Tory Press.

When a man is condemned by his own supporters and friends, it is time for the general public to take notice and act accordingly. Alluding to Mr. Foster's dealings with the funds of the widows and orphans of the Foresters, the Toronto News, a paper not friendly to the Government, says of Mr. Foster:

"He cannot see the ethical argument in the handling of fiduciary funds, and that he is therefore lacking in some of the vital qualifications for public service."

The Montreal Star, a Conservative paper of great influence and large circulation, said of Mr. Foster;

"It was Mr. Foster who knew perfectly well the laws of this country concerning the investment of trust funds, and who violated these laws by

prices upon the understanding that they gave back part of the loot to enrich the swelling corruption fund. History shows Mr. Foster to be politically unsafe, the familiar of grafters, encouraging political parasites who fastened on the public chest. Hansard proves him guilty of using money for a purpose other than that for which it was voted by Parliament, and the public records declare him to have been an applicant for a free timber limit of fifty miles.

A Discredited Critic.

This is the man who had the audacity on Friday to offer a criticism of the financial policy of the Government and make the charge of extravagance. The man who has the immaculate gall to imagine the people of Canada will tolerate him as a minister of the Crown, the man whom the people regard as a hypocrite, employing his talents to climb into power, and lacking the moral courage to accept the popular verdict rendered against him.

It is surprising then that his statement to the House was based upon false figures, his deductions made from erroneous premises, and his conclusions, as unreliable and inexact as the calculations upon which they are founded.

Mr. Foster repeated to the House the fallacious and misleading figures given by Mr. Borden as the cost of the Grand Trunk Pacific. These gentlemen persist in representing to the people, that the cost to the country of this railroad is the total cost of construction and not the interest only on that part be-

which he was formerly associated, will the people be willing to turn affairs over to a man whose sole idea is borrowing money and doing away with surpluses? A man who falls far short of grasping the problems presented day by day in the administration of Canadian affairs.

The Conservatives in the House, headed by Mr. Foster, who are denouncing excessive expenditures, are at the same time clamoring for the Government to build Post Offices, wharves, piers, armories and what not in their own constituencies. They would never raise their voices against a vote to spend twenty millions more in Conservative ridings.

The press throughout the country, unfriendly to the administration, cannot find anything to say in face of the trade returns, which amount to \$640,000 for the year, the highest figure in the history of the country. This being so, what license has Mr. Foster to stand up in the House and predict ruin and disaster to the people of Canada. This prophet of gloom has lost all sense of patriotism, if he ever possessed any, when he gives to the world pessimistic views as to the future of this Dominion.

Man of Colossal Nerve.

The idea of Mr. Foster having the cheek to criticize a government which can show a record such as that of the Laurier Government is almost incomprehensible. How a man with such a political and business record as Mr. Foster has made for himself can stand up in the House and compare the pres-

# CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

## POLITICAL NEWS!

The day before the House adjourned Hon. G. E. Foster, ex-Minister of Finance leader in the nest of traitors, the man rejected by his own province, found guilty of accepting rake-off and commissions when dealing with the trust funds of the Foresters, chief financial critic of the Government, and end man of the coterie of slander-mongers of the House, made this statement with reference to the financial conditions:

"It has been usual of late years for the Opposition to make a summing up of the matter, presenting the figures, and, to a certain extent, embodying their own position with regard to it, which custom will not be departed from on the present occasion."

Was this the custom, and has it been departed from? What does history say about it?

### A Notable Exception.

Two sessions ago Mr. Foster, who had been very active in charging extravagance against the Liberal administration announced that upon a cer-

ulation, said of Mr. Foster;

"It was Mr. Foster who knew perfectly well the laws of this country concerning the investment of trust funds, and who violated those laws by borrowing money on behalf of a syndicate from the Union Trust Company, of which he was manager, on the security of stock in a speculative land company."

When Mr. Foster therefore rose to address the House on Friday last, and stated it was the custom to criticise financial affairs—he forgot to tell the House that he once departed from the custom for reasons not creditable to himself, and which would not have influenced a man sincerely devoted to the public interest. Mr. Foster must be regarded in the light of his political and public record and by that he must be judged, and by that he will be found unfit to become a minister of the crown.

### His Affiliations Condemn Him.

He belongs to the Conservative party which for years carried on a saturnation of thieving during which ministers of the crown, politicians, contractors and rascals in and out of office, accumulated riches, and the people became poorer.

He was a member of that Government of which the Birmingham Gazette said:

"Rascals out of office defraud the public in order to bribe rascals in office, and rascals in office prostitute themselves, sacrifice their honor and forsake their trust in order to keep on good terms with the rascals out of office."

Another English paper, the "Graphic Despatch" said: Even Tammany Hall smells sweet and clean in comparison with the huge stink-pot of the Conservative Government."

Of this Government Mr. Foster was a member. Did he repent after the defeat of the Conservative Government in 1896? No. Those events mentioned above occurred since that date. When in office he gave large contracts involving vast sums of money to the highest instead of the lowest bidder. Millions of money he borrowed, it came easy it went easier, but the Tory campaign fund grew apace. Do the people want this man for finance minister?

Hundreds of thousands of dollars were divided with contractors who were given iniquitous jobs at high

### Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

Take Hall's Family Pills for constipation.

Trunk Pacific. These gentlemen persist in representing to the people, that the cost to the country of this railroad is the total cost of construction and not the interest only on that part between Moncton and Winnipeg known as the Eastern Section. They know differently, but it is better politics for them to keep alive the impression that the country is out of pocket the total cost of construction. They likewise never allude to the fact that the Grand Trunk Pacific pay to the country interest on every dollar of money advanced, before the terms of the contract can be filled.

### Adept at Exaggeration.

Following this came an astounding and absurd statement of expenditures for the current fiscal year in which Mr. Foster charged up, not only the total cost of construction of the Grand Trunk Pacific, but also all railway subsidies which were revoked from former years and which may never be paid at all, and cannot possibly be paid in any one year.

Then followed a blue ruin, doleful tale of loans falling due, which he placed at \$100,000,000. This was about one-third too much, but about as near as Mr. Foster comes at the truth. He forgot, however, to state that the loans falling due were debts created by himself when Finance Minister. If he had grasped the economic problems confronting him when Minister of Finance he would have created a revenue sufficient to pay the expenses of government and provide necessary public works. He proved unequal to the task and borrowed over \$60,000,000 (a large part of which went wrongfully into the hands of contractors and a goodly sum into the Tory corruption fund), and this is the imminent obligation which he is worrying about, a debt which he himself incurred and which Hon. Mr. Fielding has to pay.

### Less Debt Per Capita.

The increase of the net debt from 1876 to 1896, a period of eighteen years of Conservative rule, was \$118,135,000 an average of \$6,563,000 per year. The increase of the net debt under the Liberal Government from 1896 to 1908 twelve years was \$19,474,376, an average increase per year of \$1,617,000. A considerable portion of this was occasioned by the Transcontinental railway. The net debt in 1896, last year of Conservative rule, was \$50,82 per head of population, and the net debt in 1903 is \$42.84 per head.

### Consider This Contrast.

As an evidence of careful management of the public moneys, the Conservatives in eighteen years expended \$167,000,000 on capital and special expenditure. To do this they had to borrow \$118,000,000. In twelve years the Liberals have spent \$162,000,000 for the same purposes, and only added \$19,000,000 to the public debt. That is, \$143,000,000 was expended for these purposes and provided out of the ordinary revenue.

The Conservative Government, of which Mr. Foster was a member, never saw a surplus in the Post Office Department. The Liberal Government has had a surplus for years, and last year the surplus was \$1,000,000 after paying out \$450,000 odd as increase to postmasters' salaries, and \$750,000 odd for extending the service. The last year of Conservative rule saw a deficit in the Post Office of 700,000.

Do the people want to employ Mr. Foster as Finance Minister? Apart altogether from the notoriously corrupt character of the Government with

Laurier Government is almost comprehensive. How a man with such a political and business record as Mr. Foster has made for himself can stand up in the House and compare the present Government with the one with which he was connected is incredible.

How the man has the effrontery to put forward figures as indicating the probable expenditure for the current fiscal year, when he knows the figures he gives are inaccurate, is explained only on the theory that to manufacture campaign literature he will say anything.

How the man can so easily forget his past acts and expect the people of Canada to have equally short memories is astounding.

How can a man discredited in the country because he was a member of a corrupt government, and afterwards found guilty by a Royal Commission of gambling with trust funds contrary to law, except to influence the right thinking people of Canada?

How can a man who betrayed his former leader and was denounced by him expect the people to accept him as qualified to fill a position of public trust?

How can a man who plunged Canada into debt to the tune of \$60,000,000 hope to influence people when he raves of extravagance?

### What the People Want.

If the people want early completion of the Grand Trunk Pacific to relieve congested transportation conditions of the Northwest;

If the people want inauguration of work on the Georgian Bay Canal to lower freight rates to the seaboard;

If the people want tariff for revenue which does not retard commercial growth;

If the people want substantial encouragement to the "All-Red Line" to divert Australian traffic via Canada;

If the people want vigorous prosecution of work on existing waterways;

If the people want a railroad built from the Saskatchewan to Hudson Bay, thus shortening the distance to England by 1,000 miles;

If the people want the lands for the settler and coal lands administered in the interests of the consumer;

If the people want new markets for Canadian products and wisdom and economy in the administration of public affairs, then sustain in power the Government of Sir Wilfrid Laurier.

The criticism made by Mr. Foster will not have any effect upon the people of Canada. They know the man who made it: know him far too well for their own good. Had he never been in public life Canada would not have to pay \$60,000,000 of money he borrowed. The English press would never have been called upon to characterize the administration of public affairs in Canada in such scathing language, and the circulation of scandals about men in and out of office would never have been reduced to a science. Mr. Foster not long ago weighed in the balance and found wanting, and he appears to be about the only man who does not thoroughly understand this.

### "OIL OF GLADNESS."

South American Nervine has proved itself the "oil of gladness" to many a nerve-sick sufferer. It starts to work at the fountain-head of the trouble—the digestion. It tones the stomach, helps to assimilate the food, promotes healthy circulation, stimulates the flow of rich, red blood, accelerates the action of the organs.

South American Nervine cures nervousness, sleeplessness, neuralgia, nervous prostration, nervous choking, nervous twitchings, hot flashes, sick head-ache, dyspepsia, indigestion, and all kindred ailments. It is the very nectar of health. (33)

## CASTORIA.

Bears the Signature of *Charles H. Fletcher*

The effect of *Scott's Emulsion* on thin, pale children is magical.

It makes them plump, rosy, active, happy.

It contains Cod Liver Oil, Hypophosphites and Glycerine, to make fat, blood and bone, and so put together that it is easily digested by little folk.

ALL DRUGGISTS: 50c. AND \$1.00.

## If You Read This

It will be to learn that the leading medical writers and teachers of all the several schools of practice recommend, in the strongest terms possible, each and every ingredient entering into the composition of Dr. Pierce's Golden Medical Discovery for the cure of weak stomach, dyspepsia, catarrh of stomach, "liver complaint," torpid liver, or biliousness, chronic bowel affections, and all catarrhal diseases of whatever region, name or nature. It is also a specific remedy for all such chronic or long standing cases of catarrhal affections and their resultants, as bronchial, throat and lung disease (except consumption) accompanied with severe coughs. It is not so good for acute colds and coughs, but for lingering, or chronic cases it is especially efficacious in producing perfect cures. It contains Black Cherrybark, Golden Seal root, Bloodroot, Stone root, Mandrake root and Queen's root—all of which are highly praised as remedies for all the above mentioned affections by such eminent medical writers and teachers as Prof. Bartholow, of Jefferson Med. College; Prof. Hare, of the Univ. of Pa.; Prof. Finley, of Springfield, M. D., of Bennett Med. College, Chicago; Prof. John King, M. D., of Cincinnati; Prof. John M. Scudder, M. D., of Cincinnati; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago, and scores of others equally eminent in their several schools of practice.

The "Golden Medical Discovery" is the only medicine put up for sale through druggists for like purposes, that has any such professional endorsement—worth more than any number of ordinary testimonials. Open publicity of its formula is the best possible guaranty of its merits. A glance at this published formula will show that "Golden Medical Discovery" contains no poisonous, harmful or habit-forming drugs and no alcohol—chemically pure, triple-refined glycerine being used instead. Glycerine is entirely unobjectionable, and besides is a most useful agent in the cure of all stomach as well as bronchial, throat and lung affections. There is the highest medical authority for its use in all such cases. The "Discovery" is a concentrated glyceric extract of native, medicinal roots and is safe and reliable.

A booklet of extracts from eminent, medical authorities, endorsing its ingredients mailed free on request. Address Dr. R. V. Pierce, Buffalo, N. Y.

## SOME QUEER CARS.

Rulers Have Introduced Strange Styles In Railway Coaches.

What use is a balloon to a railway carriage? Few of the latter are so fitted, but there is at least one running on a mountain railway near Salzburg which has a balloon attached to it in order to assist it up the steepest portions of the line, says Tit Bits. At the summit a tank below the car is filled with water sufficient to counteract the upward pull of the gas bag, which the vehicle thus drags down with it upon the return journey.

There is only one car in the world with a window fitted as a royal autograph album. It is a somewhat ancient railway saloon used in Denmark for the conveyance of royal visitors. It has become the custom for these to scratch their names on one of its panes, which now shows the autographs of King Edward and Queen Alexandra among others, including those of the late Czar, the late King of Denmark, the late Duke of Clarence and many others.

Another uniquely fitted railway carriage is that containing the vestibule entrance to the train belonging to the German Emperor. This vestibule holds several fine statues—an innovation which has not been copied elsewhere, though many royal trains carry superb paintings as part of their decorations.

A car with a complete verandah is another novelty introduced in the train constructed for President Diaz of Mexico, where the drawing room portion is surrounded by such a fitting.

Very few trains are roofed with water, and that of the Viceroy of India is among the small number that are so. All the vehicles, eight in number, have double ceilings, which

## OLD PARIS STREETS.

Odors and Filth of the Thoroughfares of Long Ago.

The automobile which glides noiselessly and smoothly along the well paved streets of Paris would not have had so easy a time some centuries ago. Nowadays one of the first demands civilization makes upon a community is that the paving and the sewerage shall be good. It is hardly possible for the twentieth century mind to conceive the conditions of old time streets and of the inconveniences and dangers the public endured. Some idea of ancient Parisian thoroughfares is given in Tighe Hopkins' "An Idler In Old France."

Lutetia, the name by which Paris was first known, is said to have come from a word meaning "mud." This derivation is inexact, but its appropriateness was practically borne out in the condition of the streets. Unpaved, rough as woodland tracks, flooded with waste waters from the houses, the roadways were populated by pigs, dogs, geese, ducks and rabbits. In 1131 Philippe, son of Louis le Gros and heir to the throne, was killed while riding in the city streets by being thrown from his horse by an abbot's pig.

Snows and rains made the roads almost impassable, and the odor from them rose far above the housetops. It was said that on the darkest night a traveler, out of his course, might know by the stench how near he was to Paris. The mud of the streets gained an early celebrity. "It sticks like Paris mud" was a proverb of antiquity. If clothes were stained with it one was advised to "cut the piece out, for it burns whatever it touches."

In 1185 the king, standing by an open window of the palace, viewing a cart which had stuck in the mud, was so sickened by the stench that he gave orders to have the streets paved. This movement inaugurated the street department of Paris, but the effort was a feeble one. The work was begun, but at the people's expense. The king offered only a slender contribution. Taxes were levied on duelists, on candles, boots, cake and other things. But the enterprise was soon abandoned.

It was not until 1348 that any systematic care was taken of the streets and pigs denied the public ways. Even then the cleaning was confined to the highways. The smaller streets were still filled with heaps and hillocks of rotting refuse.

The germ wise minds of to-day may well wonder that any good or any continuance of life came out of such conditions.

## Nearly Seized Fleet.

The whole French navy has escaped seizure by a Cherbourg lawyer for a debt of \$25. The *Matin* tells the amusing story.

Letellier, a dockyard workman, lost a hand during his employment in November, 1906, and in an arbitration was awarded a pension of \$100. But the ministry caviled at the decision, and in March, 1907, Letellier, through his lawyer, M. Lebouche, sued the Admiralty and won his case.

Still, he did not get the money. M. Thomson, Minister of Marine, or his subordinates made protests and delays till \$25 of the pension was in arrears. Then the advocate marched into the Admiralty office at Cherbourg and announced that, in default of payment, he would be compelled to seize the furniture of the building as well as the warships, torpedo boats, and vessels of smaller importance in the docks at the moment. A frantic telegram was despatched to M. Thomson, who forthwith capitulated and sent \$2,000, the capital necessary to supply the workman's pension.

## THE BEST FLOUR.

### DAFOE'S NONESUCH

## DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafe's and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usual y, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

## Lax-ets 5 C Sweet to Eat

A Candy Bowel Laxative.

Very low trains are roofed with water, and that of the Viceroy of India is among the small number that are so. All the vehicles, eight in number, have double cisterns, which are really water tanks, holding about five tons of water. The arrangement contributes toward coolness and furnishes water for domestic purposes on the train. The train carries sixty personal servants when the Viceroy uses it.

On the long distance lines in Russia each of the important trains has a car above which rises a little bell-shaped structure containing a chime of bells. Otherwise the latter vehicles are fitted as chapels, in charge of a regular priest of the Greek Orthodox faith. At Hallatraw, on the North Somerset Railway, there is an old railway carriage which has been licensed as a mission chapel and is fitted accordingly.

#### On the Stand.

Attorney for the Defence (to witness)—You say that on the night of the attempted murder the moon shone so brightly that you could plainly see the burglars in the room. Was your husband awake at the time?

Witness—I don't know.

Attorney—Was his face turned toward you or not?

Witness—I don't know.

Attorney—What! You don't know whether his face was turned to you or toward the wall?

Witness—No.

Attorney—Your honor and gentlemen of the jury, you hear what this witness says. She has declared the prisoners to be the burglars who were in the room and yet she is unable to state in what position her husband was lying in bed. Well, to the witness—how is it you don't know?

Witness—I could not see.

Attorney—Ha, ha! Just what I thought. You could not see. You were so positive in your recognition of the accused and yet could not see which way your husband's face was turned. Explain that if you can.

Witness—Certainly, sir. My husband is so bald that in a dim light I am unable to distinguish his face from the back of his head.

#### How to Freshen the Air in a Room.

Lavender salts are useful for freshening the air of the living room where smoking is occasionally indulged in. Select a large mouthed bottle, a stick candy jar which will hold a quart is just the thing—and in this place one pint of pure (not household) ammonia, add two ounces of oil of lavender and then fill the bottle with carbonated ammonia blocks. When using, shake the bottle, remove the stopper and leave for half an hour. The odor is peculiarly invigorating and not at all overpowering if not too close a sniff of the jar be taken.

## Indigestion

Stomach trouble is but a symptom of, and not in itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific Nerve sickness—nothing else.

It was this fact that first correctly led Dr. Shoop in the creation of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had.

For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend

**Dr. Shoop's Restorative**  
"ALL DEALERS"

supply the workman's pension.

The footprints of Py-pep-a have been directly traced to the Stomach nerves. When these "stomach nerves" fail, indigestion and stomach distress most surely result. For this, amongst everywhere are supplying a prescription known as Dr. Shoop's Restorative. First, these try mislead Stomach, Heart, and Kidney nerves. Then gas belching, flatulent eructations, or failing Kidneys follow. Don't give the Stomach, or stimulate the Heart or Kidneys. That is wrong. Strong heart throbbing nerves with Dr. Shoop's Restorative. It is the nerves, not the organs that are calling for help. Within an hour after starting the Restorative treatment, you will realize the pain. As a test, will tell. Sold by—ALL DEALERS.

#### Strength of Rings.

Some elaborate calculations, backed by experiments, have recently been made in England to determine the breaking strength of rings. It appears that a ring of ductile metal, like malleable iron, will be pulled out into the form of a long link before it breaks and that the ultimate strength of the ring is virtually independent of the diameter. Fracture finally occurs as the result of almost pure tension, and the resistance to breaking is a little less than twice that of a rod of the same cross section subjected to a straight pull. As the ring increases in diameter there appears to be a slight approach toward equality, with double the strength of a bar. Thus a three-inch ring made of three-quarter inch iron broke at 19-12 tons, a four inch ring at 19.9 tons and a six inch ring at 20 tons, the strength of a bar of the same metal being 10-12 tons.

#### New Use For Wedding Rings.

A handsome tabernacle of silver has been erected in the Chapel of the Blessed Sacrament in the new Roman Catholic cathedral at Westminster. For years past, in anticipation of this event, a lady who has done much for the cathedral has been collecting gold rings on which the inner curtains might hang. She has succeeded in persuading many of her friends and relatives to leave at death their wedding rings for this service. At the present moment the curtains of silk inside the tabernacle are supported by about fourteen golden rings which she has obtained, and on each of them the name of its donor is inscribed.

#### The Word Post.

Many persons wonder how we got the word "post" as applied to the mails. It comes from the Latin positus, which means placed. Therefore it is a fixed station. From this it came to mean an established conveyance of letters from one station to another, and the place from which the letters were sent out came to be called the postoffice. "Posthaste," a word used by Shakespeare, means speed in traveling, like that of post or a courier.

#### Sharpens Wit.

Mrs. Skipper—I have the wittiest lot of boarders you ever saw.

Mrs. Hasher—I don't doubt it. There is nothing like hunger for sharpening the wits, you know.

#### The Cheerful Baker.

The baker says, "Some people find Cash hard to raise, I know.

But just give me a cake of yeast And I can raise the dough."

#### Baseball Critic.

Higgins—What has become of Fanning?

Muggins—Oh, he's laid up, a victim of baseball.

Higgins—I didn't know he ever played the game.

Muggins—He doesn't. He sprained his larynx telling the umpire how things ought to be done.

## DR. HENNEQUIN'S INFANT TABLETS

Mrs. R. J. Ego, Ardree, Ont., Says:

"When baby was seven months old she got very ill with indigestion and constipation, and kept getting worse, until doctors had no hopes for her recovery; all medicines failed to have any effect. We received a sample package of Hennequin's Infant Tablets. I had not much faith in them, as I had tried so much, but concluded to try them. We gave her one-half one Tablet, and that day we noticed a change for the better. I at once sent for a box; we used them, and the results are most astonishing. We used five boxes, and baby has been a well child for some months, and is fat, hearty and cheerful. I do not feel safe without them. I cannot speak too highly of what I know has saved my baby's life, and I wish all mothers whose babies suffer as mine was, to try them. Enclosed please find \$1 and for which please mail to my address 5 packages."

DR. HENNEQUIN'S INFANT TABLETS.

Destroy worms, assimilate the food, regulate the bowels, sweeten the stomach, procure healthy and natural sleep, relieve teething trouble, allay feverishness, cure indigestion, diarrhoea, constipation, colic, etc., stop waking in the sleep and fright, end awakening from sleep, cure fits, etc. Beyond price for children affected with weak health. Dr. Hennequin's Infant Tablets do not contain morphine, opium, or other narcotic properties. 25c per package—postpaid to any address. Send us \$1 for 5 boxes and if after using part or all of one box, you wish your dollar back, you can have it by mailing us the remaining four boxes. We cannot be responsible for money unless sent by P. O. Order, Money Order, or Registered Letter. DOUGLAS & CO., Napanee, Ont., Can. Wholesale Agents for Canada.

## HEADACHES

Suffered From Constant Headaches—  
Cured by "Fruit-a-tives" When  
Doctors Failed.

"I was a sufferer from fearful headaches for over two years, sometimes they were so bad that I was unable to work for days at a time. I took all kinds of medicines, was treated by physicians, and yet the headaches persisted. A short time ago I was advised to try 'Fruit-a-tives' and I did so with, I must confess, very little faith, but after I had taken them for three days my headaches were easier and in a week they left me. After I had taken a box of the tablets my headaches were quite cured. My appetite was always poor and my stomach bad, and now my appetite is splendid and my digestion is excellent. I had become thin and weak from the constant headaches, but now not only have I been cured of all these awful headaches, but my strength is growing up once more, and I feel like a new man. I have taken in all three boxes of 'Fruit-a-tives.' I am exceedingly grateful to 'Fruit-a-tives' for curing me, and I give this unsolicited testimonial with great pleasure, as I hope thereby some other sufferer of headaches will be induced to try 'Fruit-a-tives' and will be cured."

(Sgd.) B. Cornell.

Taylorville, Ont.

"Fruit-a-tives" is now put up in the new 25¢ trial size as well as the regular 50¢ boxes. Write Fruit-a-tives Limited, Ottawa, if your dealer will not supply you.

There is no bad land in Texas, and its soil could almost feed the world. It can raise sugar and tea, coffee, rice, cattle—everything needed—and it has various minerals that are rich and needed everywhere. The state needs a few million more farmers, and it is going to get them because it is a climate that appeals to millions of people, a shirt sleeve climate that only makes a coat necessary when the wicked north wind gets loose and comes whooping down in the night. On the coast one can bathe in the ocean surf all the year except when the "norther" blows, and that only lasts three days at a time.

### Fishing In Nigeria.

Natives of Nigeria are remarkably skillful anglers, and their manner of catching fish recommends itself alike for simplicity and success. The fisherman grasps a small line weighted at the other end with a small stone, and at regular distances along the line he attaches a number of hooks, made of animals' bones in the form of a narrow V, while to the angle of each V is fastened a short line, made of sinews, and baited with a kind of snail; the fish swallowing the bait and the line, swallows also the hook, which is so acted upon by the tension of the line, as to expand its two prongs, and fasten them firmly in the throat. The victim struggles and whirls about the line, thus attracting its family and neighbors, to swallow the same snare.

### Ancient Craft Guilds.

The first notice of labor unions was when Plutarch wrote of various craft guilds as having existed in the Roman and Greek dominions. From Rome the idea was passed on to the young nations that followed, and in the middle ages the guilds were to be found everywhere. A guild was a voluntary association of those living near together who joined for a common purpose, paying contributions, feasting together temporarily, helping one another in sickness and poverty and sometimes uniting for the pursuit of special objects. It was undoubtedly from these early associations that the idea of the modern labor organizations came.

### Some of Each.

"Somebody told him that he mustn't drink ice water during the hot weather, and somebody else told him that he must let alcoholic beverages alone. You know how very obstinate he is."

"Yes."

"Well, he mixes the two."

### Heavy Roll.

Reggy Sapp—I can feel that I am surrounded by thought waves from my own head.

Miss Tabasco—Thought waves! Gracious! Now I know why you look so pale—you are seasick.

### "BED-RIDDEN FOR YEARS."

Such cases are not hopeless when the right treatment is resorted to. South American Rheumatic Cure has cured hundreds of so-called "incurables." Relieves in six hours.

The marvellous curative power and effectiveness of South American Rheumatic Cure is in the quickness with which it acts and the almost "lightning change" for the better in the Rheumatic Victim after taking a few doses. It seems next to incredible—but there is no deception—it's work is apparent, and every step taken toward recovery is a permanent one. History repeats itself daily in this wonderful treatment—it never fails. (34)

Sold by T. B. Wallace

### THE SECRET OF GLAMIS.

A Ghost That Hovers About an Ancient Scottish Castle.

"The old manor houses and castles throughout England," said the posted man, "have innumerable stories of ghosts, which the old colored 'mummies,' used to call 'hants,' attached to them. The most famous of them all is perhaps the one connected with Glamis castle, the country seat of the earls of Strathmore, in Forfarshire. This is the most ancient inhabited castle of Scotland, although, of course, little of the original structure still survives. It was here that Macbeth, one of the minor kings of Scotland, murdered Duncan, and the principal scenes of Shakespeare's 'Macbeth' are laid within and without the castle walls. It came into the hands of the Lyon family, the present owners, about 1371, and from then on a long series of tragedies marked the progress of that family.

"The ghost that hovers about Glamis is a mysterious one, and the exact character of the manifestations is little known, but the point that makes it of thrilling public interest is the well known fact that there is a family secret in the Lyon family which only three living people share at the same time—the holder of the title, the heir apparent, if he has attained his majority, and the factor of the estate. Why the latter shares in the secret is not the least part of the mystery.

"On the day before the heir apparent attains his twenty-first birthday—or, if the then earl be sonless, the heir presumptive—he is solemnly initiated into the mystery. The opening of some hidden room or passage is connected with this initiation, and this has given rise to a legend in Scotland that a certain Earl Beattie of past times played a game of cards with the devil 'in propria persona,' lost the game and his soul at the same time, and the sealed chamber in Glamis is the one wherein the game was played. This is only one of many stories which purport to account for the mystery.

"As generation after generation has been initiated into the dread secret it has become widely known and advertised, and it is said in England that more than one of the heirs, when on the eve of coming of age, has promised his friends and cronies to reveal the mystery, but so far no such promise has ever been kept, nor has any factor of the house ever proved false to the trust reposed in him."

### Both With Good Husbands.

A short time ago in one of the public gardens in Vienna a seamstress found herself seated beside a quiet, plainly dressed woman who was also sewing. They fell into conversation about domestic affairs, telling each other how they made their own frocks and those of their children. "I like to occupy myself with this sort of work," said the seamstress. "So do I," replied the other woman. "It is one of my greatest pleasures." Then, as further confidence seemed in order, "My husband is a good man," the little seamstress continued. "So is mine," admitted the other woman. "Mine works in a railway station, as his father did before him," said the seamstress, encouraged to go still deeper into her history by her listener's interest. "My own father was a woodcarver. What was yours?" After a moment's hesitation the other woman said simply, "My father is Francis Joseph." And, in fact, it was the daughter of the Austrian emperor, the Archduchess Gisela, wife of the regent of Bavaria, who was sewing in the public garden in Vienna.

### Better Tips With Overcoats.

"We don't take in near as much business as the summer time," said

## GUINEA NOW HISTORY

PROVERBIAL BRITISH COIN WAS  
LAST MINTED IN 1813.

Poets Who Beavely Talk of the Coin  
Never Saw One—So Called Because of the Place Whence the Gold Came Was Subject to Violent Fluctuations in Value—First Coined in 1663.

With poet's license Tennyson tells us how "the jingle of the guinea helps the hurt that honor feels." It is doubtful if the poet ever heard a guinea jingle, and certainly few of the readers of "Locksley Hall" have ever set eyes on that coin.

And yet—such is the force of habit—we talk about guineas and reckon in guineas, and read about the jingling of guineas without ever asking ourselves why a coin which is no longer a coin persists in lingual currency, not only poetic but popular.

The last guinea issued from the mint bears date 1813; groats and maundies were coined in the era of Victoria; why, then, has mankind, including the poets, forgotten all about the latter and clung to the former? There seems no obvious reason.

It may be because the guinea had so long a reign, or because the word itself is "catchy," or because sellers have found readier customers for goods at "one guinea" than for goods at "one-pound one."

It was in the reign of Charles II., to be exact, in the year 1663, that the first golden guinea was brought into the world. It was part of a new coinage made in a new way, for it was milled, a device to prevent clipping, which, indeed, had been introduced in Elizabeth's time, but soon abandoned.

There were five-guinea, two-guinea, guinea and half-guinea pieces, and they were so named because many of them were made from gold brought from Guinea by the "Company of Royal Adventurers of England Trading Into Africa." In allusion, probably, to this company's arms, the King ordered that the pieces should bear the image of "a little white elephant which Wee intend as a mark of distinction from the rest of our gold and silver monies, and an encouragement unto the said Company in the importing of gold and silver to be coined."

On some of the coins, too, there is a castle, and the reason of this may be that in 1666 Sir Robert Holmes captured in Schelling Bay 160 Dutch sail containing bullion and gold dust from Cape Coast Castle, in Guinea, and that this booty found its way into the mint. The exploit is celebrated in Dryden's "Annus Mirabilis."

It is curious, in the light of this incident, that the guineas were not by a Dutchman named John Roettier, who competed for the work with an Englishman, Thomas Simon, and beat him; while a foreigner again, the Frenchman Blondeau, had charge of the milling apparatus. Simon was disgusted at his defeat, and to show that he was really the better man made and presented to the King what came to be known as the "Petition Crown." The King, however, ignored this appeal.

The new coinage, apparently, caused no little stir, for the two immortal diarists of that day both mention it. "Now it was," wrote Evelyn on March 9, 1664, "that the fine new milled coin, both of white money and guineas, was established"; and Pepys tells us how "There dined with us to-day (March 9, 1663) Mr. Slingsby, of the Mint, who showed us all the new pieces, both of gold and silver,

A

## REMARKABLE INVENTION

FOR THE

# CULTURE OF HAIR

# CULTURE OF HAIR

THE EVANS VACUUM CAP is a practical invention constructed on scientific and hygienic principles by the simple means of which a free and normal circulation is restored throughout the scalp. The minute blood vessels are gently stimulated to activity, thus allowing the food supply which can only be derived from the blood, to be carried to the hair roots, the effects of which are quickly seen in a healthy, vigorous growth of hair. There is no rubbing, and as no drugs or chemicals of whatsoever kind are employed there is nothing to cause irritation. It is only necessary to wear the Cap three or four minutes daily.

## 60 DAYS' FREE TRIAL!

### The Company's Guarantee.

An EVANS VACUUM CAP will be sent you for sixty days' free trial. If you do not see a gradual development of a new growth of hair, and are not convinced that the Cap will completely restore your hair, you are at liberty to return the Cap with no expense whatever to yourself. It is requested, as an evidence of good faith, that the price of the Cap be deposited with the Chancery Lane Safe Deposit Company of London, the largest financial and business institution of the kind in the world, who will issue a receipt guaranteeing that the money will be returned in full, on demand without questions or comment, at any time during the trial period.

The eminent Dr. L. N. LOVE, in his address to the Medical Board on the subject of Alopecia areata, stated that if a means could be devised to bring nutrition to the hair follicles, the trouble, without resorting to any irritating process, the problem of baldness would be solved. Later on, when the EVANS VACUUM CAP was submitted to him for inspection, he remarked that the Cap would fulfil and confirm in practice the observations he had previously made before the Medical Board.

Dr. W. MOORE, referring to the invention, says that the principle upon which the Evans Vacuum Cap is founded is absolutely correct and indisputable.

An illustrated and descriptive book of the Evans Vacuum Cap will be sent, post free, on application.

**THE SECRETARY, EVANS VACUUM CAP CO., LIMITED.**  
Regent House, Regent Street, London, W.

agent of Bavaria, who was sewing in the public garden in Vienna.

### Better Tips With Overcoats.

"We don't take in rear as much on tip in the summer time," said the waiter in one of the downtown eating places. "I've been noticing that for several years. As near as I can figure it out, it's because men will hand out bigger tips when they're wearing overcoats. When a man can put on a straw hat and walk out he doesn't feel as if it's necessary to hand the waiter much of anything, but when the waiter has to help him on with his coat he takes that slight service as an obligation that must be met. Anyway, I've noticed that the same men will give almost twice as much when they wear overcoats as when they don't."

### Pointers For Boys.

In a mother's old scrapbook we recently came across the following choice counsel for boys:

To Throw Stones.—Fold each one carefully in a feather bed and give notice to all the neighborhood when and where you are going to pitch it.

To Carry Gunpowder In the Pocket.—Soak it well in cold water and then wrap it up in a cover of oiled silk.

To Slide Down the Banister.—Let a surgeon sit upon the lower stair; also carry a pailful of poultice in each of your hands, as you may need it.

To Cure Creaky Boots or Shoes.—Wear them always in going into the country to get some of mother's cakes and pies.

coin, both of white and silver guineas, was established"; and Peppys tells us how "There dined with us today (March 9, 1663) Mr. Slingsby, of the Mint, who showed us all the new pieces, both of gold and silver, that were made for the King by Blondeau's way; and compared them with those made for Oliver. The pictures of the latter made by Symons (Simon), and of the King by one Roty (Roettier), a German, I think, that dined with us also."

The guinea, moreover, or rather the elephant upon the reverse side to that which bore the bust of Charles II., receives notice in Marvell's prose, where he speaks of a "great little animal," which "was on a sudden turned so yellow and grown withal so unwildly that he might have passed current for the elephant upon a guinea"; and popular combinations of the word quickly arose, such as "guinea-dropper," a cheat who practiced the trick of dropping counterfeit coins, and "guinea-hen," a courtesan.

Our forefathers had much trouble with the coinage. Sometimes they could not get metal enough to coin; sometimes the market value of the metal used for coining was such that men found it profitable to melt down their money and sell it in bulk; sometimes kings, notably Henry VIII., debased the coinage; and, until milling became the rule, clipping was of constant practice.

Silver was the so-called standard until 1816, and consequently the golden guinea was subject to market fluctuations, according to the condition of the silver coin. It started its history at the value of 20 shillings, then rose as high as 30, and at other times was equal to 26, 22 and 20 shillings and sixpence.

Peppys, in 1666, quotes his goldsmith to the effect "that guineys which I bought 2,000 of not long ago that cost me but 18-1-2d change will now cost me 22d; and but very few to be had at any price." Parliament finally took the matter up, and by John Locke's advice the guinea was fixed, in 1717, at 21 shillings, at which it remained until 1813, when it ceased to be issued, and yielded its place to the sovereign, which, by the way, it had originally displaced.

### Willowing to Oblige.

"Could I paint your old cow?" ventured the city artist.

"Sartinly, stranger," laughed the old farmer as he mopped his brow with a handkerchief. "Paint her green and she will look so much like the grass the tramps can't see her and milk her on the sly."

### As to Quotations.

How many persons can unhesitatingly name the source of the familiar quotations? Many a man goes through life without reading a single play of Shakespeare, but probably no English speaking man goes through life without quoting him. If he sneers at a woman's reason," he quotes Shakespeare; if he refers to "a trick worth two of that," he quotes Shakespeare again.

Goldsmith's "She Stoops to Conquer" is not a popular work, but one line of it—"Ask me no questions, and I will tell you no lies"—is known and used by everybody.

### Made Him a Songster.

Mr. Stubb (in astonishment)—Gracious, Maria! That tramp has been singing in the back yard for the last hour. Mrs. Stubb—Yes, John, it is all my fault. Mr. Stubb—Your fault? Mrs. Stubb—Indeed it is. I thought I was giving him a dish of boiled oatmeal, and instead of that I boiled up the bird seed by mistake.

**Proof is inexhaustible that Lydia E. Pinkham's Vegetable Compound cures female ills and carries women safely through the Change of Life.**

Mrs. Letitia Blair, Cannifton, Ont., writes to Mrs. Pinkham:

"I was sick for five years. One doctor told me it was ulceration, and another told me it was a fibroid tumor, and advised an operation. No one knows what I suffered, and the bearing down pains were terrible.

"I wrote to my sister about it and she advised me to take Lydia E. Pinkham's Vegetable Compound.

"It has cured me of all my troubles, and I did not have to have the operation after all. The Compound also helped me to pass safely through Change of Life."

### FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness or nervous prostration. Why don't you try it?

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

TOWNSHIP OF RICHMOND.

August 3rd, 1908.

The Council met at Selly.  
The members present were Messrs Robert Paul, Reeve, Alf McCutcheon, E. R. Sills, C. H. Spencer, Manly Jones, the Reeve presiding.  
The minutes of the last meeting of the Council were read and confirmed.

A notice was received and read from Gordon Schermehorn in reference to damage to his horse on a public highway, notice of which was given on July 10th, 1908, and claiming \$130.00 for the injury.

Moved by C. H. Spencer, seconded by Manly Jones, that the Reeve and Treasurer be and are hereby authorized to purchase a county deponenture for \$5000.00 at five per cent interest also that they have power to borrow to the amount of \$1000.00 from the Bank or elsewhere until the Treasurer can replace it with money collected from Clergy Reserve fund now standing out. Carried.

Moved by C. H. Spencer, seconded by E. R. Sills, that the report now put in by John McFarlane, Road Engineer, be accepted and that the Reeve and Clerk give orders to pay the different amounts due amounting to \$303.18. Carried.

Moved by E. R. Sills, seconded by C. H. Spencer, that the Collectors time be extended for two months. Carried.

Moved by A. McCutcheon, seconded by E. R. Sills, that the following accounts be paid: W. Waddle for building culvert in road section No 62, by order of Pathmaster, \$2.50; Jas. Turnbull for 32 loads of gravel for road section No. 73 by order of Hugh Henderson, Pathmaster, \$3.20; Daniel McNeil 21 loads of gravel for road section No. 25 by order of Pathmaster, \$2.10; J. D. Arnold, for building culvert on Road section No. 34, \$1.75; Elias Jackson 6100 feet bridge covering by order of Council, \$122.00; Jas. Turnbull 38 loads of gravel for road section No. 76, \$3.80; John Boyd 45 loads of gravel for road section No 28 by order of Irvin Allison, Pathmaster, \$4.50; Jas. Richmond for building culvert in road section No 38, in 1907, \$1.50; W. R. Pringle for work in gravel pit, \$2.50; A. Wood for the support of Thos Sovereign to Aug 1, 1908, \$8.98; David Breeze 65 loads of gravel for road section No 63 \$6.50. Carried.

Moved and seconded that the Council adjourn to meet on the 1st Monday in Sept. 1908 at the hour of 10 o'clock a. m.

ABRAM WINTERS.

Tp. Clerk.

WHEN I GET INTO BED.

I'm never frightened in the dark.  
Though I am very small;  
I never sit all scared and hark  
For ogres in the hall.  
But when my prayers are said  
I have one awful dread—  
That something waits to grab my toes  
When I get into bed!

I try to think of pleasant things  
Each time I get undressed  
And how each day no evil brings  
If children do their best.  
But the thought comes in my head  
As I'm turning down the spread  
That something's going to grab my toes  
When I climb into bed!

And when there's nothing more to do,  
With bedclothes open wide,  
It makes me shiver through and through  
A-trying to decide  
Which foot shall go ahead,  
'Cause I'm sure I'd tumble dead  
If something ever grabbed my toes  
As I got into bed!

THE HONEY IN FLOWERS.

Pits and Pockets In Which It Is  
Carefully Concealed.

Before "the bee sucks," as Ariel put it, he must find the wonderful places where the flowers hide away their honey, to be found like the priests' hiding holes in ancient mansions by the right sort of visitor, and to keep away all intruders.

In the recesses of the crown imperial lily at the centre can be seen six large honey pits, one on every floral leaf, and each brimming over with a big drop of honey and glistening like a tear drop. Shake the flower and it "weeps" as the big drops fall from it, soon to be replaced by other tears in the rapidly secreting flower. The simple folk call the flower "Job's tears."

The snowdrop is literally flowing with honey, for in swollen veins traversing its fragile whiteness are rivers of nectar. The petals of the columbine are ingeniously and elaborately designed with a view to providing good places of hiding for the honey. Each is circular, hollow, shaped like a horn. In each the honey is secreted in a round knob at which would be the mouthpiece end of the horn, and

THE UNCHANGEABLE.

George Albert Snider, Napanee.  
Still speaks the voice which men and angels heard,

Which caused the lame to walk the blind to see,  
Which made the hearts of men within them to be stirred,  
Which told John what to write, and Peter what to say.

Still shines the light that arrested wayward Saul,  
Illumed the darkness on Lake Galilee,  
Shone in the night behind the prison wall,

And lights all earth and heaven eternally.  
Still doth the voice speak which Elijah heard;

Still doth the glory shine which Moses saw:  
Still is Jehovah known in deed and word;  
Still throb our hearts with joy and holy awe.

For unto us He promised He would speak,  
And teach us of his way, and unto us His will make known.

And in our hearts, His "still small voice" we now may hear, who seek  
To Christ for teaching, and to Him alone.  
Willing to know and do the Father's will:  
Abiding by his precepts and his grace,  
Taught in the written page, and which are still  
By the same spirit taught to all the race.

He who through the eternal Spirit offered up  
Himself upon the cross, an offering for our sins,  
Hath risen again and death is swallowed up  
In victory; with His living in us Life begins.

O, that the mind of man might now perceive  
The work of God, and let his glory in:  
That Christ, the word of God, in us may live,  
And teach His way, and purge our lives from sin.

This is salvation's plan, that Christ may dwell  
Within us, glorious hope for fallen men:  
Lift up your heads, behold from whence ye fell;  
Return, obey, and walk with God again.

Our hearts he knoweth, none from Him can hide;  
Our sins He seeth; O, that we may see!  
Though far we strayed, for us doth still abide,  
The Father's love, unbounded sympathy.

A Popular Insurance Man.

Mr. I. Barton Yourex, 110 Carlton street, Toronto, Canada, widely known throughout Canada as agent for the Equity Fire Insurance Company, Toronto, Canada, and who is also a local preacher and was for over twenty years a successful school teacher, writes an interesting letter to Peruna.

I. BARTON YOUREX.

"It is only fair to give praise where it is due. Some time ago I contracted a cold, which being repeated caused catarrh in my head. I had seen Peruna advertised frequently, and upon inquiry was advised by a friend to try it. The help it gave proved its merit beyond a doubt, very beneficial indeed."—MR. I. BARTON YOUREX.

It may seem a small matter to some people to cure a cold. But experienced physicians not only realize the importance of neglecting a cold, but the difficulty that sometimes attends upon the curing of one.

Colds are the cause of more acute diseases than all disease germs combined.

More people lose their lives as the direct result of catching cold than from all other causes put together.

Hence, the importance of curing a cold. Peruna has been tried under all circumstances, all times of year, and by all classes of people in the civilized world, and found to be a reliable remedy for colds.

There is no time of year when such a remedy should not be kept conveniently at hand, but it is especially necessary during the winter months that Peruna be kept in the house, convenient to meet the first symptoms of colds.

WHY THE BROOK SINGS.

How the Nightingale Lost Its Once  
Brilliant Plumage.

Long, long ago, thousands of years before man came on the earth, the nightingales were the most splendid plumage of any bird. As they were also the sweetest singers, as now, you may imagine that none was their superior in the bird world.

Of course the nightingales were very proud. This was natural. One young fellow, however, became so vain as to be almost unbearable.

"Who is so fine a singer as I? Who has so handsome a dress as I?" This was the burden of his song day after day.

But the time came when the young nightingale warbled no more in the moonlight. A fairy, tired of listening to his boasting, came to him.

"Idle braggart," said she, "this night will you cease your trilling. Hereafter you will sing and sing and sing, but the notes of the night."

Wife as a Friend.

The wife who is her husband's comrade has little to fear. It is one of the greatest factors in keeping him always hers that of being "friends" with him, in being truly interested in all he does and plans and wishes for, and having the comrade sense of humor that can always laugh at his jokes and make merry by the way, instead of taking account of everything with terrible seriousness.

If you can smile openly with him at his fancy for another, and even tease him a little about it, the fancy isn't likely to ever amount to very much. What is forbidden is, we know, always more tempting. Many and many a situation has been saved because a wife was so true a friend to her husband that she persistently refused to regard it seriously.

Riddles.

If a man buried his head on the pillow, what article of stationery

honey bees are ingeniously and elaborately designed with a view to providing good places of hiding for the honey. Each is circular, hollow, shaped like a horn. In each the honey is secreted in a round knob at which would be the mouthpiece end of the horn, and the five are arranged in a ring side by side with the honey knobs aloft. Though the honey store is obvious from without, yet the insects who would sip it must creep into the flower and penetrate with a long nose up the curving horn to the knob.

Sometimes the petals are all joined together into a tube, and the sweet nectar simply exudes from the inner side of the wall and collects at the bottom. This is the case in the dead nettle, the tube of which forms so toothsome a morsel that some children call it "suckles." The honey-suckle is similarly planned, and its sweetness is so striking as to have furnished its name.

The monkshood has quaint necessities. If the hood be drawn back there suddenly spring into sight two objects on long stalks which are sometimes like a French horn, sometimes like a cowl or, looked at sideways, not unlike a pair of doves. Their presence within the hood has provided the nicknames Adam and Eve and Noah's Ark. Thus the honey bags are carefully tucked away and protected.

### MEASURING A TREE.

#### Ingenious Method Pursued by the Maine Woodsmen.

If you were a woodcutter and somebody told you to cut down a pine tree that would give a sixty foot mast for a vessel, how would you go about selecting a tree? You could not spare the time to measure it with a tape line even if that method were practicable. Besides, being a woodcutter you should be able to select a tree of a certain height readily, not by merely looking at it, for this at best is nothing but guesswork.

Now, the woodcutters of Maine have a quick and simple way of taking the measure, and it is worth telling. Assuming that a mast sixty feet in height is wanted, the cutter selects a tree that he thinks will furnish it and then measures off on the ground from the trunk sixty feet less his own height. If he is six feet tall, therefore, he would measure off on the ground fifty-four feet. At this point he puts upright in the ground a pole exactly his own height. Then he lies down on the ground with his feet to the pole, so that his head is just sixty feet from the tree. Lying thus, face upward, of course, he sights over the top of the pole, and the point on the tree trunk on a line with the top of the pole is pretty sure to be sixty feet from the ground.

#### Mounted Fishermen.

On the Californian coast they fish on horseback. After a big blow enormous numbers of squid are sometimes seen washing about among the pounding breakers. When such news comes to the town every man or boy who can bog or borrow a horse goes galloping down to the beach, armed with a six-foot bamboo, at the end of which is a strong steel hook. They dash into the surf, and driving the sharp steel into the squirming jelly-like creatures haul them ashore one by one, and leave them lying high and dry upon the beach, pumping ink and water, and with their long, sucker-rimmed arms coiling about like snakes. These squid sell for a couple of shillings apiece. Their flesh is good for bait; the pen, a long, opal-tinted bone which extends from the tip of the tail to the neck of the animal, forms the cuttle-fish bone of commerce, and the eyes, which when dried look like large dull pearls, find a ready sale among curio dealers.

Our hearts be knoweth, none from Him can hide;  
Our sins He seeth; O, that we may see!  
Though far we strayed, for us doth still abide,  
The Father's love, unbonnded sympathy.

August time, tells on the nerve. But that spiritless, no ambition feeling can be easily and quickly altered by taking what is known by druggists everywhere as Dr. Shoop's Restorative. Within 48 hours after beginning to use the Restorative, improvement will be noticed. Of course, full health will not immediately return. The gain, however, will surely. And best of all, you will realize and feel your strength and ambition as it is returning. Outside influences depress first the "inside nerves" then the stomach, heart, and kidneys will usually fail. Strengthen these failing nerves with Dr. Shoop's Restorative and see how quickly health will be yours again. Sold by—ALL DEALERS.

### SUMMARY OF FRUIT CROP REPORT.

Weather conditions in Canada have been favorable during the month of July for the fruit industry.

Apples are estimated somewhat lower for July than for June. Early and fall apples are estimated as slightly above medium. Winter apples at less than a medium crop. Quality good.

Pears are reported a light crop except in British Columbia and southern Ontario where a medium crop is expected.

Early peaches are reported a full crop.

Late peaches are reported light to medium.

Cherries have proved a medium crop and have sold at fair prices.

Plums are reported light generally. In British Columbia certain sections report a medium crop. In the Georgian Bay District three or four varieties promise well.

Grapes are reported a full crop.

Strawberries and Raspberries have been reduced by dry weather, but the average has been very good.

Small fruits, other than the above, are yielding or promise a full crop.

Tomatoes are a medium crop, ripening early.

Insects and Fungous diseases are not so prevalent as usual.

The United States report prospects for a medium crop of apples, evenly distributed in season and territory. Peaches are a full crop. Other fruits good.

Great Britain has prospects for a medium crop of apples, other fruits being good.

#### Unprofessional.

Sir Arthur Conan Doyle, author of the immortal "Sherlock Holmes," has been telling a funny story. He was once called into consultation when a burglary took place at a public house in Haslemere, where he was then living. He carefully examined the spot and made elaborate notes, and while he was doing so the village constable, a large, red-faced man, went out and seized the actual culprit and marched him off to jail.

#### He Might Break Them.

Lady Aylesford has had her pet dog fitted with gold rimmed glasses. She explains when her friends smile that the poor doggie's eyesight has become so defective that she had to take him to her oculist. This pug would not show up very well in a dog fight, but it might be interesting to see him wipe his glasses on the grass after entertaining a bone.

Pain anywhere stopped in 20 minutes sure with one of Dr. Shoop's Pink Pain Tablets. The formula is on the 25-cent box. Ask your Doctor or Druggist about this formula! Stops womanly pains, headache, pains anywhere. Write Dr. Shoop, Racine, Wis for free trial, to prove value of his headache, or Pink Pain Tablets. Sold by—ALL DEALERS.

But the time came when the young nightingale warbled no more in the moonlight. A fairy, tired of listening to his boasting, came to him.

"Idle braggart," said she, "this night will you cease your telling. Hereafter you will sing and sing and sing, but not the notes of the nightingale. And your relations will wear a less brilliant garb from this time."

All at once the nightingale became a little brook. The brooks, which heretofore were silent, now murmured softly and musically, but the vain nightingale no longer burst into glorious melody of song.

As for the other nightingales, although they continued to sing as sweetly as ever, their plumage became a modest reddish brown color instead of having its former radiant hues. So were they punished.

many and many a situation this man saved because a wife was so true a friend to her husband that she persistently refused to regard it seriously.

#### Riddles.

If a man bumped his head on the ceiling, what article of stationery would he be supplied with? Ceiling whacks (sealing wax).

What is the difference between a silly woman and a mirror? One speaks without reflection; the other reflects without speaking.

What is the difference between a lady and a postage stamp? One is a female, the other mail fee.

Why are two "it's" like hops? Because they make beer better.

If a bear went into a linen shop what would he want? He would want muzzlin'.

# A House of Mystery

OR, THE GIRL IN BLUE

## CHAPTER XX.

"Now," I said, turning to Gedge, "perhaps you will show me over this new domain of mine. They seem to be pretty comfortable quarters, at any rate."

He looked at me strangely.

"You surely don't mean, sir, that you wish me to show you over your own house?" he said with incredulity.

"Of course I do," I answered. "I've never been over it yet, and I think I may as well embrace the opportunity now."

"But ha'n't you better go to your room and rest? It will surely do you good. I'll ring for Rayner, the valet." He spoke as though solicitous of my welfare.

"I want no valets, neither do I require rest," I answered impatiently.

"I mean to fathom this mystery."

"But pardon me," he said deferentially, "there is no mystery, as far as I can see. You accidentally struck your head against the statue while passing through the drawing-room, and were rendered unconscious. The blow has, according to the doctor, impaired your mental capacity a little. In a few days you'll be all right again. Poor Mrs. Heaton!—she's awfully upset."

"I will not have her called Mrs. Heaton!" I cried in indignation. "Understand that! I have no wife—and a hag like that I certainly would never marry."

He raised his eyebrows with a gesture of regret, sighed, but hazarded no remark.

"Come," I said, "show me over the place. It will be a most interesting visit, I'm sure." And I laughed, reflecting upon my extraordinary position, one absolutely unparalleled in man's history.

"But before doing so will you not sign one or two cheques?" he urged, glancing at his watch. "The postman will call for the letters in half an hour, and they must be despatched to-day."

"What cheques?"

"There are six," he answered, taking out a large cheque-book and opening it. "I've already made them out if you will kindly sign them."

I glanced at them. All six were for large amounts, each considerably over a thousand pounds.

"They relate to business transactions, all of which are exceedingly good bargains," he explained.

"Well," I said, laughing again, "I've never before signed cheques for such big amounts as these. But here goes, if you wish. Whether they'll be honored is quite another thing."

And I took up a pen and appended my signature to each, while he placed one by one in envelopes ready directed to receive them.

saw me married?" I cried, absolutely incredulous.

"I was. You were married at St. Andrew's, Wells Street. It was a smart wedding, too, for Mrs. Fordyce was very well known in society, and had a large circle of friends."

"Fordyce?" I echoed, puzzled. "Yes, that was Mrs. Heaton's name before her marriage with you."

"Then she was a widow?" I gasped.

He nodded in the affirmative. I groaned. The affair grew more puzzling now that he declared himself an actual witness of my matrimonial misfortune.

But how could such a thing have taken place without my knowledge? It was impossible. The mystery, like the strange incidents which had preceded this remarkable situation in which I found myself, grew more and more inexplicable each hour.

We went forth together, passing from room to room through the great country mansion. The place was handsome, of rather modern type, furnished glaringly in the manner which bespoke the parvenu. It possessed no mellow, time-worn appearance, as did the dear old Manor House beside the Severn. The furniture and hangings were too apparently of the Tottenham Court Road type, and the art displayed was that of the art-furnisher given carte blanche to furnish with the newest and most fashionable fancies in the matter of wall-papers, dados, cornices, and art-pottery. There were art-carpetts and art-curtains, art-cupboards and art-chairs, art-china and art-chintzes. Art was everywhere in painful enamel and impossible greens. There were pictures, too, but different, indeed, to the long row of noble faces with their ruffles and doublets and their arms painted on shields in the corners that looked down so solemnly in the great hall at Heaton. The pictures in that modern mansion were of the queue-de-sicle French school, daubs by the miscalled impressionists, and some rather too chic to be decent.

That a large amount of money had been expended upon the place I could not doubt, but the effect was that of dazzling the gaze by color, and nowhere seemed there a good, comfortable, old-fashioned sitting-room. All the apartments were arranged to please the eye, and not for personal comfort. The house was just the kind that a man suddenly successful in the city might set up in the vain endeavor to develop into a country gentleman; for to become such is the ideal of every silk-hatted business man, whether he trades in stocks or stockings.

"That I should be compelled to show you over your own house is,

ways quite straight?" I said, as we walked together down a long carpeted corridor.

He looked at me in hesitation. "It's, of course, business," he answered—"sharp business. I don't mean to imply that the dealings at Winchester House are any more unfair than those of any other financier in the City; but sometimes, you know, there's just a flavor of smartness about them that might be misconstrued by a clever counsel in a Criminal court."

"What?" I cried, halting and glaring at him. "Now, be frank with me, Gedge. Tell me plainly, have I ever swindled anybody?"

"Certainly not," he said, laughing. "Why, it's this very smartness that has made you what you are to-day—a millionaire. If you had not been very wide awake and shrewd you'd have been ruined long ago."

"Then, I suppose, I'm well known in the city, eh?"

"Your name's as well known as Bennett's clock, and your credit stands as high as any one's between Ludgate Hill and Fenchurch Street."

"Extraordinary!" I said. "What you tell me sounds like some remarkable fairy tale."

"The balance at your banker's is sufficient proof that what I say is truth," he remarked. "There may be a good many fairy tales in certain prospectuses, but there certainly is none in your financial soundness."

(To be Continued.)

## A FOE TO MALARIA.

That most animals have some specific function to perform is well known. Now, scientists claim that a species of fish exists in Australian waters which feeds on the larvae of mosquitoes and so reduces the prospects of malaria. It belongs to a family of carnivorous or flesh-eating fish which is frequently found in the temperate and tropic zones, and usually in shallow water. Very small in size, being only about one and a half to two inches in length, it has, in the male, yellow and black striped fins, while the eye is of a bright blue. The fins during certain seasons of the year acquire great brilliancy.

## SHARED THE HONORS.

Jukes—"Who was the best man at the wedding?"

Jenkins—"Well, I'm not sure. The bride's father had all the bills to pay, the bridegroom had to buy diamond brooches for the bridesmaids, and the guests had to give handsome presents; upon my word, I think the best man was the clergyman—he was the only one who made anything out of it."

## A CONTEST WORTH ENTERING.

A Life Annuity of FIFTY-TWO DOLLARS is offered by the ORANGE MEAT people to the one sending in the largest number of bottoms of ORANGE MEAT packages before May 31, 1909. This means that the winner will receive One Dollar EVERY WEEK, or FIFTY-TWO DOLLARS every year, as long as he or she lives, or they can exchange it for a CASH PRIZE of SEVEN HUNDRED DOLLARS. Besides the above there is a second Cash Prize of ONE HUNDRED DOLLARS, also other Cash Prizes as follows:—

### STRIKING GRATITUDE.

A lawyer in a Western American town interested himself in the case of a man accused of murder. As a result, the culprit, who had had much provocation, got off very lightly.

Six months afterwards a man, armed to the teeth, appeared in the lawyer's office.

"Are you Lawyer Blank?" he roared.

"Yes," was the reply.

"And are you the fellow that helped Dingo Jack at Court?"

The lawyer, thinking his time had come, again answered: "Yes."

"Well," said the man with the gun and knives, "I'm Jack's pardner, an' I've come to pay you. I haven't any money, but I'm a man of honor. Anybody in town you don't like?"

The other assured him there was not; but the man looked incredulous, and said—

"Put on your hat, and take a walk with me. See anybody you don't like, just point him out and I'll pop him."

### A POINT OF ADVANTAGE.

"Of course, the railways owe the public a great deal," said Mr. Dustin Stox; "but you must also remember that the public is indebted to the railways."

"Yes," answered the critical citizen, "but the railways are in a position to collect."

### Just the Thing That's Wanted.

A pill that acts upon the stomach and yet is so compounded that certain ingredients of it preserve their power to act upon the intestinal canals, so as to clear them of excreta the retention of which cannot but be hurtful, was long looked for by the medical profession. It was found in Parmelee's Vegetable Pills, which are the result of much expert study, and are scientifically prepared as a laxative and an alternative in one.

They are sold in a box of ten pills, and are very handy with the dark season.

Yes, indeed, "Blood will tell" when it comes to the work of all blood purifiers.

"I understand," said the lawyer for the defense, "I saw a tomato, however well aimed, could not have caused a black eye." "But it was a black and blue honor."

"Oh, Halloway's Corn Cure a trial. It removed ten corns from one pair of feet without any pain. What it has done once it will do again."

"First Mother's reading letter from son in college." "Harry's letters always send me to the dictionary." "Second Mother (resignedly)." "That's nothing; Jack's always send me to the bank."

Play what you will, and go where you like, you cannot get a better, more delicious tea than "Milkmaid."

here goes, if you wish. Whether they'll be honored is quite another thing."

And I took up a pen and appended my signature to each, while he placed one by one in envelopes ready directed to receive them.

"Now," he said at last, "if you really wish me to take you round I'll do so, but the whole thing seems so droll and absurd that I hope, sir, you'll excuse my doubts as to your insanity."

"Well, why do you think I'm insane?" I asked, looking straight at him. "Do I look like a madman?"

"Not at all. With your head swathed in those bandages, you look like a man who's received a serious injury."

"Of course, that confounded old charlatan Britten put forward the suggestion that I'm not in my right mind!" I said. "But I tell you quite calmly, and without fear of contradiction—indeed, I could swear upon oath—that never in my life have I entered this place or set eyes upon you or upon that painted old girl before to-day. Now, if you were in my place, surely you would resent being called husband by a woman whom you don't know from Adam; you wouldn't relish being condemned as a lunatic by an idiotic old country quack, and being imposed upon all round by persons in whom you have not the slightest interest."

His face relaxed into a smile.

"If I may be permitted to advise you," he said, "I think it best not to discuss the matter further at present. A solution must present itself before long. Meanwhile your intellect will be rendered the clearer by response."

"I've already told you that I don't intend to rest until I've extricated myself from this absurdly false position," I said determinedly. "I feel absolutely certain that I've been mistaken for some one of the same name."

He shrugged his shoulders. He was evidently a shrewd fellow, this man who said he was my secretary and was apparently a very confidential servant.

"I'd like to know what to reply to Mawson's cables," he said. "You really ought to take some notice of such a marvellous stroke of good fortune. His discovery means fabulous wealth for you as holder of the concession."

"My dear sir," I said, "for mercy's sake don't bother me about this fellow and his confounded pans. Reply just as you like. You seem to know all about it. I don't—nor I don't want to know."

"But in a case like this I do not care to act on my own discretion alone," he protested. "They are evidently awaiting a reply in Dawson City."

"Let them wait," I said. "I don't want to bother my head over matters in which I can have no possible concern. This alleged matrimonial alliance of mine is of far more importance to me than all the gold in the Klondyke."

"Well, the lady is your wife, so why worry further about it?" he said.

"And how do you know, pray?" "Because I was present at the ceremony."

I looked at him for a moment, unable to utter further words.

"I suppose you'll tell me next that you were my secretary in my bachelor days!" I said at last.

"Certainly I was."

"And you say that you were actually present at the church, and

to develop into a country gentleman; for to become such is the ideal of every silk-hatted business man, whether he trades in stocks or stockings.

"That I should be compelled to show you over your own house is, to say the least, very amusing," said Gedge, as we were passing up the grand staircase. "If people were told of this they wouldn't believe it possible."

"I myself don't believe what you tell me is possible," I remarked. "But who gave orders for this furniture?"

"You did."

"And who chose it—approved of the designs, and all that sort of thing?"

"You certainly did," he answered. "Some of the ideas were, of course, Mrs. Heaton's."

"I thought so. I don't believe myself capable of such barbaric taste as those awful blues and greens in the little sitting-room."

"The morning-room, you mean."

"I suppose so. The whole place is like a furniture show-room—this style complete, thirty-five guineas and so on. You know the sort of thing I mean."

He smiled in amusement at my words.

"Your friends all admire the place," he remarked.

"What friends?"

"Sir Charles Stimmel, Mr. Larcombe, Lady Fraser, and people of that class."

"I never heard of them in all my life. Who are they?" I inquired, interested.

"Friends of yours. They visit here often enough. You surely ought to know them. Lady Fraser is your wife's dearest friend."

"Fraser?" I said reflectively.

"The only Fraser I know is a baker in Clare Market, who supplies my old servant, Mrs. Parker, with bread." Then, after a pause, I added, "And you say that these people are friends of mine? Have I many friends?"

"Lots. A rich man has always plenty of good-humored acquaintances."

"They like to come down here for a breath of country air, I suppose, eh?" I laughed.

"That's about it," he answered.

"A good many of them are not very sincere in their friendship, I fear. The man who has money, lives well, keeps a good table, and has choice wines in his cellar need never be at a loss for genial companions."

"You seem to be a bit of a philosopher, my friend," I remarked.

He smiled knowingly.

"I haven't acted as your secretary without learning a few of the crooked ways of the world."

"What?" I exclaimed. "Don't I always act honestly, then?" This was something entirely new.

"Nobody can be honest in finance."

"Well," I said, resenting his imputation, "I wasn't aware that I had ever swindled a person of sixpence in my life."

"Sixpences in such sums as they deal in at Winchester House don't count. It's the thousands."

We passed a couple of gaping maid-servants in long-stringed caps, who stood aside, looking at me in wonder. No doubt the news that a demented man was in the house had reached the servants' hall. I was, in fact, on show to the domestics.

"Then you mean to imply that these financial dealings of mine—of which, by the way, I have no knowledge whatsoever—are not al-

as long as he or she lives, or they can exchange it for a CASH PRIZE of SEVEN HUNDRED DOLLARS. Besides the above there is a second Cash Prize of ONE HUNDRED DOLLARS, also other Cash Prizes as follows:—

Ten Cash Prizes of TWENTY DOLLARS each.

Ten Cash Prizes of TEN DOLLARS each.

Twenty Cash Prizes of FIVE DOLLARS each, and ONE HUNDRED Cash Prizes of ONE DOLLAR each.

The only condition attached is that you cut out the bottoms of the ORANGE MEAT packages and send them in to ORANGE MEAT, Kingston. The bottom of a Jumbo package counts equal to Three of the smaller size. You should be able to win one of the above prizes if you start immediately and get your friends to help you. Send your name and address to ORANGE MEAT, Kingston, TO-DAY, and state that you are entering the contest. It is surely worth trying for.

If people would do half the things they are going to do to-morrow what a progressive old world this would be.

Pleasant as syrup; nothing equals it as a worm medicine; the name is Mother Graves' Worm Exterminator. The greatest worm destroyer of the age.

Mother—"If you marry Robert, I swear that I'll never set foot in your house." Daughter—"Please put that down in writing. I'd like to give your promise to Robert for a wedding present."

A Cure for Fever and Ague. — Parmelee's Vegetable Pills are compounded for use in any climate, and they will be found to preserve their powers in any latitude. In fever and ague they act upon the secretions and neutralize the poison which has found its way into the blood. They correct the impurities which find entrance into the system through drinking water or food and if used as a preventive fevers are avoided.

Minister—"I made seven hearts happy to-day." Parishioner—"How was that?" "Married three couples." "That makes only six." "Well, do you think I did it for nothing?"

"Captain, we are entirely out of ammunition," said an orderly obsequious to his commander on a field-day. "What? Entirely out of ammunition?" exclaimed the captain. "Yes, entirely out," was the reply. "Then cease firing," said the captain.

## THE TORTURES WOMEN SUFFER

Can be Relieved by Keeping the  
Blood Supply Rich With Dr.  
Williams' Pink Pills.

A woman needs a blood building medicine regularly just because she is a woman. From maturity to middle life, the health and happiness of every woman depends upon her blood, its richness and its regularity. If her blood is poor and watery she is weak, languid, pale and nervous. If her blood supply is irregular she suffers from headaches, backaches, sideaches and the other unspeakable distress which only women know. Some women have grown to expect this suffering at regular intervals and to bear it in hopeless silence. But women would escape much of this misery if they took a box or two of Dr. Williams' Pink Pills to help them over each critical period. These Pills actually make new blood. They help a woman just when nature makes the greatest demand upon her blood supply. They have done this for thousands of women throughout Canada, why not for you?

Mrs. Joseph Kinney, Gilbert's Cove, N. S., says:—"For ten years I suffered from nervousness and those troubles that make the lives of so many women one of almost constant misery. At times I would be confined to my bed for weeks. I spent sleepless nights and seemed to lose all courage. I tried several doctors, but they failed to give me any relief. The last doctor I consulted told me frankly that he could not undertake my case unless I would undergo an examination. It was then I decided to give Dr. Williams' Pink Pills a trial. After taking six boxes I was much improved in health, but I continued to take the Pills for a couple of months more when I felt like a new woman, and was enjoying such health as I had not experienced for ten years before. I have had no return of this trouble since, but I have used the Pills once since that time for the after effects of la grippe and the result was all I hoped for. These are plain facts from my own experience and I have always felt that I cannot too strongly recommend Dr. Williams' Pink Pills to the many women who suffer as I did."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## ON THE FARM

### EFFECT OF RUSTY CANS ON MILK.

A late bulletin of the Wisconsin Agricultural Experiment Station, gives some valuable information as to rusty cans, and their effect upon milk for cheese-making. The bulletin points out that cheese makers are not able in all cases to control the coagulation of the milk with rennet.

sufficient nutriment for about thirty-six hours, and any food taken during the first twelve hours or so is probably distinctly detrimental to its well-being. Fasting before death ensures that the crop and intestines shall be emptied of food, and thus prevents decomposition taking place. Another good reason is that the flesh of fowls thus fasted eats better, being less liable to the hardness often found in birds killed shortly after a meal. Thirdly, a fasted bird is much more easily drawn, and the intestines being dry and compact, come away cleanly.

A day's starve, immediately after cooping a bird to be fattened will ensure a good appetite at the start. Many birds, especially somewhat wild ones, will reject a meal if offered soon after confinement, and will finish up by refusing food of any sort, be it ever so tempting. So much is being continually written about feeding fowls that this short article on starving, may perhaps come, (like the occasional fast to man or bird) as a refreshing novelty, and to such should prove useful. This has the advantage of being advice easy to follow, for whatever excuses may be offered for neglecting to feed scientifically, the laziest can hardly find any trouble in starving a fowl.

### THE FEEDING VALUE OF BRAN.

Properly used, the feeding value of bran is a very different thing to the value of bran as food. As a poultry food, by analysis, bran has a place very near the bottom of the list, and many poultry-keepers, noting this, avoid its use; but, even considered as a food, it abounds in body-building elements and bone and feather-forming materials, and, at its price, compares favorably with other food-stuffs as value for money. Good, sound, broad bran has, however, a very great feeding value, apart from the actual food it contains for what may be called its mechanical action. Besides giving necessary bulk, it divides the finer and more expensive meals, and so expose them more fully to the digestive process.

A mash composed of one part (by weight) of bran to four parts ground oats or barley-meal is more thoroughly digested, and in every way more economical, than one of all meal. The best way to make use of bran is to soak or scald a sufficient quantity some hours before, and to dry it off with meal when required. By this method the bran is softened, and to some extent, predigested. If not sufficiently soaked, the roughness is apt to irritate the bowels and cause scouring.

### GOLD IN SOAKED ENVELOPE.

A London firm recently received from a gold miner in Alaska the following curious letter: "Gentlemen, —Enclosed you will find an envelope which you will tear up in small pieces and place in a glass of water; let soak for an hour or so, then stir and drain, and you will find thirty grains of gold for which you will send me a stylographic pen wrapped up in a late newspaper." These instructions were duly carried out, and the gold, value 6s., obtained, in exchange for which the ingenious miner was sent a stylographic pen and two newspapers.

Agricultural Experiment Station, gives some valuable information as to rusty cans, and their effect upon milk for cheese-making. The bulletin points out that cheese makers are not able in all cases to control the coagulation of the milk with rennet. This difficulty is traceable to three sources: viz., the strength of the rennet extract used, the quality of the milk obtained from different cows, and the condition and kind of utensils used. The last is of most concern just now. Previous work at the Wisconsin station has shown that the use of copper, nickel and iron vessels has a deleterious effect on rennet action. In bulletin 162 the effect of iron and rusty pails, cans or vats is considered.

In the experiments conducted the milk was placed in iron dishes and rusty tin pans and was allowed to stand for definite periods. The required time for the coagulation of 50 cubic centimeters of such milk, with a standard solution of one cubic centimeter of a one per cent. commercial rennet, at a temperature ranging from 87 to 90 degrees Fahr., was then observed. Milk in glass beakers were run as controls under similar conditions. The time was noted at the moment the milk just thickened.

The results showed that it required from one to sixteen minutes longer for the same milk kept in the rusty pan to coagulate than in case of the milk kept in the glass beaker. The acidity of the control milk was always higher than that kept in the rusty pan. This difference, however, was not great enough to account for the differences in retardation. Every time that this experiment was repeated, the milk in the rusty pans gave evidence of a retarding influence on the rennet action compared with that in the glass beaker.

Milk that had been allowed to stand in iron dishes for several hours had a peculiar bluish grey color, indicating the presence of iron in solution. The maximum quantities of iron dissolved in the milk ranged from one to one and a half pounds for every thousand pounds of milk. The lower acidity of the milk kept in contact with iron supports the view that the acid of the milk acts upon the iron, and finally causes it to pass into solution. The iron lactates thus formed will increase the solids of the milk, and the retarding influence on rennet action may at least be partly due to this cause.

Milk comes in contact with iron in the form of rusty cans or poorly tinned utensils in practically all creameries and cheese factories. The quality of the milk will, to a large extent, depend upon the condition of utensils into which the milk is poured, kept, and finally hauled to the factory. The degree of influence of iron on milk will depend largely upon the temperature of the milk, the length of time kept in the cans, and the amount of exposed surface.

#### FASTS FOR FOWLS.

Whilst an occasional starve is probably an excellent thing for both humans and poultry, there are three times in the life of a fowl when a 24 hours' fast is to be specially recommended. These occasions are inviolable to fattening. The reason for and on confinement in a coop immediately after birth, before death, the first of these is that Nature has provided the new-born chick with

in exchange for which the ingenious printer was sent a stylographic pen and two newspapers.

## PILES CURED AT HOME

By New Absorption Method.

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box 102 Windsor, Ont.

"It looks very much like rain to-day," remarked a milkman, as he handed a housekeeper her supply of milk. "Yes," agreed the latter, as she peered into the jug, "it usually does!"

In the causes of infant mortality cholera morbus figures frequently, and it may be said that complaints of the bowels are great destroyers of child life. If all mothers would avail themselves of so effective a remedy as Dr. J. D. Kellogg's Dysentery Cordial many a little one could be saved. This Cordial can be given with safety to the smallest child, as there is no injurious substance in it.

If you want to spring a surprise on yourself sit down some evening and count the number of white lies you have told during the day.

If You are Nervous and irritable, take "Ferrovin," the great nerve and blood tonic; you will be a new person by the time you have used a bottle. \$3.00 bottles. All dealers.

Charitable Man (to former blind beggar)—"What! have you recovered your sight?" Beggar—"Well, you see, it's this way. I've lost my dog; and as I can no longer be blind, I have become a deaf-mute."

"Tis Well to Know a Good Thing, said Mrs. Surface to Mrs. Knowwell, when they met in the street. "Why, where have you been for a week back?" "Oh, just down to the store for a bottle of Dr. Thomas' Electric Oil," and Mrs. Surface, who hates puns, walked on. But she remembered, and when she contracted a weak back there was another customer for Electric Oil.

Jaakey—"Fadder, a shentlemans half fallen troo de coal-hole!" Isaac—"Clap re cover over him, kervick, mein sohn, vile I runs for a policeman. Ve must arrest him for tryin' to steal te coals, or he'll sue us for tamages."

10c. The latest success.

# DROVE MILES WITH DEAD MAN

## Gruesome Experience of a Leeds County Farmer.

A despatch from Brockville says: Few men have the gruesome experience of driving for miles beside a dead man, but that was what happened to Frederick Vickery on Wednesday. An old man named William Davis has been living with Vickery, who is a farmer at Lillies, a few miles north of the town. Davis has been ailing for some considerable time past and finally Vickery felt that he could not assume the responsibility any longer. Accordingly he drove the old man into town for the purpose of having him treated at the General Hospital. When Vickery reached the hospital he was horrified to find that his companion was sitting quietly in the buggy, his head slightly forward on his chest, stone dead. As it was not now a case for the hospital the only course left was to summon the police and the coroner. No inquest was considered necessary as the man, who was about seventy years of age, had died from natural causes. Vickery cannot say at what time Davis died.

## Fashion Hints.

### JUMPER EFFECTS.

Modified jumpers are certainly the thing, not only in linens and batistes but in foulards and other summer silks, but they are modifications, and need not be worn over a whole finished blouse as formerly. A blouse is necessary, but it need be only of guimpe depth, though with full-sized sleeves. Sometimes these guimpe blouses are of batiste incrustated with lace, sometimes they are of net and sometimes they are of allover valenciennes lace. One very popular is of white linen trimmed with wavy lines of tiny soutache, while the big embroidered buttons are fitted with simulated scutache buttonholes. The net yoke is finished with plain standing collar, around which a satin cravat is tied. The skirt is trimmed with three bands of stitched linen.

A natural pongee is made up with a plain blouse, while the front of the skirt is laid in a box plait. A little bit of satin in a harmonizing shade of brown forms the piping round the oddly shaped yoke line and also helps to form the belt. The buttons are covered with pongee, and the guimpe may be of allover valenciennes lace or eyelet embroidery. The little frock is quite simple and might be a good model for a gingham or any other inexpensive material. The skirt is plaited, but were the material of a less clinging nature a gored or circular model would be practical.

A little dress of beige batiste is trimmed in rather a graceful way with a piece of eyelet embroidery and a sash of softest liberty satin in a dahlia shade. Needless to say, if the shades of frock and sash are not just exactly right, if either beige or dahlia is the least bit off color, the frock would most signally fail to be a success. The under-blouse for this dress is of tucked net and narrow cluny insertion.

As the embroidery around the line of the knees tends to shorten the stature of the wearer, it is well to avoid using such a decoration ex-

What was once steel gray is now called "silver," a darker shade is known as "pewter," and a still darker shade, almost verging upon black, is called by the unromantic name of "zinc."

Sometimes, too, a color or a shade is acquired by lining sheer material of one color with silk of another color. "Pearl," for instance, is not gray and it is not pink, but an exact pearl shade is procured by lining a gray voile dress with a very faint rose-colored taffeta. "Ivory," too, is acquired in much the same way, only this time a white dress is worn over (to be exact) a biscuit color.

Greens have long been known by distinguishing names, but the addition to the family is "canard," which is so green that it comes very near being blue!

An imported costume is so charmingly planned as to color that even the French have no word with which to describe it, although the nearest is "peacock blue." It is a pale mauve silk voile made up over a lining of natterier blue. Of course, the blending of the colors must be absolutely perfect—neither one must be harsh nor of the wrong tone—but as the imported dress is made, it remains quite the most perfect combination or color among all those which have recently been called by fantastic names.

### 23 MINERS WERE ENTOMBED.

#### Terrible Accident in a Fernie, B. C., Colliery.

A despatch from Fernie, B. C., says: A terrible bump occurred in No. 2 mine, Coal Creek, on Friday morning about 8 o'clock, and as a result some 23 miners were entombed and grave fears were entertained for some time of their getting out alive, as the mine quickly filled with gas and the work of rescue was very slow on this account. A large number of rescuers were speedily set at work to get fresh air to the men, but many yards of rock and coal had to be dug through before the men could be reached. After several hours of interrupted endeavor the rescue party reached the men and succeeded in rescuing 20 of them alive. There are three still entombed, however.

A GERMAN COLONY.

## THE WORLD'S MARKETS

### REPORTS FROM THE LEADING TRADE CENTRES.

#### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

##### BREADSTUFFS.

Toronto, Aug. 4.—Ontario Wheat—Old fall wheat quoted at 83c to 84c; new at 81c to 82c.

Manitoba Wheat—Quotations at Georgian Bay ports: No. 1 northern, \$1.10½; No. 2 northern, \$1.07½; No. 3 northern, \$1.06½.

Barley—No. 2, 58c to 60c; outside; No. 3X, 56c to 57c.

Bran—Quoted at \$16 to \$18 per ton in bulk, outside; in bags, \$2 more.

Corn—No. 3 yellow, nominal at 55c, Toronto freights; kiln-dried, 52½c to 53c.

Oats—Ontario No. 2 white, nominal, 44c to 46c outside; Manitoba, No. 2, 48c, lake ports; No. 3, 46½c; rejects, 45c.

Shorts—\$20 to \$21 in bulk outside; in bags \$2 more.

Flour—Manitoba, first patents, \$6; seconds, \$5.40; strong bakers' \$5.30; Ontario winter wheat patents, \$3.20 to \$3.30.

##### COUNTRY PRODUCE.

Butter—Receipts are still large and still the market keeps strong. Creamery, prints . . . . . 24c to 25c

do solids . . . . . 23c to 24c

Dairy prints, choice . . . . . 23c to 24c

do ordinary . . . . . 21c to 22c

Dairy, tubs . . . . . 21c to 22c

Inferior . . . . . 17c to 18c

Cheese—12½c and 13c for large

and 13c to 13½c for twins.

Eggs—Prices are easier at 20c to 21c.

Beans—Prices are \$2 to \$2.10 for prime and \$2.10 to \$2.20 for hand-picked.

Potatoes—Ontarios, 90c to \$1.15 per bushel; Americans, \$3.35 to \$3.60 per barrel in car lots on track here.

##### PROVISION MARKET.

Pork—Short cut, \$23.50 per barrel; mess, \$19 to \$13.50.

Lard—Tierces, 12c; tubs, 12½c; pails, 12½c.

Smoked and Dry Salted Meats—Long clear bacon, 11½c to 11½c; tcons and cases; hams, medium and light, 14½c to 15c; hams, large, 12½c to 13c; backs, 17½c to 18c; shoulders, 10c to 10½c; rolls, 10½c to 11c; breakfast bacon, 15c to 15½c; green meats, out of pickle, 1c less than smoked.

##### MONTREAL MARKETS.

Montreal, Aug. 4.—Flour—Manitoba spring wheat patents, \$6.10 to \$6.20; second patents, \$5.50 to \$5.70; winter wheat patents, \$5 to \$5.50; straight rollers, \$4.25 to \$4.50; in bags, \$1.95 to \$2.10, extra, \$1.50 to \$1.70.

Rolls Oats—\$2.50 in bags of 90 pounds.

Oats—No. 2, 48c; No. 3, 47c; rejected, 46c.

Cornmeal—\$1.85 to \$1.95 per bag. Millfeed—Ontario bran, in bags, \$20.50 to \$21.50; shorts, \$23 to \$24; Manitoba bran, in bags, \$22 to \$23; shorts, \$24 to \$25.

Provisions—Barrels short cut mess, \$22.50; half barrels, \$11.50;

## HEALTH

### HEART-DISEASE IN CHILDREN.

Diseases of the heart are generally supposed to be the fate of adults and not of children and this is largely true, although there are exceptions to the rule, if rule it can be called.

These exceptions are generally the result of the acute infectious disorders in childhood, such as scarlet fever. An attack of rheumatic fever in childhood is almost certain to affect the heart, but heart weakness may be the sequel to any debilitating disease.

The symptoms of heart trouble in children are very much the same as in adults. There may be a feeling of distress round the heart, or even of actual pain. There will almost certainly be a rapid pulse and shortness of breath on exertion, accompanied by great sensations of fatigue. The sufferer is subject to attacks of the "blues," a small or capricious appetite is usual, with consequent loss of flesh. The child will sometimes start from sleep in great agitation and terror with a rapidly beating heart, and chorea—St. Vitus's dance—is often an accompaniment of a damaged heart.

In these cases, on placing the ear to the region of the heart a distinct blowing sound or "murmur" will be heard, and this is a proof that the valves are not doing their work properly.

Children often outgrow these valvular affections of the heart, and the danger with them is not so much in the immediate present, as in the future. There is danger that the heart may become so far damaged that it will meet badly the demands made upon it by adolescence.

In the treatment of this condition rest is of the greatest importance, drugs being only secondary. To establish and rigidly carry out a proper mode of life, and then rest, rest, rest, is where the difficulty comes in. It is impossible to make a little, restless, active child understand the importance of keeping quiet, and this makes it absolutely necessary that watchfulness on the part of the parent or teacher should not be relaxed. Stairs should be taken slowly, running should be forbidden, and the child should not be allowed to wrestle with other children. Skipping-ropes and hoops and all toys calling for violent exercise should be put out of sight, and a daily effort be made to keep the child amused and occupied in a quiet fashion. A happy medium must be found between spoiling the child and allowing it to cry violently, and this is a matter for all the tact that can be exerted. The medical treatment will of course be in the hands of the physician.—Youth's Companion.

### WHEN VISITING SICK.

1. Let the invalids talk of themselves first. I have noticed particularly with those who are much alone, that they want to tell what they have been doing, who has called, and a little about their aches and pains. After that they will gladly listen to anything that you may have to say.

2. Do not impress upon them what a very good time you are hav-

fail to be a success. The underblouse for this dress is of tucked net and narrow cluny insertion.

As the embroidery around the line of the knees tends to shorten the stature of the wearer, it is well to avoid using such a decoration except when the frock is intended for a rather sylphlike figure. The rage of the moment is for height, either natural or simulated, so it would never do to lose the advantage of an inch.

A dotted foulard is made on a most excellent model, which allows for the natural draping of the silk. The scallops may be hand embroidered or bound with a soft silk in a plain shade to match the frock. The skirt is neither gathered nor plain, yet it reaches a sort of happy medium where the silk neither stretches nor is allowed to be ungainly and full.

The underblouse may be of any lace or of plainly tucked white organdie; as frocks of foulard may be worn for a day's shopping in town in midsummer, a good washable guimpe is far preferable to a handsome lace yoke.

The hats show nothing startlingly new, save a sort of warm weather simplicity which is appropriate to the season. The long sleeve is surely making a hard fight for popularity, and it seems as though it will soon displace its predecessor.

Colored handkerchiefs become more and more in vogue every day, and now, when they match not only the hat but the parasol, they are almost a rage. The tiny glove mouchoirs are extremely ornate, and a dainty corner peeping forth from the chapeau's gauntlet is most attractive.

In ordering a dress you no longer say a yellow—you express in a single word the exact shade of dress you desire. You may order "champagne," which is a little bit lighter than yellow and not quite so faint as cream color. You may order "maize," which is the shade darker than champagne. You may order "bisquit," a color slightly grayer than yellow itself. The latter is designed by the name of "canary." Indeed, it will take a guide book to remind one of exactly the word required for exactly the color desired.

Grays, too, have been revolutionized by this new desire to give an appropriate name to each shade.

interrupted endeavor the rescue party reached the men and succeeded in rescuing 20 of them alive. There are three still entombed, however.

## A GERMAN COLONY.

### Sale of Twenty Thousand Acres of Land Near Calgary.

A despatch from Calgary says: An important sale has been made by the Canadian Pacific Railway of 20,000 acres of land within the irrigation block to German farmers from North Dakota. The area is situated northeast of the city of Calgary. A majority of the colonists go into occupation immediately, and the remainder next spring. This, with the German farmers already settled in the locality, makes the nucleus of one of the largest German colonies in the west. It is expected that a large number of Germans now settled in the Dakotas will join this colony shortly.

## TERCENTENARY STAMPS SALE

### Big Demand From Collectors all Over the World.

A despatch from Ottawa says: The Postoffice Department reports that the sale of special issues of stamps in commemoration of the Quebec Tercentenary has now reached a total of twenty-nine millions, aggregating \$589,000. There has been big demand for the stamps from collectors all over the world. The issues of the various denominations will be exhausted in a few days, and no more will be printed.

## A FATAL SHOCK AT QUEBEC

### Percy Daniels Comes in Contact With Live Wire.

A despatch from Quebec says: While installing a motor in a cold-storage warehouse on Wednesday Mr. Percy Daniels received a shock from a live wire, as a result of which he died an hour later. Deceased was well known in Toronto, where some years ago he worked for the General Electric Company. He was a nephew of Mr. H. B. Angus, director of the Bank of Montreal, an Englishman by birth, about 30 years of age, and unmarried.

# THE MICE WERE OFF DUTY

## Their Absence From Ship Almost Caused a Naval Disaster.

A despatch from London says: While the British submarine flotilla was manoeuvring off Folkestone, No. 9 was seen to be falling behind, flying a signal of distress. A rescue party was organized, and the crew, consisting of two officers and nine men, were found unconscious in the boat.

It seems that the officers were in the conning tower, and, noticing that no attention was paid to the signals they sent below, descended the hatches and saw the crew lying about unconscious from the fumes of petrol, to which they, too, fell victims. The men were finally resuscitated on being brought to the open air. The accident, which

might occur at any time in any submarine, was due to the failure of certain springs to work properly on account of the rolling of the boat. These springs are connected with the valves by which the noxious gases are expelled from the boat.

It had been the custom until recently for British submarines to carry white mice in the well. These little animals are peculiarly susceptible to the fumes of petrol, and as the heavy gas invades the well first their squeaking serves as a warning in the case of an accident like the recent one. Several weeks ago the British Admiralty ordered that the mice should be carried no longer.

Cornmeal—\$1.85 to \$1.95 per bag. Millfeed—Ontario bran, in bags, \$20.50 to \$21.50; shorts, \$23 to \$24; Manitoba bran, in bags, \$22 to \$23; shorts, \$24 to \$25.

Provisions—Barrels short cut mess, \$22.50; half barrels, \$11.50; clear fat backs, \$23; dry salt long clear backs, 11c; barrels plate beef, \$17.50; half barrels do., \$9; compound lard, 3½c to 9½c; pure lard, 12½c to 13c; kettle rendered, 13c to 13½c; hams, 12½c to 14c, according to size; breakfast bacon, 14c to 15c; Windsor bacon, 15c to 16c; fresh killed abattoir dressed hogs, \$9.75 to \$10; live, \$6.85 to \$7.

Eggs—Selected stock, 23c; No. 1, 20c, and No. 2, 16c per dozen.

Cheese—Westerns are quoted at 12c to 12½c and easterns at 11½c to 11½c.

## UNITED STATES MARKETS.

Buffalo, Aug. 4.—Spring wheat—Firm; No. 1 Northern, carloads, store, \$1.17½; Winter firmer. Corn—Lower; No. 3 yellow, 82c; No. 4 yellow, 81c; No. 3 corn, 80c; No. 4 corn, 79c; No. 3 white, 84c. Oats—Lower; No. 2 white, 62½c; No. 3 white, 61c; No. 4 white, 60c. Barley—Feed to malting, 60 to 65c.

New York, Aug. 4.—Spot steady; No. 2 red, 98½c to \$1 elevator; No. 2, \$1.00½ f.o.b. affloat; No. 1 northern Duluth, \$1.22½ f.o.b. affloat; No. 2 hard winter, \$1.01½ f.o.b. affloat.

## LIVE STOCK MARKET.

Toronto, Aug. 4.—Some lots exporters' cattle were on sale. A load brought \$5.30 per cwt. The range was \$5 to \$5.30 for good, and \$4.80 to \$5 per cwt. for light ones.

The price for choice butchers' cattle was around \$5 per cwt. The general quotations were:—Good loads of butchers' cattle, \$4.50 to \$4.90; medium, \$3.75 to \$4.35; ordinary, \$2.50 to \$3.50; cows, choice, \$3.50 to \$4.25; cows, common, \$2 to \$3 per cwt. Cannery sold at \$1 to \$2 per cwt.

Stockers were worth \$3 to \$3.75 per cwt. Light loads sold at \$2.50 to \$3 per cwt.

Calves were worth \$3 to 5½c per pound.

Export ewes were firm at \$3.75 to \$4 per cwt. Lambs were quoted at 5 to 6c per pound.

Select hogs were still quoted at \$6.90 per cwt., fed and watered. Lights and fats were worth \$6.50 per cwt.

## A PASTOR DROWNED.

### Baptist Minister of Beamsville Was Attending Picnic.

A despatch from Beamsville, Ont., says: Rev. G. B. Brown, pastor of the Baptist church here, was drowned on Thursday afternoon at Jordan Harbor, while attending the Sunday school picnic of the Baptist church. Mr. Bert McEnteer was swimming just ahead of Mr. Brown, when the latter called for assistance, saying he was tired. Mr. McEnteer turned and went back, and Mr. Brown put his hand on his shoulder. He was being assisted to shore when he suddenly sank, drawing Mr. McEnteer with him. The latter freed himself and rose to the surface, but was unable to render assistance. Deceased was 52 years of age, being born at Brownsville in 1856.

Lord Roberts will go as far west as Banff.

have been doing, and have called, and a little about their aches and pains. After that they will gladly listen to anything that you may have to say.

2. Do not impress upon them what a very good time you are having in the world, while they are out of it all.

3. Usually try to bring some little thing to them. It need not be expensive, but a single flower, a bunch of grapes, a potted plant, or a little leaflet. All these things relieve the monotony of their existence.

4. The weather often depresses sick people, and if practical it is advisable to call on stormy days, or on the second day of a long storm, thus bringing a little sunshine to them.

## HOW TO STOP NOSE BLEED.

A simple way of stopping nose bleedings is to wind a piece of tissue paper about two inches long into a tight roll half the size of the little finger. This is then placed in the mouth under the upper lip, as far up as it can go. Of course this brings it just beneath the nose, and with the tongue the roll is kept in position. The advantage of this is that the nose presses against the arteries leading to the nasal passages, and stops the blood before it can reach them.

In very severe cases tying a handkerchief around the arms and legs, making the bandages tight enough to stop circulation, effectually stops the nose from bleeding. In removing the bandages all must not be taken off at once, but each one slowly, that the blood may not flow quickly, breaking out again at the weak place. When the bleeding is so severe as to require this treatment it would be well to call a physician.

## G. T. PACIFIC OPENED.

### The First Train From Winnipeg to Battle River.

A despatch from Winnipeg says: A new epoch in transportation in the west was marked on Thursday morning, when the first train pulled out for the west over the G. T. P. It consisted of three cars—England, Ireland and Transcontinental—and had on board General Manager Morse and all the western officials of prominence, and eighteen guests. They will inspect a line right through to the end of the steel at Battle River, 675 miles west, completing preparations for opening the line for traffic. Upon their return it is expected the first timetables for passenger and freight service will be announced.

## THREW MAN OVERBOARD.

### Heartless Action of Mate of the Steamer Standard.

A despatch from Kenora says: During an altercation on Monday afternoon on board the steamer Standard, a work boat of Sutton & McArthur, a Swedish foreman in their employ threw overboard a young Scotchman named Robert McKay. All means were taken to rescue him, but without avail, and during the excitement that followed the Swede disappeared. A search for the Swede has been instituted.

Hamilton Board of Health want milk dealers to place their names on bottles, and be responsible for the contents.

The British Admiralty has exonerated both Lord Charles Beresford and Sir Percy Scott in connection with the signal incident.

## YOUNG FOLKS

### A GAME OF TWO.

While their mother was sick, Ted and Jimmy were spending two weeks in the country at Uncle Joe's. He was a fine uncle, they both thought; but much of the time he was busy with his writing, and then the hours hung heavy. The novelty of the little farm was worn off; there was no place to fish; and the only horse on the place was Uncle Joe's own saddle-horse, too powerful for small boys to be trusted alone with. Uncle Joe knew all this, and he was not surprised or the third morning to be roused from work by Ted, who entered and sat down with a gloomy sigh.

"What's the matter?" he inquired. "I want to play baseball, Uncle Joe."

"Why don't you?"

"There's only Jimmy and me, and two can't. There's—there's more fun in places where there's a lot of boys, don't you think, Uncle Joe?" Ted spoke delicately, for he did not wish to hurt his uncle's feelings; but Uncle Joe understood. He always had a way of understanding the boys. "You might play wall-ball," he suggested.

"What's that?" inquired his nephew.

"You need," said Uncle Joe, "a ball, not too hard, four barrel-staves, a shingle, and the back of a wood-shed."

Ted's eyes opened wide. "Sounds like a funny game!"

"You get the barrel-staves, and I'll come out and show you," replied his uncle.

When the staves, the shingle, and Jimmy were collected, Uncle Joe sharpened one end of three of the staves, and stuck them in the ground edgewise in a row a foot apart about five feet out from the wood-shed. Then he laid the shingle across their tops. The fourth staff he shaved down neatly for a third of its length, and then wrapped the cut part in cloth.

"That's the bat," he explained, "and the cloth is put on so that it won't hurt your hands."

"We've got a good bat, Uncle Joe," said Ted. But Uncle Joe laughed.

"Not so good as this for wall-ball," he said. Then he stationed Ted, with the bat, a yard in front of the three staves and the shingle.

"Now," he explained, "Jimmy shall pitch to you; but he must stand back of this line." He marked a line about forty feet from the shed. "If you miss the ball, and it knocks off the shingle, you are out, and Jimmy bats. If you hit it, in any direction, you must run to that tree and back, and you count as many runs as you can make trips before Jimmy can either throw the ball so as to knock off the shingle, or can stand on the home base with the ball. But if he catches on the fly, or reaches the home base with it, or knocks off the shingle while you are still running, you are out."

"How about fouls?" asked Ted.

"A foul is as good as a fair ball in this game; only the wood-shed is on the pitcher's side, remember."

"Sounds more like cricket than like baseball," objected Jimmy, who had read books on games and was well posted. "but I think I'd

## THREE TRACKMEN KILLED

### Fourth Man Seriously Injured in Accident Near Fort William.

A despatch from Fort William says: Rounding a curve at full speed on the new double track at Osco, train No. 2 on Thursday morning plowed its way through an extra gang of sixty who had stepped on to the eastbound track out of the way of a west-bound freight train. Three men are dead as the result of the mix-up and another one now lies in the McKellar Hospital at the point of death. All four are members of the local coal dock section and all four have relatives living here. Wasyo Cushekewicz, Russian, 21 years, single; John Luchezyz, Russian, 29 years, married; Diemetro Wyshnowski, Austrian, 21 years, single; injured—John Cushekewicz.

Strange to say the three killed and the one injured were all that were touched by the express, and this ap-

pears to be almost miraculous considering the speed of the train and the manner in which the men were jammed up on the track. From the time the engine rounded the curve until it was right in the centre of the group of men, one could only move a few feet, yet all but four managed in some manner or other to scramble off the track.

Engineer Robinson, who was in charge of the engine, did not see the men until he was right on them. He immediately threw on the emergency and stopped in two train lengths, which was very fast work considering the speed of the train.

Of the three who were killed, Cushekewicz and Luchezyz were dead when picked up, while Wyshnowski died on the train on the way to the hospital.

## CROPS NOT QUITE SO HEAVY

### Conditions at the End of July Are Not So Rosy.

A despatch from Winnipeg says: Crop conditions at the end of July are perhaps not quite so rosy as many expected them to be. In spite of all the rain that fell in June, and which made many people worry for fear that the country was getting too much, there is a very general complaint of want of rain, and this has undoubtedly lessened the average yield, to what percentage only the thrashing machines can tell. Careful reading of the reports shows that while the harvest will be much earlier than last year, it will not be a very early harvest, for although on light land consider-

able wheat will be cut on and about August 10, there will not be much general cutting until the week of August 15 to 20, which is all the way from a week to ten days later than either the year 1906 or 1905. Taking the country from end to end, however, conditions are decidedly better for reaping, without damage, an average crop, so far as yield is concerned, and much more than an average crop for quality.

An average crop, on the acreage now in, means at least very considerably over a hundred million bushels, though how much over, it is difficult to say.

## FROM ERIN'S GREEN ISLE

### NEWS BY MAIL FROM IRELAND'S SHORES.

#### Happenings in the Emerald Isle of Interest to Irishmen.

The King has no intention of going to Ireland this year.

Good takes of salmon at all the stations along that coast are reported from Skibbereen.

A poor old woman who was found dead in bed in Dublin, was discovered to have hoarded up over \$3,500.

The death is announced of Major-General Sir Thomas Maunsell, K. C. B., at Burghelere, near New-

greater part of the past month, owing to an unusual number of arrivals of grain-laden ships from abroad. Registrations numbered 140.

A farm laborer, William Butler, who was under remand at Kilkenny, charged with the murder of an old woman and attempted murder of Head Constable Frizelle, has committed suicide in Kilkenny prison.

### 87,404 ALIENS NATURALIZED. Have Become British Subjects Since 1902.

A despatch from Ottawa says: According to returns received at the State Department, 87,404 aliens have taken out naturalization papers as British subjects in Canada since the Act went into effect in 1902. During the period between July 1st, 1906, and Dec. 31st, 1907, the num-

Scott has been appointed to a new command.

The British Admiralty has exonerated both Lord Charles Beresford and Sir Percy Scott in connection with the signal incident.

#### UNITED STATES.

North Dakota is to erect a monument to Theodore Roosevelt.

It is regarded as probable that Buffalo will be the centre of a big strike of railway men.

A negro charged with assaulting a white woman was burned at the stake by a mob in the public square at Greenville, Texas.

#### GENERAL.

Turkish Moslems are now strongly pro-British.

W. K. Vanderbilt's stepson was killed in a motor car accident in France.

The German military authorities intend to have a fleet of 30 dirigible war balloons.

A Chinese vessel foundered in a typhoon near Canton and 300 persons were drowned.

Gen. Von der Goltz, of the German army, will reorganize the Turkish army.

Clark Kennedy, the Englishman who was captured by Moorish brigands, has been released.

Venezuela wants satisfaction from Holland for insults offered to Minister De Reus.

The President of Panama declares that the United States will ultimately take possession of the isthmus.

#### PLAGUE SWEEPS RUSSIA.

Condition of Towns Opens Way for Cholera Harvest.

A despatch from St. Petersburg says: The cholera that has made its appearance in Russia this year is most virulent. Out of 12 cases in Tsaritsyn there have been 11 deaths. According to investigations made by Deputy Von Anrep, who is a distinguished medical authority, the sanitary conditions in the Volga towns are horrible. The absence of a sewerage system and water works puts the inhabitants at the mercy of the epidemic, and the cholera will reap a full harvest.

#### LUMBER IS LOWER.

Big Cut in Prices Announced in the West on Wednesday.

A despatch from Winnipeg says: Considerable reduction in the price of lumber was announced on Wednesday. Shiplap and boards have been reduced \$5.50 per thousand, making the new price \$17 per thousand. There is also a reduction in the price of dimension lumber of \$3.50 per thousand, which brings it down to \$19 per thousand. This applies to all lumber from British Columbia and western points.

#### HANGED AT KAMLOOPS.

Man Who Blew Up Hotel and Killed Proprietor's Daughter.

A despatch from Kamloops, B.C., says: Francisco Ceddio was hanged in the jail yard here on Friday morning at 9.20 o'clock for the murder of a hotel proprietor's daughter near Greenwood by blowing the hotel up with dynamite.

"How about fouls?" asked Ted.

"A foul is as good as a fair ball in this game; only the wood-shed is on the pitcher's side, remember."

"Sounds more like cricket than like baseball," objected Jimmy, who had read books on games and was well posted, "but I think I'd like to try it."

"You may call it wood-shed cricket if you like," answered Uncle Joe, his eyes twinkling.

He returned to his writing, and was interrupted no more that morning. But two hot and red-faced nephews met him at luncheon.

"How did it go?" he asked.

"I'm ahead!" cried Jimmy. "Five runs!"

"He's got sixty-two, and I've got only fifty-seven," said Ted, soberly. "But we're going to play all the afternoon, and I bet I beat him! When is the game over, Uncle Joe?"

"Not until the wood-shed is tired," said Uncle Joe, again with the twinkle in his eyes. — Youth's Companion.

#### CANADA'S MISSION.

To Cement Britain's Friendship With United States.

A despatch from London says: The Daily Telegraph says the Quebec battlefields will be hallowed ground, consecrated forever to the genius of Canadian nationality within the empire, which will one day play a great part in the world's affairs. The highest mission of Canada is to stand between Britain and the United States, holding each by the hand.

The times pays the highest tribute to the success of the Tercentenary. It says Canada has only to be true to herself and to her great traditions to create a community second to none on the earth.

#### NOVA SCOTIA'S CROPS.

Government Summer Report Estimates Large Average.

A despatch from Halifax says: The Nova Scotia Government's Summer Crop Report has been issued. Compared with the average crop of a normal year, the department makes the following estimate if six leading crops this season, one hundred per cent. being taken as an average. Hay, 90 per cent.; oats and other grains, 97; potatoes and roots, 105; apples, 100; plums, 90; small fruits, 90.

#### \$100,000 FIRE AT SACKVILLE.

Foundry and Hotel in New Brunswick Town Destroyed.

A despatch from Sackville, N.B., says: Lightning early on Thursday set fire to the buildings of the Enterprise Foundry, and they were totally destroyed. The fire spread to the Intercolonial Hotel, which was ruined. The railway station was saved with difficulty. The loss is \$100,000.

#### GAVE BIRTH TO TRIPLETS.

Ceasation Celebrated in Great Style in Lachine Household.

A despatch from Montreal says: Mrs. Bertrand of Lachine gave birth to triplets on Tuesday. All three are hale and hearty. She has been married six years, and has seven children. The house was decorated on Wednesday in honor of the event, and all and sundry were made welcome.

A poor old woman who was found dead in bed in Dublin, was discovered to have hoarded up over \$3,500.

The death is announced of Major-General Sir Thomas Maunsell, K. C. B., at Burghelere, near Newbury, at the age of 86.

A young woman named Mulcahy, while driving cattle at Dungarvan, was attacked and seriously injured by a donkey.

Two brothers, Thomas and William Cullen, aged 17 and 15, respectively, were found drowned in a bog hole at Manor Moss.

The death has occurred of Peter Scanlon, who was wounded in a recent shooting occurrence in Tyrone street, Dublin.

A swarm of bees recently took possession of a wall letter box in the town of Killane, and were with difficulty dislodged.

The stock of a cattle owner near Tullinadally consisting of 225 sheep and 14 head of cattle were recently driven from his lands.

The death is announced of Mr. Michael J. Lawler, of Newtownbury, who was widely known in the Counties of Wexford, Wicklow, and Dublin.

Because milk contractors refused to supply milk for the Limerick Board of Guardians, at a low price, the master gave the paupers porter as a substitute.

Elizabeth Doherty, in custody in Belfast on the charge of poisoning her husband and daughter at Kirkhill, will not be tried until further evidence is obtained.

Thomas O'Loughlen, convicted of the shooting of Mr. Daniel O'Loughlen, county councillor, near Lisdoonvarna, was sentenced to three years penal servitude.

Walking in his sleep, Private Farrell, of the Connaught Rangers, stepped through a window at his quarters in the Tipperary Barracks and was instantly killed.

Two shots were fired at a Ross-lare express as it was running between Ross-lare and Waterford, the bullets entering a first-class breakfast car and passing close to a passenger's ear.

Miss Elizabeth Nerie, an elderly woman living alone with a maid servant on a small farm at Drummallan, Co. Derry, was attacked by hoodlums and her house completely wrecked.

The Dublin Sailors' Home has been unusually full during the

despatch from Ottawa says: According to returns received at the State Department, 87,404 aliens have taken out naturalization papers as British subjects in Canada since the Act went into effect in 1902. During the period between July 1st, 1906, and Dec. 31st, 1907, the number naturalized was 17,714, of whom 7,279 were from the United States, and 306 were Japanese.

#### SAVED.

A young lawyer, not noted for intelligence, succeeded in having a client acquitted for murder. Mr. [unclear] a friend a few days afterwards, the lawyer was greeted with warm congratulations.

"Yes," he said, mopping his brow, "I got him off, but it was a narrow escape."

"A narrow escape! How?"

"Ah, the tightest squeeze you ever saw. You know I examined the witnesses, and made the argument myself, the plea being self-defence. The jury was out two whole days. Finally, the judge called them before him, and asked what the trouble was."

"Only one thing, my lord," replied the foreman. "Was the prisoner's counsel retained by him or appointed by the court?"

"No, gentlemen, the prisoner is a man of means," said the judge, "and engaged his own counsel."

"I could not see what bearing the question had on the evidence," continued the lawyer, "but ten minutes later in filed the jury, and what do you think the verdict was?"

"Why, 'not guilty,' on the ground of insanity."

#### ODDS-AND-ENDS.

Most men of sense are also modest.

The fool who admits his folly is no longer a fool.

A philosopher is he who doesn't want what he can't have.

It's easy for the man with a good income to be a philosopher.

You may think yourself a superior being, but keep it to yourself.

No girl treats a young man better than he sees her treat her mother.

Stupid people seldom realize their stupidity; which is fortunate for them.

## SWALLOWED A FATAL DOSE

### Losses in Stock Market Cause Suicide of Montreal Broker.

A despatch from Montreal says: The business men received a shock on Wednesday when it was learned that Mr. Victor Gray, a prominent stockbroker, had committed suicide during the night by swallowing chloral. He was despondent over heavy losses and had been unable to sleep for some time. Tuesday night he went to a hotel in the city and about 3.30 called up Mr. Dobbin, a friend in Westmount, and bade him good-bye, saying it was for the last time. His friend became alarmed and hurried to the hotel, where he found Gray lying on his bed unconscious. An ambulance was summoned, and he was speedily conveyed to the Royal Victoria Hospital, where everything was done to save his life, but death ensued this morning.

Mr. Gray was a member of the firm of J. H. Dun & Company, and was a member of the Montreal Stock Exchange. He was about 33 years of age, and a year ago married Miss Clayton of Ottawa. His home was originally in Halifax, where he has a sister living at present.

### J. N. Osborne's

Barber Shop is on the north side of Dundas street near Steacy's. Call and see how well he can suit you.

### The Whitest White Of all White Paints.

Is Painter's Peerless White. It stays white longer, will not scale off, and does not turn dark on standing. Sold in Napanee only at Wallace's Red Cross Drug Store.

### The Last Warning.

There is yet about \$4000 of last year's taxes unpaid, and Collector Rankin wishes it distinctly understood that if they are not paid forthwith, distress warrants will be issued and the debt collected in that manner. This is positively the last warning.

### Church of St. Mary Magdalene.

Holy Communion at 8 a. m., Mathies and Litany at 11 a. m. and evensong at 7 p. m. Rev. Dr. C. J. Cameron, formerly of West Green Presbyterian Church, Philadelphia, and now Rector of Leavenworth in the Diocese of Kansas, will preach at evensong.

### Died at Kingston.

Mr. Dan Gleeson, a life long and much respected resident of Napanee, died suddenly at Hotel Dieu, Kingston, on Thursday, July 30th. Deceased was the eldest son of the late John Gleeson, of Roblin Hill. The funeral took place on Saturday morning, Aug. 1st, from the residence of his cousin, P. Gleeson, East Street, to St. Patrick's Church, and then to R. C. Cemetery. His brother, John Gleeson, of Deloraine, Man., is expected here in a few days, but could not reach him in time for the funeral.

### Training Counts.

A course at the Frontenac Business College, Kingston, will qualify you to take up a more congenial line of work at a much higher salary. One young man who graduated last term has just accepted a situation at \$800 a year. Training counts, and your success depends largely on your choice of a school. Send us the names of three young people who would appreciate our catalog, and we will send you free a coupon worth \$10 on payment of any of our courses. Write at once as the offer is only good for the first fifty. T. N. Stockdale, Principal.

Drive Rheumatism from the blood with Dr. Shoop's Rheumatic Remedy. Tablet or Liquid. Sold by—ALL DEALERS

### Labor Day Sports.

A meeting will be held in the Athletic rooms on Friday evening when an endeavor will be made to arrange for a day of field sports in Napanee in the near future. There is no reason why Napanee should not have a good programme of sports on Labor Day. A few good men to push it along is all that is necessary, and the park is admirably suited for the pulling off of such a programme. Foot races, running races, bicycle races, jumping, local races by local horses, base ball, and some water sports in the evening by the Canoe Club, to wind up with a grand physiog parade would fill the bill nicely.

Pure Extract of Vanilla (made from the bean). The kind that has the right flavor, at the Medical Hall Fred L. Hooper.

### Canoe Club.

The weekly sports of the Napanee Canoe Club, were held as usual on Thursday evening, 30th inst. The first race consisting of Fours, was very closely contested, and resulted in a win for Messrs. Carrol, Loynes, Steacy and Miller, the seconds being Messrs. Chenoweth, Conway, Robinson and Steacy, Jr. The tug of war proved interesting and amusing, the winners only getting it after a very spirited contest. The filling with water of one of the canoes in the first tug, caused it to settle slowly, the occupants gradually settling with it, but outside a good mouthful of water to one of the

 band, and will be pleased to serve all  
 who may favor her with their custom.  
 Store next door to residence on corner  
 of Bridge and Centre St.

Rev. Howard Kennedy B. A. B. D.,  
 rector of Somerville, near Boston,  
 preached two eloquent and forceful  
 sermons at the Church of St. Mary  
 Magdalene last Sunday, compelling the  
 thought and attention of large congrega-  
 tions. Mr. Kennedy is an old Lennox  
 boy, a graduate of Queen's, and of the  
 Episcopal Theological School at Cam-  
 bridge, Mass. His many friends in  
 Napanee were glad to see him looking  
 so well, and are proud of his success.

Come along and enjoy a most de-  
 lightful sail down the bay this even-  
 ing with the firemen.

Canon Jarvis requests that all ac-  
 counts against him be sent in for settle-  
 ment before the 15th August as he  
 proposes shortly to remove from Napa-  
 nee.

The Napanee ball team go to King-  
 ston on Saturday for a game with the  
 Victorias of that city. It just seems  
 to us that our boys owe them one and  
 will pay the debt with interest on  
 Saturday.

The schooner Winnie Wing, of Napa-  
 nee, was caught in the blow on Fri-  
 day evening last when about nine  
 miles from Kingston. She could not  
 enter the harbor and had to run up to  
 Prinyer's Cove. One of her crew said  
 it was the roughest trip in his expe-  
 rience.

The Western Methodist Sunday  
 School excursion on Tuesday, as is  
 usual with this annual outing, was  
 well patronized, and all report a most  
 enjoyable time. The moonlight in the  
 evening was also well attended. The  
 Citizens band accompanied the excu-  
 sion and rendered some choice selec-  
 tions.

Mrs. Gordon wife of Mrs. George  
 Gordon, Bridge street, passed away on  
 Sunday, after an illness of several  
 months. Deceased was a sufferer from  
 Cancer and suffered untold agonies,  
 which she bore with Christian fortitu-  
 tude. She was a devout christian and  
 a member of the Methodist Church.  
 A sorrowing husband remains to  
 mourn. The funeral took place on  
 Wednesday to Riverside Cemetery.

The demand for competent Book-  
 keepers and Stenographers was never  
 so great in Canada as at the present  
 time, nor were salaries ever as enticing.  
 Many graduates of the Frontenac  
 Business College, Kingston, are to be  
 found in the best situations through-  
 out the land. A six months' course  
 will qualify you to join their ranks.  
 Special rates to the first fifty who re-  
 gister for the Fall term. T. S. Stock-  
 dale, Principal.

Yes.

We want you to come and see us  
 and bring along your cash, and we  
 think we can show you that you can  
 save money by buying from us. We  
 are offering a big discount off all lines  
 of crockery and glassware in order to  
 reduce our stock, which is far too large  
 for this season of the year. You will  
 find as good value with us in all lines  
 of groceries etc., as anywhere in town.  
 Our tea at 25c. has them all whipped  
 in the cup. Will pay highest price for  
 eggs THE COXALL CO.

Chenoweth, Conway, Robinson and  
 Steacy, Jr. The tug of war proved in-  
 teresting and amusing, the winners  
 only getting it after a very spirited  
 contest. The filling with water of one  
 of the canoes in the first tug, caused it  
 to settle slowly; the occupants gradu-  
 ally settling with it, but outside a  
 good mouthful of water to one of the  
 crew, no one was the worst of it, even  
 though the water leaves a bad taste in  
 your mouth. The Tifting, which  
 seems to prove most popular to both  
 participants and spectators, was enter-  
 ed into with a good "go at it" and re-  
 sulted as follows:

Anderson beat Carrol, Cleland beat  
 Conway, Chenoweth beat Jemmett,  
 Barker beat Steacy, Semi Final, Cheno-  
 weth beat Cleland, leaving Messrs.  
 Barker, Anderson and Chenoweth to  
 finish next Thursday night. The fours  
 were as follows:

1st, Carrol, Loynes, Steacy, Miller.  
 2nd, Chenoweth, Steacy Jr., Conway,  
 Robinson, 3rd, Belfie, Barker, Ander-  
 son, Cleland.

Tug of war, Chenoweth, Conway,  
 Robinson, Steacy, Jr.

Mr. John Lowry completed the  
 West street sewer on Thursday.

Mr. Wesley Wagar nearly lost his  
 barn by lightning Tuesday night.

The new gas machine for the Gas  
 Works arrived on Tuesday and is  
 being placed in position.

A. S. Kimmerly continues paying 17 1/2  
 cash or trade for new laid eggs from the  
 farm stone, and pullers eggs not wanted.  
 22 nutmeg 5c, Roasted Corn Flakes 3  
 packages 25c, Five Rosea Flour \$3.00, Good  
 Flour \$2.80. Car of Seed Corn in stock.

Mr. Nelson Grooms, one of Rich-  
 mond's oldest residents and a much re-  
 spected farmer, passed away on Wed-  
 nesday evening. Deceased was about  
 84 years of age and leaves a family of  
 two sons, Messrs Ira E. Grooms and  
 Z. A. Grooms, of Richmond, and one  
 daughter, Mrs. Cannon, of Ottawa.  
 The funeral will take place from his  
 late residence on Saturday afternoon.

## Music.

Miss Pearl A. Nesbit, pupil of Dr. Vogt, Toronto conservatory of music, (conductor of the Mendelssohn choir) wishes to state that she is prepared to give instruction in organ and piano music. For information address Newburgh, Ont.

## A Quiet Wedding.

Mr. W. A. Grange, town clerk, and son of Mr. J. T. Grange, and Miss Carrie Williams, only daughter of Mr. and Mrs. G. H. Williams, were quietly married at the Rectory by Rev. Rural Dean Dibb on Tuesday evening. Both bride and groom are among Napanee's most popular young people and the congratulations of a host of friends go with them. They are spending a quiet honeymoon at Bon Echo Inn.

## Labor Day.

Plans are about completed for a grand day of general sports in Napanee on labor day, Sept. 7th, under the auspices of the Napanee A. A. Association. A meeting is being held this Friday evening in the club rooms to perfect arrangements. All interested and the executive of the different sport associations and clubs in Napanee are requested to be present. Napanee has not had for many years a full day of general sports and we are pleased that this move is made in the right direction.

A LOVE EPISODE.

When "CAPT. D'ARCY" on furlough was relieved,

To "THE OLD FOLKS AT HOME" he a visit conceived

He was "LONGING FOR HOME," his dear home, "NAPANEE."

"IS MY SWEETHEART STILL TRUE TO ME?" soon I will see.

For a stroll he went out, 'twas so nice, "IN THE GLOAMING."

Met sweet "ANNIE LAURIE" so pensively roaming.

"EVERY GIRL SHOULD HAVE A BEAU" she reflected,

An old chum of "SCHOOL DAYS" was here, unexpected

Why linger? "IT'S LONESOME TONIGHT" said the spark.

She replied, "I'M AFRAID TO COME HOME IN THE DARK."

"THERE'S ONLY ONE SWEETHEART FOR ME" said he slyly.

And "ARE YOU SINCERE" she then whispered so shyly.

"OH! PROMISE ME" Jack you will always be true,

He said, steady! "THE MOON HAS HIS EYES ON YOU."

She longed for "SWEET KISSES," he fumed and he raged

Said, the dear "MERRY WIDOW" and I are engaged.

[here are "NO WEDDING BELLS" for poor Annie this time,

"Twill be "SOME OTHER DAY" when you hear their sweet chime.

—Chas. Fisher.

Catarrh and Cold in the Head are Quickly Cured by Dr. Agnew's Catarrhal Powder—It's Painless—It's a Cure.

Says Alex. Edmison, of Roseneath, Ont.: "I have been troubled with catarrh for several years and suffered very much. No end of remedies were used, but I can honestly say that Dr. Agnew's Catarrhal Powder is the only remedy I have used that has given permanent relief. It has in my case cured the disease." (25)
